

Marketplace GUI

Markerplace page is available under *System > Tools > Marketplace* menu. It allows you to manage Magento modules directly from backend interface.

Cron is required to use GUI.

The list of features available from GUI:

- Enable/Disable update channels.
- Edit auth information per each channel.
- Install/Update/Remove Magento modules.
- Run module installer if any.
- Easily track outdated modules, so you can update them in time.

The screenshot displays the 'Package Manager' interface in the Magento backend. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Swissup, Reports, Stores, System, and Find Partners & Extensions. The main area is titled 'Package Manager' and includes 'Tasks History' and 'Configuration' buttons. It features a grid of eight module cards, each with an icon, title, description, version, date, and an 'Install' button.
