

Installation instructions

There are several ways to install extension:

1. If you've bought the product at Magento's Marketplace - use [Marketplace installation instructions](#)
2. Otherwise, you have two options:
 - Install the sources directly from [our repository](#) - **recommended**
 - Download archive and use [manual installation](#)

Run the following commands:

```

cd <magento_root>
composer require swissup/pagespeed
php bin/magento module:enable Swissup_Pagespeed
php bin/magento setup:upgrade
php bin/magento setup:di:compile

#Fast enable and configure
curl -s
https://raw.githubusercontent.com/swissup/swissup.github.io/master/m2/extensions/pagespeed/configure |
bash -s
#OR
bash -c "$(curl -s
https://raw.githubusercontent.com/swissup/swissup.github.io/master/m2/extensions/pagespeed/configure)"
#OR
php bin/magento cache:flush
php bin/magento config:set pagespeed/main/enable 1
php bin/magento config:set pagespeed/main/devmode 1
php bin/magento config:set pagespeed/content/enable 1
php bin/magento config:set pagespeed/content/js 1
php bin/magento config:set pagespeed/content/css 1
php bin/magento config:set dev/template/minify_html 1
php bin/magento config:set dev/js/merge_files 1
php bin/magento config:set dev/js/enable_js_bundling 0
php bin/magento config:set dev/js/minify_files 1
php bin/magento config:set pagespeed/js/defer_enable 1
php bin/magento config:set pagespeed/js/defer_unpack 1
php bin/magento config:set dev/css/merge_css_files 1
php bin/magento config:set dev/css/minify_files 1
php bin/magento config:set pagespeed/css/defer_enable 1
php bin/magento config:set pagespeed/css/defer_onload 1
php bin/magento config:set pagespeed/css/critical_enable 1
php bin/magento config:set pagespeed/css/critical_default "$(curl --get --silent --fail
"http://ci.swissuplabs.com/pagespeed/critical-css/generate?" --data-urlencode "website=$(php
bin/magento config:show web/unsecure/base_url)")"
php bin/magento config:set pagespeed/image/optimize_enable 1
php bin/magento config:set pagespeed/expire/enable 1
php bin/magento config:set pagespeed/dnsprefetch/enable 1

php bin/magento cache:flush

```
