- [General tab](#)
- [Conditions tab](#)
- [Product Label tab and Category Label tab](#)
- [Indexed Products tab](#)

ProLabels extension provides user friendly interfaces to manage manual product labels and badges.

When we say manual labels we mean labels created by user himself. Used have to apply labels after they are created or updated. Used can apply labels by clicking button “Apply” at ProLabels grid. Or run reindex with `bin/magento` command for index `swissup_prolabels`.

Labels

In order to edit label or create new one, go **Magento Admin** → **Swissup** → **ProLabels**

Search by keyword

1 records found per page of 1

ID ↓	Name	Product Image	Product Position	Product Text	Category Image	Category Position	Category Text	Store View	Status	Action
1	Hot		Top-Left	HOT		Top-Left	HOT	All Store Views	Enabled	Select ▼

After clicking on any label from the submitted list, you will be able to edit the settings of Label information.

Status * Enable

- Title - label name
- Store view - please select target store view for current label
- Customer Groups - show label for current customer groups
- Status - enables or disables current label

Conditions tab

Conditions (don't add conditions if label is applied to all products)

If **ALL** of these conditions are **TRUE** :

Attribute Set is **Bag** 

Category is one of   

- Default Category (1181)
 - What's New (0)
 - Women (0)
 - Men (0)
 - Gear (46)
 - Collections (13)
 - Training (6)
 - Promotions (0)
 - Sale (0)

Manual labels section allows you to create labels based on your own rules. The essential feature of custom labels is Conditions settings' tab. It provides assigning labels for the products using its attributes. There are flexible conditional rules that can be applied to the labels according to the properties of the product. In order to use attributes in condition interface, you should go to *Admin - Stores - Attributes - Product*. Please open attribute you want to use for your manual label, and select Yes in the Use for Promo Rule Conditions field. After that current attribute will appear in conditions tree.

Product Label tab and Category Label tab

Label Text

```
1 Label
2 <b style="width: 0; height: 0;
border-right: 40px solid
transparent; border-left: 40px
solid transparent; border-top:
15px solid #e57368; position:
absolute; bottom: -15px; left:
0;"></b>
3
```

#attr:attribute_code# or #discount_percent# or
#discount_amount# or #special_price# or
#final_price# or #price# or #stock_item#

Custom Css
Label

```
1 background: linear-gradient(to
bottom, #d3362d 0%, #e57368
100%);
2 color: white;
3 font-size: 20px;
4 font-weight: bold;
5 line-height: 18px;
6 margin: 0 8px 15px;
7 padding: 14px 0 10px;
8 position: relative;
```

Css Style Only. Example: color: #fff; text-shadow:
0 1px 0 rgba(0,0,0,0.3); width: 60px; height:
60px;background:#ff7800; border-radius:50%;

Label Custom
Url

Round
Method

Math

Round Value

1

Example: 0.001 or 0.01 or 0.1 or 1 or 10 or 100

- Position - select the position of the label

- **Label Text** - in this field you are allowed to write the text for the label. Also you can use a few predefined extension variables to choose from.

For example : Save#discount_percent#% (Save is the word you selected by yourself , #discount_percent# - predefined variable).

- **Label Image** - upload the image of the label
- **Custom Css Label** - custom css style for label
- **Label Custom Url** - custom url for label (open in new tab)
- **Round Method** - select the method of computing rounded unit of final result. Possible values are Math, Ceil and Floor.
- **Round Value** - specify the rounded value

Indexed Products tab

The following grid allows you to check the list of products, that label were assigned to.
