# tapCLIQ

## tapCLIQ Magento Plugin **USERGUIDE**

Version  
2.0.0

## How to install

---

This plugin required minimum magento version 2.0 or higher. To install the plugin, please follow below steps:

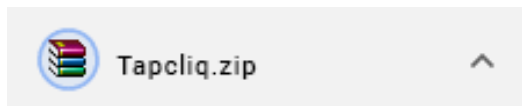

### Important:

- We recommend you to duplicate your live store on a staging/test site and try installation on it in advance
- Backup magento files and the store database

It's very important to backup all of the themes and extensions in Magento before installation, especially when you are working on a live server. We strongly recommend you to do not omit this step.

### Step 1: Download the Package

After purchasing order from tapCLIQ, go to [My Downloadable](#) Products page to download the tapCLIQ package.

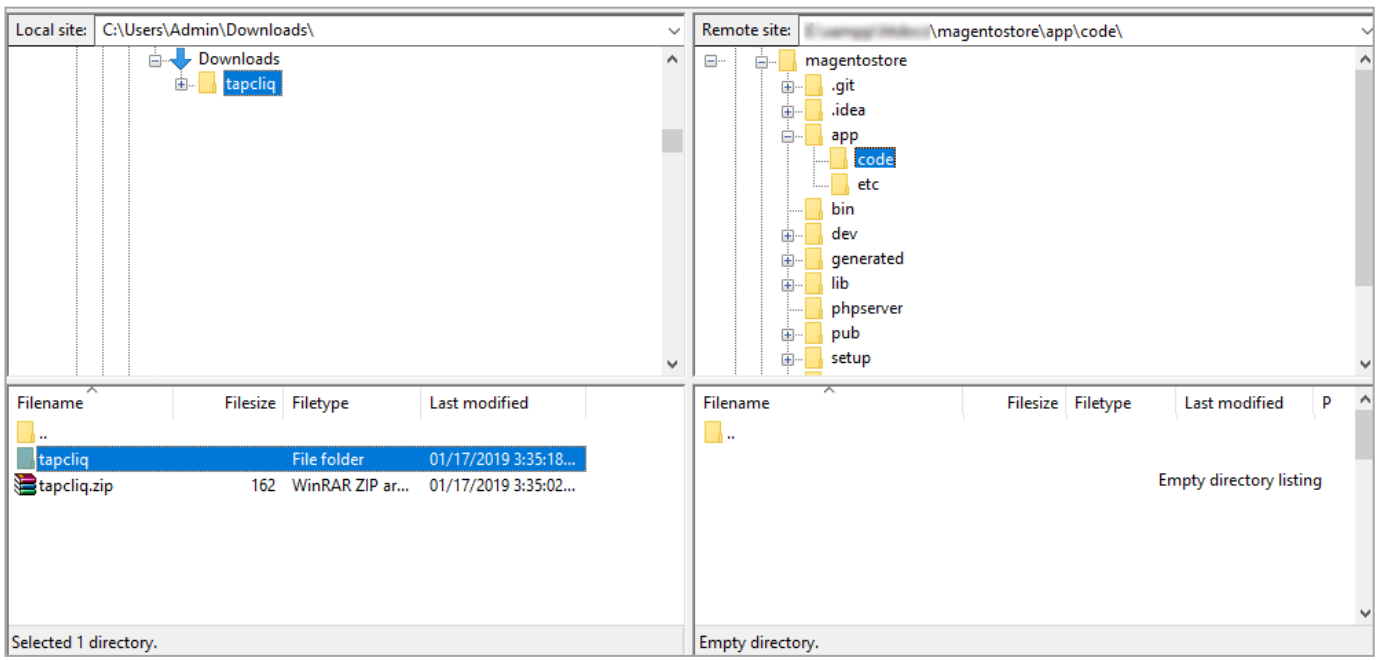

### Step 2: Upload new version

Let's extract the package and connect to your server using FTP Clients.

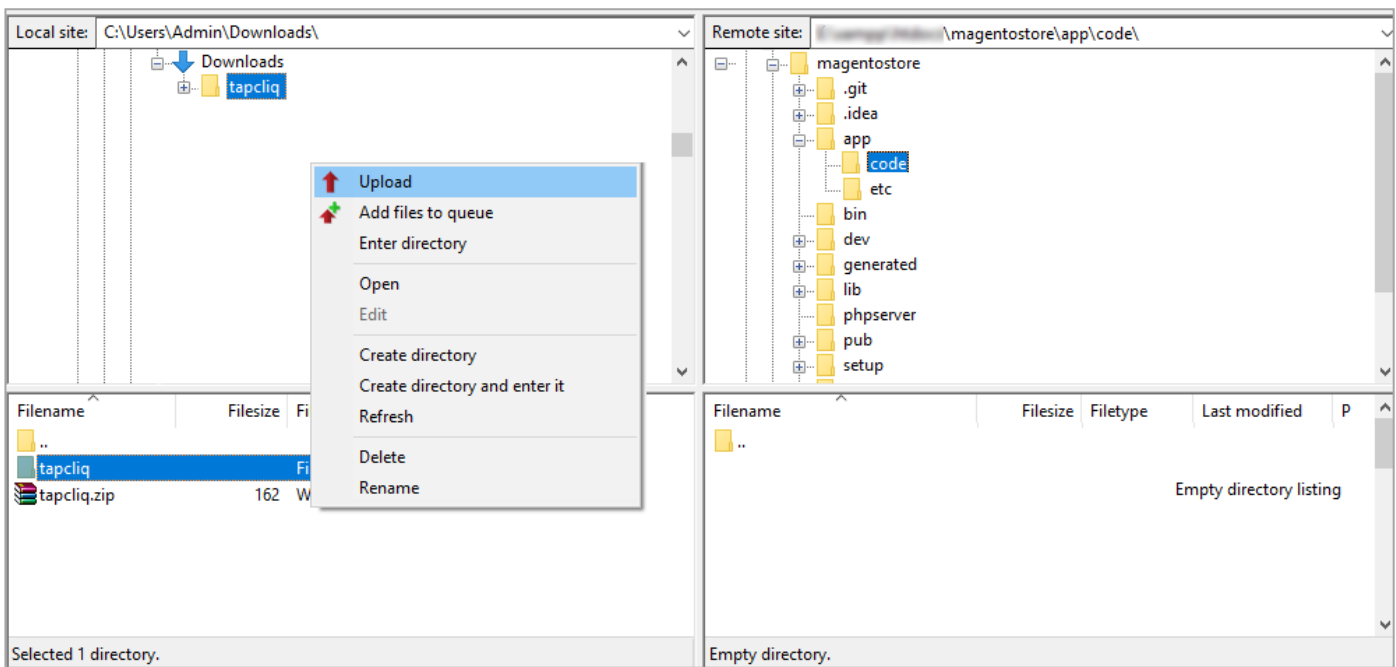

Then Go to `Magento Root Directory > app > code (if code folder not exist create one with all small caps)`

If "code" folder has other folders don't worry, just upload our tapcliq folder (Figure 1.2)

(Figure 1.1)

Select unzipped tapcliq folder, right click on it and select upload.

(Figure 1.2)

### Step 3: Run command line

To complete the installation process, we need to run the following command lines:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy -f
```

### Step 4: Check Result

Now time to check result in the admin console, you can find menu “TAPCLIQ” in it.

If you get any issues, get support at [tapCLIQ](#) Helpdesk.
