

**TextMaster**  
an acolad company.

**THE GLOBAL  
TRANSLATION SOLUTION**

---

**USER GUIDE FOR**  **Magento®**

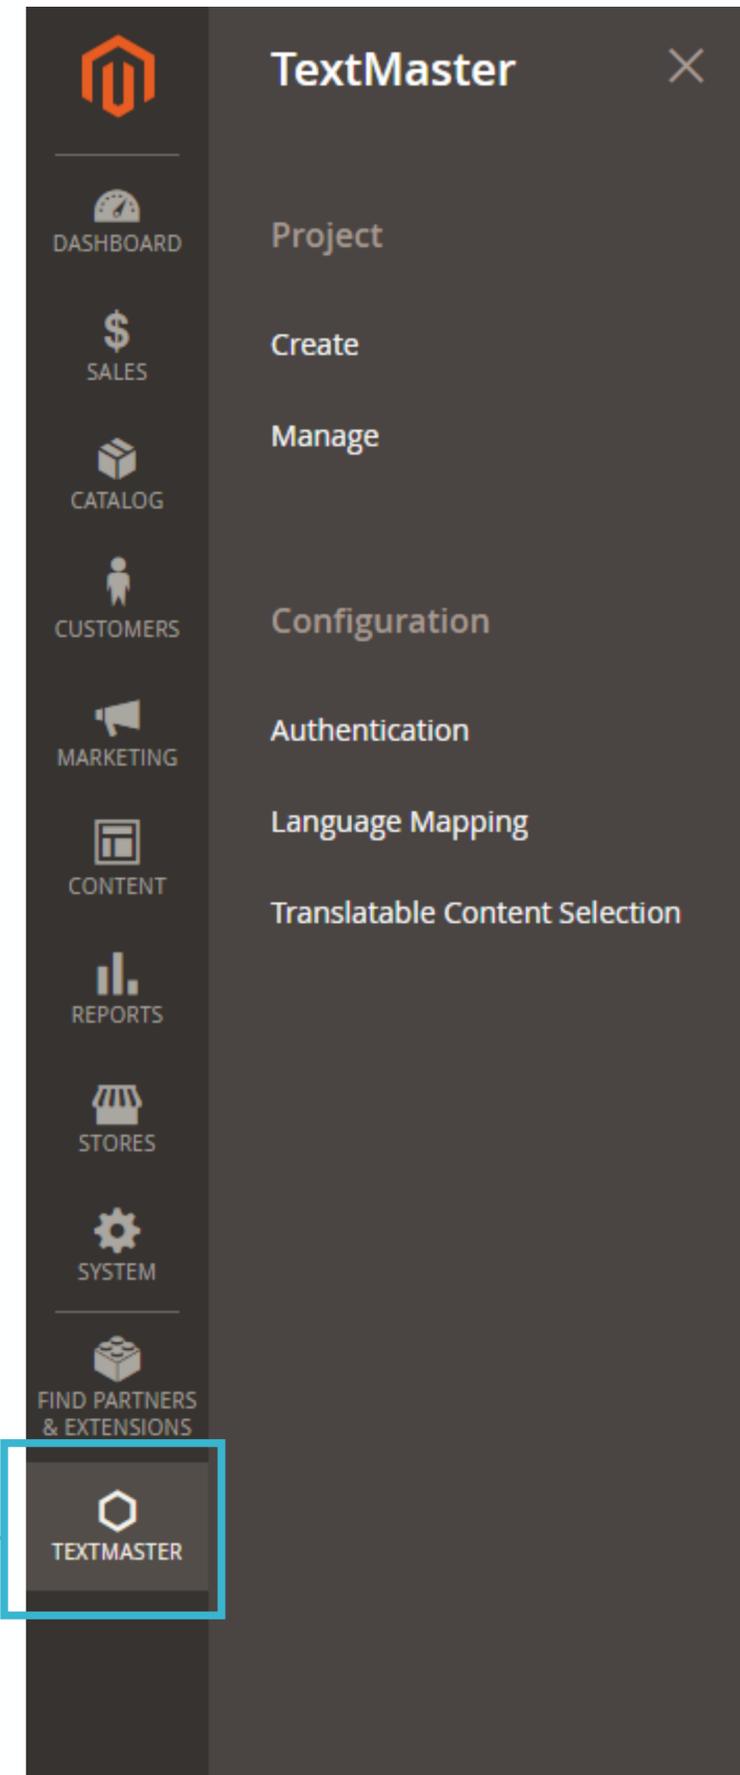

---

# I TEXTMASTER EXTENSION

The TextMaster plugin is divided in two sections:

- The main one is dedicated to **project management**. This is where you can create your translation requests and track the progress of your projects.
- The second is dedicated to the **configuration** of the plugin. This is where you can manage the different settings of the plugin to modify the preferences of your translation projects.

Once installed, you can find the TextMaster extension in the side menu of Magento

# I API TOOLS ON YOUR TEXTMASTER ACCOUNT

In order to use your TextMaster plugin you will first need to get some information on your TextMaster account.

It is in the "API & Loop" tab that you will find all the necessary information.

[https://app.textmaster.com/clients/api\\_info](https://app.textmaster.com/clients/api_info)

In the "TextMaster API" section you will find several useful elements for further use:

- **API key & secret:** which will be needed to connect to your TextMaster plugin.
- **Callbacks:** to check the status of the different API calls between your plugin and TextMaster
- Your **API templates**, necessary to launch translation projects from your plugin (we will see this later).

The screenshot displays the TextMaster account dashboard. At the top right, it shows 'Magento Testing Account' with a balance of '€ 2,657.78' and a 'LOG OUT' button. A navigation menu includes 'PLUGINS', 'API & LOOP', and 'MULTI ACCOUNT'. The 'API & LOOP' section is highlighted with a blue box. Below this, the 'TEXTMASTER API' section is shown, containing the following information:

- API key:** RoCDiw3hCjc
- API secret:** 9tPtIA9oLgl
- [View documentation](#)
- [View OAuth Applications](#)
- [View Authorized OAuth Applications](#)
- [View my callbacks](#)
- [Manage my API Templates](#)

At the bottom of the section, there is a text block: 'We're making it even easier to use our translation services and to integrate content writing and proofreading with the TextMaster API. With just a few lines of code, you'll be able to easily access these services directly through your own system.'

# I AUTHENTICATION

You need to connect the extension to your TextMaster account.

To do so, you have to go to the "Authentication" tab of the plugin

Then go to the "TextMaster Configuration" sub-section in the left side drop-down menu.

You can then enter your TextMaster API key and secret in the "Authentication" form. And remember to check the selected environment.

The screenshot displays the 'Configuration' page for the TextMaster extension. On the left is a vertical navigation menu with icons and labels for various sections: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, FIND PARTNERS & EXTENSIONS, and TEXTMASTER. The 'TEXTMASTER' section is expanded, showing a 'Configuration' sub-section highlighted with a blue box. A blue arrow points from this sub-section to the right. The main content area is titled 'Configuration' and shows a 'Scope: Default Config' dropdown. Below this is a list of configuration categories: GENERAL, CATALOG, SECURITY, TEXTMASTER, CUSTOMERS, SALES, YOTPO, and DOTDIGITAL. The 'TEXTMASTER' category is expanded to show an 'Authentication' form. This form is also highlighted with a blue box and contains three fields: 'Environment [global]' with a dropdown menu set to 'STAGING', 'Api Key [global]' with a masked input field and a refresh icon, and 'Api Secret [global]' with a masked input field and a refresh icon. A blue arrow points from the 'Authentication' form back to the 'TextMaster Configuration' sub-section in the navigation menu.

# I TRANSLATABLE CONTENT CONFIGURATION

The first step to configure your plugin is to pre-select the **attributes** you want to send for translation.

You can define this selection of attributes according to the type of document

There are two criteria to consider:

- **Translatable:**  
the attribute that has this option can be considered as content to send in translation
- **Select by default:**  
with this option, the attributes will be selected automatically when a project is created.

Translatable Content Configuration

# I API TOOLS ON YOUR TEXTMASTER ACCOUNT

To do this, simply select the attributes of your choice from the list on the dashboard, then scroll through the available actions in the drop-down menu at the top left of the table.

There are four options to modify the values of these attributes:

- Enable To Translate
- Enable To Translate And Select By Default
- Disable Select By Default
- Disable To Translate

# I LANGUAGE MAPPING

In order to be able to send content for translation from or to a given Magento locale, you must add that locale to the dashboard list and configure it with a TextMaster language.

Click on the button “Add New Language Mapping”

- Select a Magento locale
- Select a TextMaster Language

Make sure you map the correct locales configured on your Magento environment with the locales you use on your TextMaster account.

# I CREATE A NEW PROJECT

To send your documents in translation you have to create a new project.

You can create a new project with the button “Add New Project” available on the page “Manage” of the plugin, or directly go to the page “Create”.

Add New Project

Search by keyword

Filters

Default View

Columns

Here are the steps to follow to create your translation project:

- Choose a name for your project
- Choose the source and target languages
- Choose the API templates
- Select your documents to translate
- Validate the attributes selection

# I CREATE A NEW PROJECT

- You need to define a name for your project
- Select the document type you want to send in translation:  
*product, category, page and block*  
You can only send one type of document by project.
- Select one source language
- Select your target languages
- Select the API template that matches the selected languages.

<a href="#">Add Target Language</a>		

# I API TEMPLATES

To launch your translation project, you will need to set up API templates with your TextMaster project manager. You can find your API templates in your TextMaster account, in the "API & Tools" section.

A template is defined by a language pair : a source language and a target language

Other options are also available in the API templates (such as translation memory, expertise, etc.), and should be reviewed with your TextMaster contact.

To launch a project on TextMaster you need to assign at least one template, for each target language selected in Magento.

The screenshot shows a web interface titled "My API templates". At the top right, there is a "NEW API TEMPLATE" button. Below the title, it says "View 1-11 of 11". The main content is a list of 10 API templates, each with a title, date, ID, and language pair tags. The fourth item, "Traslation English to French", is highlighted with a blue box and a blue arrow pointing to it from the text "A template is defined by a language pair : a source language and a target language".

Template Name	Date	ID	Language Pairs
Translation FR to ES	09 Mar	af36a251-94c3-4113-83fc-66b634f7fcea	FR-FR, ES-ES
Translation FR to EN_US with autolaunch	16 Feb	2bfd0b2-f764-497c-a630-9a474143c3d3	FR-FR, EN-US
Traslation French to Danish	16 Feb	c66d0b50-345d-4844-bfd8-16e699cb4a06	FR-FR, DA-DK
Traslation English to French	29 Jan	20381f14-8cfc-494b-852b-3f570b05ta05	EN-US, FR-FR
Trasnslation French to Spanish	29 Jan	63994bcf-1014-4d72-86e3-5bb36bbaac1d	FR-FR, ES-ES
Traslation English to Spanish	29 Jan	ae63bd15-b184-420d-ba3a-40ae44c76a46	EN-US, ES-ES

Translation English to Italian	29 Jan	a7a1bf82-5316-4c4a-be97-85462609138a	EN-US, IT-IT
Translation English to German	29 Jan	e3000f76-cd3c-479f-8a33-860af3b5d97a	EN-US, DE-DE
Translation English to Dutch	29 Jan	19566fd5-08ef-4d6f-a2ed-520135e81b57	EN-US, NL-NL

# I SELECT MULTIPLE TARGET LANGUAGE

You can select as many target languages as you need.

Just make sure that for each of them you have an API template with the right language pair.

And that the languages exist in the language mapping part of the plugin.

Target Language *	API Template *	Action
Main Website - Store View English - en_US ▼	Traduction Français en Anglais ▼	
Main Website - Store View Spanish - es_ES ▼	Trasnslation French to Spanish ▼	
<input type="button" value="Add Target Language"/>		

# I SELECT THE DOCUMENTS TO TRANSLATE

Select all the elements (products, pages, blocks, categories) you want to send in translation, using the filters and menus available in the dashboard.

Select the attributes you want to send in translation.

Once you have made your selection, all you have to do is validate the project by pressing the "Save" button at the upper right of the page.

The project is then sent to TextMaster and you can find it on the monitoring dashboard of the plugin.

The screenshot shows the 'New Project' interface. At the top right, there are 'Back' and 'Save' buttons. Below the title, it says 'Select Products'. A search bar and 'Reset Filter' button are present, along with '6 records found'. A pagination control shows '20 per page' and '1 of 1'. A table lists products with columns for ID, Name, SKU, Type, Attribute Set, Status, Visibility, and Price. A blue box highlights the first six rows of the table, and a blue arrow points from the text 'Select the elements...' to this box. Below the table is the 'Select Attributes' section, which is also highlighted with a blue box and has a blue arrow pointing from the text 'Select the attributes...'. This section lists various attributes with checkboxes, some of which are checked.

# I PROJECT MONITORING

Find your projects in the dashboard in the "Manage Projects" tab of the TextMaster plugin.

This is where you will find all the projects launched from your plugin on Magento.

Each line of the dashboard corresponds to a TextMaster project.

From this dashboard you will be able to follow the progress of your translation projects, as well as a link to consult a project directly on the TextMaster platform.

**Manage Projects**

# I PROJECT MONITORING

ID ↑	Name	TextMaster Id	Target Language	Source Language	Document Type	Number of documents	Price	Status	Created At	Last Changed	Action
51	Test 2 09/03 - mass validation	<a href="#">60478f07bf75bc0012ae68a7</a>	Main Website - Store View English - en_US	Main Website - Store View French - fr_FR	Product	50	€393.36	Completed	2021-03-09 15:06:47	2021-03-09 15:16:15	<a href="#">View detail</a>

Here is the information that can be found about a project:

- **Project name:** the name you assigned to the project when you created it.
- **TextMaster ID:** the project ID and link to the TextMaster platform
- **Target and Source languages**
- **Document type:** the nature of the document sent for translation (product, category, page, block)
- **Number of documents**
- **Price:** the project price calculated by TextMaster, once the analysis and translation memory is complete

- **Status:** the status of the project on TextMaster. We find the following states:

**In Creation:** the project is launched on TextMaster and the analysis is in progress

**In Progress:** the quote has been validated and the project is launched in translation

**In Review:** the translation is ready to be reviewed and validated

**Completed:** the translation has been validated by the client, the project is finished

- **Action:** the action button, which allows you to consult the project details, validate the quote and validate the translation.

# I VALIDATE QUOTE

Once the **price** of one of your projects is **displayed** on the dashboard, it means that your project is ready to be launched in translation.

If you are satisfied with the price, simply click on the "Validate Quote" action.

The button is available on the project dashboard in the "Action" column but also on the detail page of a project, with the "Validate Quote" button

Price	Status	Created At	Last Changed	Action

# I SEAMLESS INTEGRATION OF YOUR TRANSLATIONS IN MAGENTO

As soon as a document is "In Review" you will be able to see a new action button "Apply Translation"

This action makes that the document will be updated with the translations on Magento and the TextMaster document will switch to "Completed".

The "Apply Translation" button appear in the main dashboard in the "Action" column when a project has the status "In Review".

With this action, the whole project will be validated and all translations will be applied on Magento.

# SEAMLESS INTEGRATION OF YOUR TRANSLATIONS IN MAGENTO

To validate translations you can also go to the project detail page and either press the "Apply Translation" button which has the same effect as the action on the main dashboard.

Or select the documents of your choice in the dashboard and then apply the mass action "Apply Translation" available in the drop-down menu.

A screenshot of a document list table. The table has columns for "TextMaster Id", "Status", "Created At", and "Last Changed". The "Status" column shows "In review" for all rows. A drop-down menu is open over the table, showing "Apply Translation" as an option. A red box highlights the menu and the "Apply Translation" option, with a red arrow pointing to it from the text on the left. The table also shows "15 records found (6 selected)" and "20 per page".
