Installation/Upgrade Instructions

STEP 1 - Install Magento extension
⌄ If you purchased from the Magento Marketplace

STEP 1.1

Install the extension by running the following command

Composer command
composer require tnw/quickbooks-full=2.1.21

⌄ If you purchased from PowerSync.biz

STEP 1.1

Upon purchase, you would need to submit installation request into our Service Desk.

STEP 1.2

Composer command
composer config repositories.powersync composer https://dest.powersync.biz

STEP 1.3

Register our distribution repository

Composer command
composer require tnw/quickbooksbasic=2.1.16 tnw/quickbooksbusiness=2.1.19 tnw/quickbooksenterprise=2.1.24

STEP 2 - CRON Configuration

SSH Command
crontab -e

CRON Configuration
*/5 * * * * flock -n /PATH_TO_MAGENTO/var/locks/qb-outgoing.lock php /PATH_TO_MAGENTO/bin/magento tnw_quickbooks:sync outgoing >> /PATH_TO_MAGENTO/log/quickbooks.outgoing.log */5 * * * * flock -n /PATH_TO_MAGENTO/var/locks/qb-background.lock php /PATH_TO_MAGENTO/bin/magento tnw_quickbooks:sync background >> /PATH_TO_MAGENTO/log/quickbooks.background.log

STEP 3 - Compile & clear cache

1. Open command prompt (CLI)
2. Navigate to Magento 2 root directory and run the following commands:
   a. Upgrade Magento extension(s)

*nix command
bin/magento setup:upgrade

   b. Re-compile Magento files:

*nix command
bin/magento setup:di:compile

   c. Re-deploy static content

*nix command
bin/magento setup:static-content:deploy

   d. Clear Magento cache
      i. Details can be found on Manage the cache Magento DevDocs
   e. Rebuild Magento indexes:

*nix command
bin/magento indexer:reindex

3. NOTE: For more details about installing custom modules check http://devdocs.magento.com/guides/v2.0/

4. If you face any issues, try running following command:

*nix command
rm -rf var/generation/*

When go though the all steps again
