

Manual: Magento-Plugin

Introduction

This guide will help you to integrate the uptain plugin in Magento. Should you have any questions, please contact your personal contact at any time or call our hotline on **+49 (0) 40 696 39 10 30**. You are also welcome to contact us by e-mail at **integration@uptain.de**.

Step 1

Get uptain Connect free of charge in the Magento Marketplace and install the plugin in your Magento 2 shop.

https://docs.magento.com/marketplace/user_guide/buyers/install-extension.html

Step 2

After logging into your admin area please navigate to the Store Configuration.

Stores >> Configuration

Go to the **uptain Connect** configuration in the **CUSTOMERS** group.

Step 3

Now enter your personal uptain ID, which has been sent to you in advance by e-mail. This consists of 16 random characters.

uptain Connect

Enable <small>[store view]</small>	Yes
uptain ID <small>[store view]</small>	XXXXXXXXXXXXXXXXXX
Track consisted customers <small>[store view]</small>	Yes
Track newsletter subscribers <small>[store view]</small>	Yes

Additional

Then please specify which e-mail data should be sent to uptain. If you select "**Yes**", you decide to transfer your visitors' personal data to uptain, in contrast to "No".

Select "**Yes**" for the "**Track consisted customers**" option for the transmission of personal data of your existing customers, if the requirements of § 7 UWG (3) are met.

Select "**Yes**" in the "**Track newsletter subscribers**" option for the transmission of the personal data of your newsletter subscribers, if you have a suitable double opt-in.

Then save the configuration with "**Save Config**".

Step 6

Now empty the cache and log out of your Magento backend and then back in again. The uptain snippet is now active on your page.

Technical support

If you have any questions, please contact your personal contact at any time or call our hotline at **+49 (0) 40 696 39 10 30**. You are also welcome to contact us by e-mail at **integration@uptain.de**.
