

Mobile Number Login

Information

- Now customer registration form will have a new field "mobile". So, the customer will have to enter their mobile for the registration process and that mobile number can be used to log in.
- If you wish to disable login with mobile number functionality you can go to System->Configuration->VKY EXTENSIONS->Mobile Number Login There you have the option to disable it.
- If you wish to delete complete extension you need to delete all uploaded files from your "Magento".Then you need to remove custom attribute "mobile".
