

# HOT DEALS

## For Magento 2

### Overview

Create any number of deals using our **Hot Deals** extension. It will provide you the ability to list your products with Special Prices in the Deals section. It will encourage customers to buy from the website and help enhance your sales.

This extension will also show you the countdown for remaining days, hours, minutes and seconds from the end date of the special price. The merchant can manage the list of products into the slider.

In current scenario Sales and Promotions seem to be the most popular methods of drawing customers' attention as well as increase sales volume. People are highly motivated to purchase a product when it is being discounted, especially with a limited time period. They are scared that if this chance is missed, they cannot buy the item in the future.

The **Hot Deals** extension will be very helpful for your store on such occasions or holidays as Christmas, New Year, etc. This module can create a deal with an attractive countdown timer just in a few clicks.

Please check **How To Use?** Section for getting a clear idea.

There are two way for displaying product deal (1) Hot Deal Slider (2) Hot Deal Product list

User can display hot deal anywhere over the website using given short code, please refer User-guide for more idea.

It is very easy to customize color and design of theme of the page. We have created separate CSS file for it. You can check

"HotDeals\view\frontend\web\css\hotdeals.css"

**It will take 10 mins to setup the product deals on your website. Follow these steps to have it setup.**

1. Install this extension from Magento Marketplace
2. Note the category Id for Product deals category
3. Do general setting for the extension from System >> Configuration
4. Add the Code Snippet given below to show the product deals on front-end.

### Features

1. Categorized products deals
2. Slide and Listing layout
3. Show countdown - Flexible countdown timer(Days: Hours: Minutes: Seconds)

- Shows discount percentage and discount amount on product listing page
- Facility to limit the number of products displayed
- Responsive layout
- Easy to install and easy to upgrade without CORE code modifications
- Easy to customize front-end via HTML/CSS

Website	Customer Group	Quantity	Price
<input type="button" value="Add"/>			

## \*\*\*\* Shortcode \*\*\*\*

### 1) Hot Deal Slider Layout

#### Admin :

```
{{widget type="Vsourz\HotDeals\Block\Widget\Hotdeals" title="Hot Deals Slider" id="hotdeals-  
slider1" css="hotdeals-slider" options="{items:4,pagination:true,navigation:true,navigationText :  
[''],autoplay:true,itemsMobile : [568,1]}"  
template="Vsourz_HotDeals::widget/hotdeals_slider.phtml" categories="category/58"}}
```

#### XML :

```
<referenceContainer name="content">  
  <block class="Vsourz\HotDeals\Block\Widget\Hotdeals" name="hotdeals-slider-xml">  
    <arguments>  
      <argument name="template"  
xsi:type="string">Vsourz_HotDeals::widget/hotdeals_slider.phtml</argument>  
      <argument name="id" xsi:type="string">hotdeals-slider-xmlfile</argument>  
      <argument name="categories" xsi:type="string">category/58</argument>  
      <argument name="title" xsi:type="string">Hot Deals Slider</argument>  
      <argument name="options"  
xsi:type="string">{items:4,pagination:true,navigation:true,navigationText :  
[''],autoplay:true,itemsMobile : [568,1]}</argument>  
    </arguments>  
  </block>  
</referenceContainer>
```

#### PHTML :

```
<?php  
echo $block->getLayout()->createBlock("\Vsourz\HotDeals\Block\Widget\Hotdeals")  
  ->setTemplate('Vsourz_HotDeals::widget/hotdeals_slider.phtml')  
  ->setId('hotdeals-slider-templatefile')  
  ->setCategories('category/58')  
  ->setTitle('Hot Deals Slider')  
  ->setOptions("{items:4,pagination:true,navigation:true,navigationText :  
[''],autoplay:true,itemsMobile : [568,1]}")  
  ->toHtml();  
?>
```

## 2) Hot Deal Product list layout

### Admin :

```
{{widget type="Vsourz\HotDeals\Block\Widget\HotCategory" title="Hot Deal List"
products_count="8" id="hotdeals-list" template="Vsourz_HotDeals::widget/hotdeals.phtml"
categories="category/58"}}
```

### XML :

```
<referenceContainer name="content">
  <block class="Vsourz\HotDeals\Block\Widget\Hotdeals" name="hotdeals-ist-xml">
    <arguments>
      <argument name="template"
xsi:type="string">Vsourz_HotDeals::widget/hotdeals.phtml</argument>
      <argument name="id" xsi:type="string">hotdeals-list</argument>
      <argument name="categories" xsi:type="string">category/58</argument>
      <argument name="title" xsi:type="string">Hot Deals List</argument>
      <argument name="products_count" xsi:type="string">4</argument>
    </arguments>
  </block>
</referenceContainer>
```

### PHTML :

```
<?php
echo $block->getLayout()->createBlock("\Vsourz\HotDeals\Block\Widget\Hotdeals")
  ->setTemplate('Vsourz_HotDeals::widget/hotdeals.phtml')
  ->setId('hotdeals-list')
  ->setCategories('category/58')
  ->setTitle('Hot Deals List')
  ->toHtml();
?>
```
