## Category rules

By creating a category rule, it reduces the time needed to add an extensive changing list of products to a single category, based on its attributes

### Create a new category rule

- \* Only one category rule per category is allowed
- \* Only on sub-categories
- \* Category rule must be created on already created sub-categories

Go to the wanted category inside Catalog > Categories and click on “Add new rule” in the “Products in Category” fieldset

Subcategory#1 (ID: 11) Delete [Save](#)

[Add Root Category](#)  
[Add Subcategory](#)

[Collapse All](#) | [Expand All](#)  
Default Category (363)  
Subcategory#1 (0)

**Enable Category**  Yes [store view]

**Include in Menu**  Yes [store view]

**Category Name**  [store view]

**GENERAL**

**Information**

**1** Category

**2** Status +

**3** Name +

**4** quantity of products to add on each job execution +

**5** Keep job always on to add new products

**6** Remove products from category on next job execution

**7** Reset rule job

**8** Conditions

1 Name of the associated category. Pre populated when creating a new category rule

2 Enable or disable the category rule

3 Name of the category rule. Could be a short description of applied conditions

4 Quantity of items to add on each cron execution. For example, set a high number when dealing with a lot of products to add, to shorten the time to finish.

5 Keep the cron job always executing to add new products when they are created. Useful when there is high volume of new products been created or changing its attribute values Or keep the the category rule to run only once if the products to be added does not change that much, for performance concern

6 Set flag to empty all products inside the associated category on next cron execution

7 Once a category rule ended all the products to add, you can reset this category rule to be executed one more time

8 Set the conditions of the category rule

## Category rule form conditions

Here you can create the conditions of the category rule as you would do creating a catalog rule

**GENERAL**

Rule information

Conditions

Apply the rule only if the following conditions are met (leave blank for all products).

---

If **ALL** of these conditions are **TRUE** :

-

\* Remember to mark the attribute “Use for category rules” to then be listed in the available options.  
See next page

Please choose a condition to add.

Conditions combination

**Product attributes**

- Attribute Set
- Category
- Image Gallery
- SKU
- Special Price From Date
- Special Price To Date

## Set the attribute to be used in category rules

Under Stores > Attribute > Product

Selected the attribute to be available in the category rules under the “Storefront Properties” fieldset

sku
