

How to install Magento extension

Direct download via FTP or localhost

Step 1. Unpack archive

If you have an extension that is packed into a zip-archive or tgz-archive, then you need to unpack it locally first. Do it by your favorite file archiver. After unpacking, you will get new directory which should contain something like this.

Now in this directory go to the Webinse_NameOfExtension folder. You should see the folders such as app, js, skin and other one.

Step 2. Upload files

The next step is to upload all the folders of the extension excluding package.xml to your store root directory using your FTP. If you are installing extension on a localhost site then copy all the folder to the root directory where local site is located.

Step 3. Activate the extension

After the files are downloaded successfully, you need to go to the admin panel to activate the extension. In the Magento Admin panel go to the System -> Cache Management. Click on "Select All", select option "Refresh" from drop down Actions menu and then click on "Submit" button.

After these steps, log out from Admin panel and log in again.

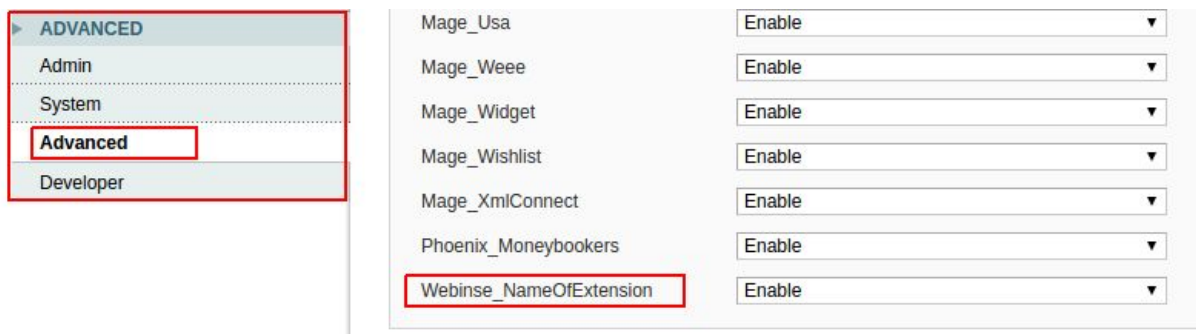

Cache Storage Management Flush Magento Cache | Flush Cache Storage

Select All | Unselect All | Select Visible | Unselect Visible | 8 items selected Actions Refresh Submit

Cache Type	Description	Associated Tags	Actions
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	Enable ENABLED Disable DISABLED Refresh
<input checked="" type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE	ENABLED
<input checked="" type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input checked="" type="checkbox"/> Translations	Translation files.	TRANSLATE	ENABLED
<input checked="" type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input checked="" type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	ENABLED
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	ENABLED
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	ENABLED

Step 4. Check extension in configuration

The last step it is necessary to make sure that the extension is installed in the system. Go to the System -> Configuration. In the "Advanced" tab, select "Advanced" section. Expand the "Disable Modules Output" group and find the name of the extension that was installed. Check that your newly installed extension appears in the list. If it does, it means that the installation was successful. Now you can use the extension!

The screenshot shows the Magento configuration interface. On the left, a sidebar menu has 'Advanced' selected. The main content area shows a list of modules with their status set to 'Enable'. The 'Webinse_NameOfExtension' is highlighted in a red box at the bottom of the list.

Mage_Usa	Enable
Mage_Weee	Enable
Mage_Widget	Enable
Mage_Wishlist	Enable
Mage_XmlConnect	Enable
Phoenix_Moneybookers	Enable

Installing an extension from Magento Connect

If you want to install an extension from Magento Connect you can do it. Go to the extension page on the Magento Connect site. If an extension isn't free, it must be purchased.

Click on the button "Install Now".

The screenshot shows the Magento Extension page for 'webinse'. On the left is a large image of the logo and a smaller version below it. On the right, the text 'Magento Extension' is at the top. Below it is a star rating of 4.4 / 5 and a popularity score of 2999. There are links for 'Read all 27 reviews', 'Write a review', and 'Follow this extension'. A paragraph of placeholder text follows. Below that, compatibility information is listed: 'Compatible with: 1.5, 1.6, 1.6.1, 1.6.2.0, 1.7, 1.8, 1.8.1, 1.9, 1.9.1, 1.9.2'. A dropdown menu shows 'Platform: Community'. A large blue button labeled 'Install Now' is highlighted with a red border. At the bottom, there are links for 'Developer Info', 'Profile', 'Email', 'Support', and 'Extensions'.

Click on "Agree to the extension license agreement" checkbox.

This screenshot is identical to the previous one, but with additional elements highlighted. A red box surrounds the 'Get Extension Key' button. Below it, another red box highlights the checkbox labeled 'agree to the extension license agreement', which is now checked.

And then copy install key.

The screenshot shows a Magento extension page for 'webinse'. On the left is a large image of the extension's logo. To the right, the text reads 'Magento Extension' and 'webinse'. It features a 4.4/5 star rating with 27 reviews and a '2999 Popularity Score'. Below this is a 'Platform: Community' dropdown menu. A 'FREE' badge is prominently displayed. At the bottom right, there is a 'Select Key' button next to a text input field containing the URL 'http://connect20.magentocommerce.cc'.

Go to the Magento Admin panel of your site. Now go to System -> Magento Connect -> Magento Connect Manager. You must re-enter your Magento Administration Credentials in login form. Because only administrators with full permissions will be able to log in.

The screenshot shows the 'Magentoconnect MANAGER' interface. It has tabs for 'Extensions' and 'Settings'. Under the 'Settings' tab, there are options to 'Put store on the maintenance mode while installing/upgrading/backup creation' (checked) and 'Create Backup' (unchecked) with a 'Database' dropdown. Below this is the 'Install New Extensions' section with two steps: '1 Search for modules via [Magento Connect](#).' and '2 Paste extension key to install:' followed by an input field and an 'Install' button. The 'Direct package file upload' section has two steps: '1 Download or build package file.' and '2 Upload package file:' with a 'Choose File' button, 'No file chosen' text, and an 'Upload' button. At the bottom, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button and a 'Commit Changes' button. The channel is set to 'Magento Community Edition'.

Paste extension key from Magento Connect into the input field to install extension. Then click the "Install" button and the extension will be automatically installed.
