

# Product Carousel

 [webkul.com/blog/magento-product-carousel/](http://webkul.com/blog/magento-product-carousel/)

Published On - March 17, 2011

**Product Carousel** displays your products in a very beautiful carousel style. The whole module is very dynamic, means you can put different product IDs separated by commas. Every product image will be linkable to its product page.

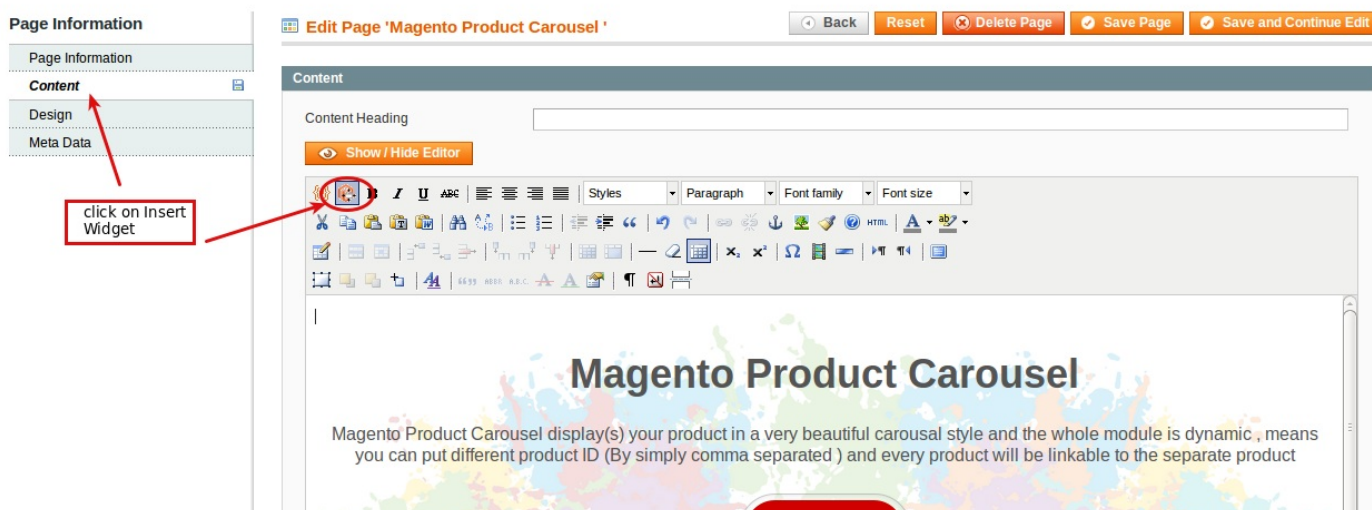

The users can click any of the images from the carousel and visit the product page. The admin can autoplay the carousel images and set the interval time of the images.

## Features

- Select Yes / No to play Carousel automatically.
- You can use this extension on multiple places within a single page.
- The widget works without even installing the flash plugin.
- Compatible with all the browsers such as IE, Chrome, Firefox, Safari.
- View carousel on any devices – PC, laptop, tablet, smartphones.
- Enter carousel images height and width values.
- Configure the background color and width for the carousel widget.
- Hyperlinks for every product pages is linked with the images.
- Navigation controls are there in the widget box for moving the images.
- The source code is open for customization.
- Supports multiple languages translations.

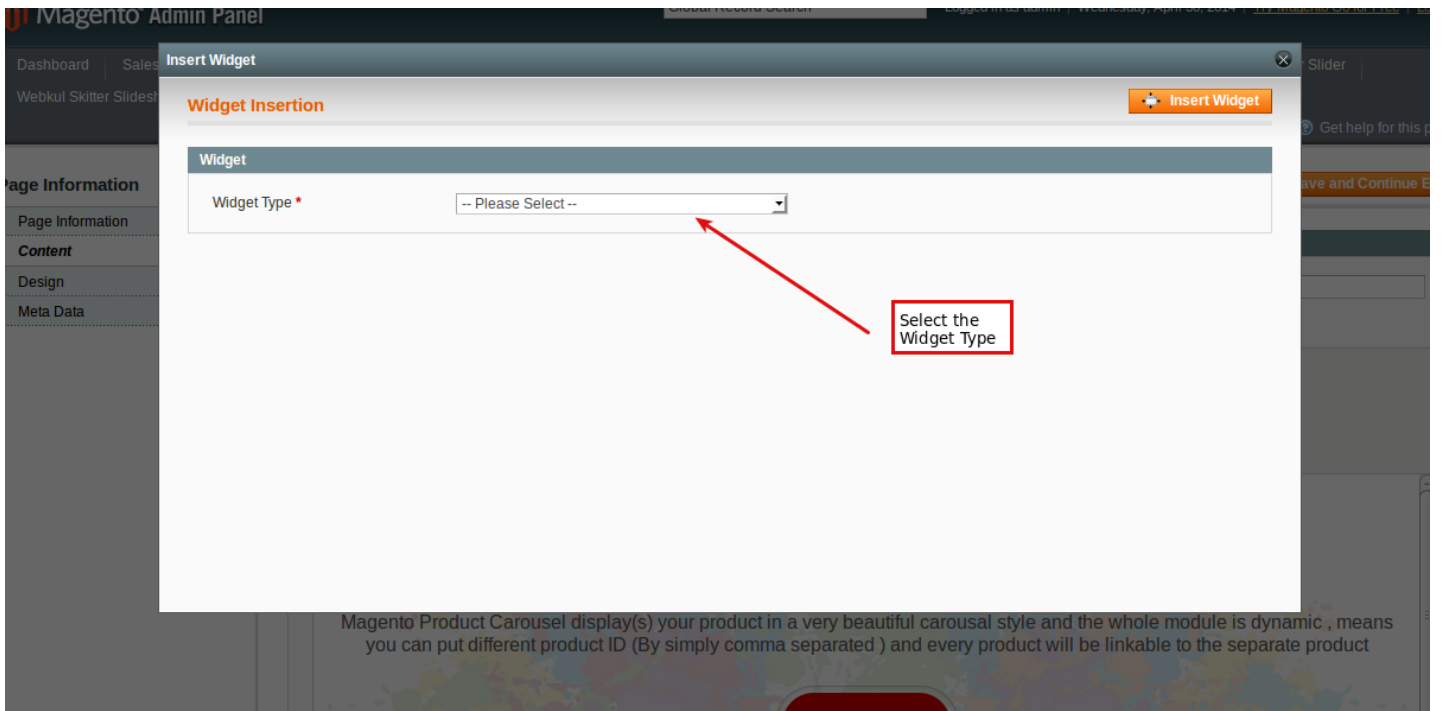

## Configuration

After successful installation of the module you need to go CMS -> Pages -> "Your Page".

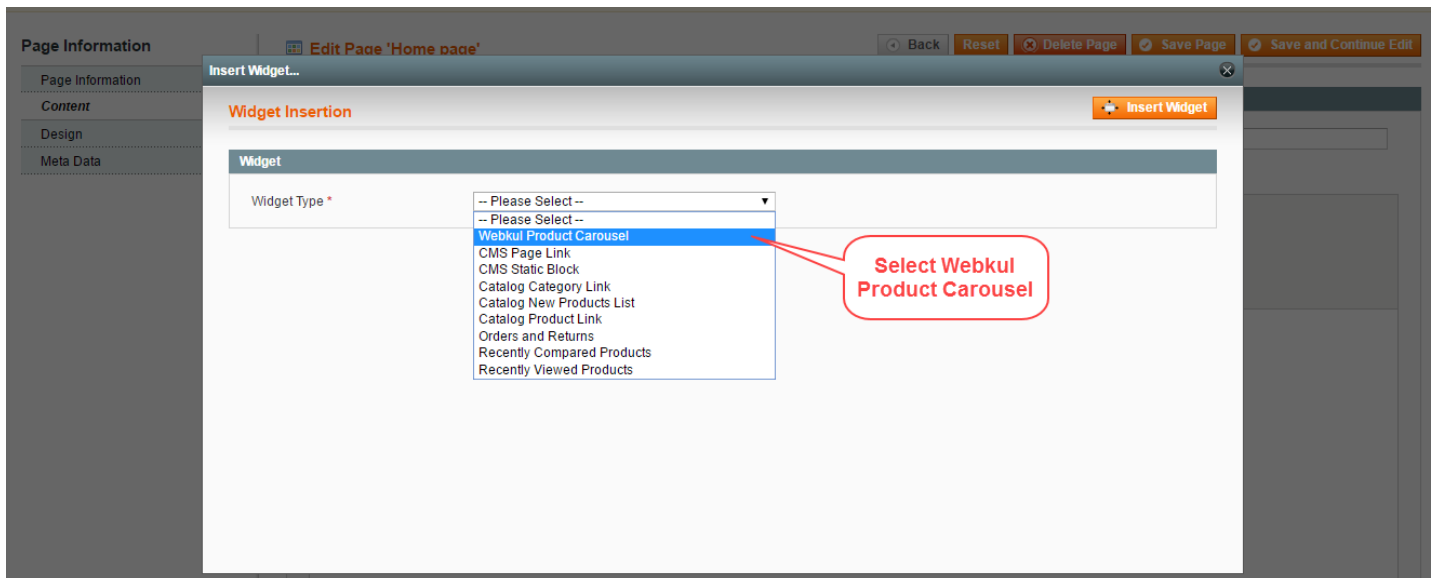

The screenshot shows the Magento CMS page editor interface. On the left, there is a sidebar with 'Page Information' and 'Content' sections. The 'Content' section is expanded, showing 'Page Information', 'Content', 'Design', and 'Meta Data'. A red arrow points from a box labeled 'click on Insert Widget' to the 'Insert Widget' icon in the content toolbar. The main content area shows a 'Content Heading' field and a 'Show / Hide Editor' button. Below the toolbar, the text 'Magento Product Carousel' is displayed, followed by a description: 'Magento Product Carousel display(s) your product in a very beautiful carousel style and the whole module is dynamic , means you can put different product ID (By simply comma separated ) and every product will be linkable to the separate product'.

Here you need to select Insert Widget option.

Select the widget type.

Select **Webkul Product Carousel** and fill all the required details.
