

Age Verification v3.0.0

Age verification, is a must needed module for the store owner who wants to sell the products to a particular age group of the customers.

With the help of this module, the admin can restrict the users to access the store from the store category, cms pages, and the product page. Then a pop-up will show to the user to confirm the age.

Now, the users can confirm the age by providing the date of birth then access the restricted page easily.

features

- Upload custom image for the pop-up
- The admin can manage the pop-up content setting
- Select methods to verify users age – checkbox, date of birth, yes/no
- The admin can enter the custom text for Enter and Leave buttons
- The admin can set the Leave button URL
- Set where to apply the module – products, categories, or cms pages
- Customizable design – width, button color, background color, text color

Module Configuration

The admin can configure the module from the back-end easily. To configure the module, the admin can navigate to **Stores> Configuration> Age Verification**

Note: For configuring the entire module, the admin needs to select Default Configuration by using Store View.

Store View: Default Config [?] Save Config

General Settings

- Age Verification
- GENERAL
