

Business Directory

 webkul.com/blog/magento-2-business-directory/

9/13/2017

Magento 2 Business Directory will add directory feature to your Magento 2 store. The users will be able to add the directories, as well as they will be able to search and filter the directories using the standard searches like alphabetical search, extended search, and keyword search. The user can add the directories with various attributes like categories, maps, and locations with search engine friendly URL. This module will enhance your eCommerce store with a business directory.

Features

- Very Suitable for your vertical industry.
- The admin can select the root category for the business directory.
- Subcategories for the business directory's root category can be created by the admin.
- Auto approval of directories can be enabled or disabled by the admin.
- Reports and claims of the directories can be seen by the admin.
- The admin can enable/disable/delete directories created by users.
- Reasons for reporting a directory can be added by the admin.
- The admin can enable/disable/edit/delete reasons.
- The registered user can create directories with multiple attributes like categories, location, website title etc.
- The user can easily reach to any directory by multiple search options like alphabetical search, advanced search, extended search and a general search.
- Claim and report on the directories can be made by the users.
- The user can contact the directory owner.

Admin configuration

After the complete installation of Magento 2 Business Directory module, the admin will configure the module by navigating through **Store -> Settings -> Configuration -> Webkul -> Business Directory**.

Configuration

Store View: Default Config

WEBKUL

Business Directory

General Settings

Select Root Category [store view]: Business Directory

Automatically directory approve [store view]: Yes

Admin Email-id [store view]: test@webkul.com

Google Map Api Key [global]: A...

Save Config

Save button for admin configuration

The admin can select the root category for the Business Directory. The module auto creates a root directory named as "Business Directory", which has to be selected.

The admin can activate or deactivate auto-approval for the directories created by the users.

Provide Admin's Email-Id

Provide the google map API to use the google maps while creating directories.

Copyright © 2017 Magento, Inc. All rights reserved. Magento ver. 2.1.8

- **Select Root Category:** The admin will select root directory for the Business Directories. The root category named as **"Business Directory"** is selected for root category of Business Directories.
- **Automatically directory approve:** Auto approval of the user created directories from the admin side can be enabled or disabled by the admin. **"Yes"** for enabling and **"No"** for disabling the auto approval.
- **Admin Email-id:** Here the admin will enter the email id used for this module's email transaction including the admin.
- **Google Map Api Key:** Here the admin will provide the API key of the google map. It will allow users to use google maps while creating their directories for the location purpose.

Please Note: The admin email id is used to send email to the admin when a user creates/claim/report a directory. The vice versa process is done for approval of directory from the admin.

Adding Subcategories

The admin can create subcategories under the root category of Business Directory. The subcategories of the root categories can be added by navigating through **Products -> Categories -> Business Directory -> Add Subcategory**.

After clicking “**Add Subcategory**”, the admin will be redirected to the subcategory setting page. The admin can add new subcategory by doing the following essential settings :

WYSIWYG Editor

Add CMS Block
[store view]

Please select a static block. ▾

Design ✎

Use Parent Category Settings

Theme [store view] Business Directory

Layout [store view] No layout updates

Layout Update XML [store view]

Apply Design to Products

Schedule Design Update

The admin will set the Business directory as the theme for subcategory if parent category setting is not selected

this can be selected for inheriting parent category display settings.

- **Enable Category:** The admin can enable or disable the subcategory.
- **Include in Menu:** Enable or disable can be done for including menu in a subcategory.
- **Category Name:** The admin can set name for the subcategory.
- **Category Image:** Here the admin can set image for the category.
- **Description:** Subcategory description can be added from this field.
- **Display Mode:** The admin can set the display mode for the subcategory.
- **Anchor:** Here admin can make the subcategory eligible for the anchor.
- **Products in Category:** In this section, the directory can be added to the subcategory via directory check box or mass selection checkbox for selecting all products at once.
- **Use Parent Category Setting:** The admin has to select this check box for inheriting root category display setting or the “Business Directory” theme in the Theme filed.
- **Theme:** If the “Use Parent Category Setting” checkbox is not selected then the theme has to set to “Business Directory”.

Please Note: Selecting the “Use Parent Category Setting” or the Theme as “Business Directory” is

necessary to view the directory in the proper manner. If these settings are not made then the directories will appear as normal products on the front view for the users.

User directory management

Add Directory

After all the above admin configuration and settings, the registered user can add a directory. To add the directory the user will navigate through **Login(The user will first login) -> Add Directory**.

User End

After all the above configuration setting and directory addition, any user can view the directory under Directory Category. Any logged in or a guest user can navigate to the directories by clicking on the “**Business Directory**”.

The screenshot shows the LUMA Business Directory interface. At the top right, there are links for "Sign In" and "Create an Account". The main navigation bar includes "What's New", "Women", "Men", "Gear", "Training", "Sale", and "Business Directory". A search bar is located at the top right with the placeholder text "Search entire store here...".

The "Business Directory" page features a "Business Directory category" label, a "Home > Business Directory" breadcrumb, and a large "Business Directory" title. A blue hexagonal badge on the left says "EDITORS PICS".

Key features and callouts include:

- "The user can create new directory via 'Create New Entry'. If the user is not logged in or not registered then Sign in and Log in page will be opened."
- "The user can filter the search by categories."
- "The user can search a directory by its keywords after the category filter has been applied else the search will be made for all categories."
- "Alphabetical and Numeric Search is used to search a directory by its starting alphabet or numeric digit."
- "Subcategories under root category"
- "Number of directories Enabled to view by the admin"
- "Subcategories under the selected subcategory 'Computers and Hardware'."
- "The below short description view can be filtered by 'Category' filter."
- "Click to open the directory full view"
- "Short Description View of the selected categories from the 'Category' drop down filter."
- "Company Logo"

The main content area displays a "Business Directory" section with a "Create New Entry" button and an alphabetical search bar (A-Z, 0-9). Below this, there are category cards for "Computers and Internet" (2 POSTS), "Games" (1 POSTS), "Health & Care" (2 POSTS), and "Education" (2 POSTS). A "CATEGORY" dropdown menu is visible. The "Computers and Internet" card shows subcategories like "Software, Hardware".

Below the category cards, there are directory listings:

- Rama Institute of Engg. & Technology**
- Sanjivini**
- Braj public Inter college**

 Each listing includes a short description and a "Company Logo" placeholder.

- **Create New Entry:** The user can create a new directory by clicking this button. The user will be redirected to Add Directory page. If the user is not logged in or registered then, the user will be redirected to sign up/login page.
- **Keyword Search by category filter:** Directory can be searched via category search filter. The user can choose a category and search the directory by entering a keyword.
- **Alphabetical and Numeric Search:** The user can search a directory by selecting its first starting alphabet or numeric digit.
- **Advance Search:** The user can search by keywords of directories with much-advanced options like:

Advance Search

1. Searching keywords by entries that have **“All Words”**: All the words of the given keyword will be used together to search the directory by name. For example- If the keyword is “Human rights” then the whole keyword “Human rights” together will be used for searching a directory by name.
 2. Searching keywords by entries that have **“Any Words”**: All the word of the given keyword will be used independently to search the directory by name. For example- If the keyword is “Human rights” then “Human” and “rights” both will be independently used for searching a directory by name.
 3. Searching keywords by entries that have **“Exact Words”**: All the word of the given keyword will be used exactly word by word to search the directory by name. For example- If the keyword is “Human rights” then exact word by word keyword will be used for searching.
- **Extended Search:** The advance search can be extended for better search options including searching by location, category, and country.

The screenshot shows a search interface for a Business Directory. At the top, there is a navigation bar with 'Business Directory' and a '+ Create New Entry' button. On the right, there is a 'Q Advance Search' button. Below this is a horizontal menu of letters A through Z and 0-9. The main search area includes a 'Search Keywords' input field with the placeholder 'Enter keyword', a green 'Start Search' button, and an 'Extended Search' button. Below the search input, there are three buttons: 'All Words', 'Any Words', and 'Exact Words'. A 'Find entries that have' section contains a 'Category' dropdown menu currently set to 'Business Directory', a 'City' input field, and a 'Country' dropdown menu set to 'Select Country'. Red callout boxes with arrows point to the 'Extended Search' button (labeled 'Extended search of advance search option'), the 'Category' dropdown (labeled 'Search by category'), the 'City' input field (labeled 'Search by city of the company'), and the 'Country' dropdown (labeled 'Search by country of the company').

- Just below the business directory description, all the subcategories of the root category is displayed with their subcategories. **Posts** count shows the count of the directories enabled by admin under a subcategory of the root category.
- **Short Description View** of the directories is provided with **Category** filter drop-down.
