

Installation Guide - Fastway Shipping V5.0.1

Installation

The admin will get a **zip folder** and they have to extract the contents of this zip folder on their system.

The extracted folder has an **src** folder, inside the src folder you have the **app** folder.

Thus, the admin needs to transfer this **app** folder into the Magento2 root directory on the server as shown below:

Now, after the successful installation, they admin have to **run below-mentioned commands** in the **Magento2** root directory:

First command – `php bin/magento setup:upgrade`

Second Command – `php bin/magento setup:di:compile`

Third Command – `php bin/magento setup:static-content:deploy`

Thus, after running the commands, the admin have to flush the cache from Magento admin panel by navigating through->**System->Cache management** as shown below:
