

Seller Auction Marketplace Add-On v3.0.2

Seller Auction Marketplace Add-On will allow marketplace sellers to set auction on their products and the buyer can bid on the product. Marketplace sellers can also update and delete the auction. Admin can set Automatic, Reserve, Incremental Auction for seller's product.

Note: This extension is an add-on to Webkul's Multi Vendor Marketplace module. To make use of this extension you must have first installed the [Webkul's Multi Vendor Marketplace](#).

****Note:** Seller Auction Marketplace Add-On will work with **Simple, Downloadable** and **Virtual** type products only.

Features

- This module allows the auction feature for marketplace seller's product.
- Incremental, Automatic and Reserve Auction Option set by the admin.
- Sellers can also enable or disable the different auction options for their products that have been allowed by the admin.
- Admin can enable or disable Email notification option to Admin, seller, outbid buyer.
- If user bid will be outbid then the user will notify automatically.
- Winners will be notified by email via Admin.
- Date time picker for date and time selection.
- Edit and delete feature for product auction.
- Multi-Lingual support / All language working including RTL.
- Compatible with Multi-Store.

Admin Configuration

After the successful installation of the module, you can configure it by navigating through **Stores-> Configuration ->Marketplace Auction**.

Standard Auction ↻

Enable [global]

Show Current Bid Price [global]

Show Bidder Name [global]

Show Bid Price [global]

Show Auction details [global]

Show Winner Message [store view]

Auction Rule [global]

Here the admin can enable or disable the standard auction. Admin can set the other settings for the standard auction give below.

Show Current Bid Price

You can set "Yes" to show the current bid price on the auction product at front end else select "No".

Show Bidder Name

Select "Yes" if you want to show bidder name on Bid Report at the front end. Else select "No".

Show Auction Price

Using this field, the buyer can see auction price at the front end. If you will select "No" then you will unable to see Auction price at the front end.

Show Auction Details

Using this field, buyers can see auction details at frontend. Like Bidder Name, Current bid price. If you will select "No" then the buyer will be unable to see Auction Details.

Show Winner Message

In this field, admin can enter the winning message which will be displayed if any bidder has won the bid.

Auction Rule

Admin can enter the Auction rule under this field. It displays at bid report page.

2/19

Increment Auction Option

In the case of Increment Auction, a bid will be raised each time. It is predetermined based on the current high bid. In incremental auction, if any bidder placed a bid, then the current price will increase with incremental price. Like if you are the first bidder and place a bid of \$30. Then current bid becomes \$40 (\$30 + \$10 incremental price). No one can place a bid less than \$40. Let's explain this using an example.

About Increment Auction

The Increment bid is the amount by which a bid will be incremented each time the current bid is outdone. Increment bid amount setting will be done by admin and seller.

Set increment bid as-

Current High Bid	Increment
\$0.01 – \$99.99	\$10
\$100.00 – \$199.99	\$15
\$200.00 – \$599.99	\$20
\$600.00 – \$999.999	\$50
\$1000 – \$10000	\$200

Example

You're the first bidder on a listing where the starting price is \$20 and you place a maximum bid of \$40. Now the current bid will be automatically incremented by \$10 and then the current bid is \$50. No one can place a bid less than \$50. When a second bidder places a maximum bid of \$110, your bid will automatically be raised to \$15 and then the current bid is \$125.

Increment Auction Option

Enable Incremental Auction [global]

You need to set the Incremental Price Range beforehand to Enable it.

Enable Incremental Auction

Here you will enable the incremental auction.

Set Incremental Price Range

Here you will add the Incremental price range for the auction.

From	To	Increment	
0.01	99.99	10	Delete
100	199.99	15	Delete
200	299.99	20	Delete

Click to add Incremental Price

Add Option Save

Here you can see that how increments are determined. After click on Fill Incremental Price, you can enter a current high bid.

Let's discuss Incremental Price with an example.

You're the first bidder on a listing where the starting price is \$20 and you place a maximum bid of \$40. Then current bid becomes \$50 (\$40+ \$10). No one can place a bid less than \$50. If the second bidder places a bid of \$100 then the current bid becomes \$115. Incremental price is used to remove the penny bids.

Automatic Auction Option

Admin can also enable or disable the Automatic Auction option with automatic bidder details, price, bidders, outbid messages. Let's explain Automatic Auction using an example and winning cases.

About Automatic Auction

1. When you(buyer) place an automatic bid with the maximum amount that you want to pay for the product.
2. The other bidders don't know about other's bidder automatic bid if disabled by admin.
3. The other bidders place bids on based on the current high bid. The bid will be placed until the bid meets the reserve price or until it expires.
5. If another bidder places the same maximum automatic bid or higher, then you will be notified by mail, so that you can place another bid.
6. If Your maximum bid is not exceeded by another automatic bidder or current bid, then you will win the bid at the current bid.

Example-

1. When buyer-A place an automatic bid with the maximum amount \$100 that you want to pay for the product-X (reserve price-\$60 and current bid price-\$10).

- The other bidders don't know about other's bidder automatic bid if disabled by admin.
- The other bidder B place bids of amount \$12 on based on the current high bid. The bid will be placed until the bid meets the reserve price or until it expires. now if many bidders placed the bid and now the current bid amount is \$62.

Now winning case for bidder

Case A

If at this position bid expires then buyer A will win the bid at \$62 amount because he placed the highest amount bid and no one exceeded this amount.

Case B

If another buyer C places the maximum amount \$110 as automatic bid, then buyer A will be notified by mail, so that he can place another bid and if buyer A doesn't place any maximum bid then buyer C will win the bid at a cost \$62.

Case C

If another buyer D places maximum amount \$115 as normal bid then buyer C will be exceeded by current bid and he will be notified and if buyer C doesn't place any maximum bid then buyer D will win the bid at the cost \$115.

Automatic Auction Option ⌵

Enable Automatic Auction <small>[store view]</small>	<input type="text" value="Yes"/>
Customers can change autobid price for multiple times <small>[global]</small>	<input type="text" value="Yes"/>
Use Incremental Price <small>[global]</small>	<input type="text" value="Yes"/>
Show Automatic Price <small>[global]</small>	<input type="text" value="Yes"/>
Show Automatic Bidders Name <small>[global]</small>	<input type="text" value="Yes"/>
Show Automatic Bidder Details <small>[global]</small>	<input type="text" value="Yes"/>
Show Outbid Message <small>[global]</small>	<input type="text" value="Yes"/>
Outbid Message <small>[store view]</small>	<input style="width: 100%; height: 50px;" type="text" value="You are outbid!!!"/>

Enable Automatic Option

Using Enable Automatic Auction field, you can enable/disable the Automatic auction. It is used for buyer reliability.

Customers Can Change Autobid Price For Multiple Times

Select "Yes" if you want that customer can change the autobid price for multiple time.

Use Incremental Price

Select "yes" if you want to use incremental price in the Automatic auction. Else select "No".

Show Automatic Price

By using this field, buyers can see the automatic price at frontend. Otherwise, buyers can not see the automatic price.

Show Automatic Bidders Name

Select yes to show auto bidder's name at the front end.

Show Automatic Bidder Details

If "Show automatic bidder details" is enabled then buyers can see automatic bidder details at frontend. Like Bidder name, bid amount, winner status etc.

Show Outbid Message

You can see outbid message only If this field is enabled. Otherwise, you will unable to see outbid message. Like if someone placed an autobid of \$50 and another one places an autobid of \$40 then the autobid of the second person will be saved, but unable to see outbid message.

Outbid Message

In this field, you can enter the outbid message which will be displayed if your bid becomes outbid.

Reserve Auction and Email Notifications

In a Reserve auction, the seller is only allowed to sell the item once the bid amount meets or exceeds the Reserve Price. In the case of Reserve price, if the bid price of the higher bidder is less than reserve price then no one will win the auction. Admin can set the Global Reserve Price for reserve auction.

Reserve Auction Option

Enable Reserve Price [global]

Enable Reserve Price

If Reserve Auction is enabled then Seller will be allowed to win for the item once the bid amount meets or exceeds the Reserve Price.

Email Notification Option

Email Notification to Admin <small>[global]</small>	Yes	▼
Admin notification email template <small>[global]</small>	Notify to admin on new bid (Default)	▼

Add Auction

Sellers can add new products for Auction under **Marketplace > Add Auction**. Here the seller can see all of his products and can add auction for them. To add an auction to a product he will click on the **Add Auction** option next to the product as shown below.

The screenshot displays the 'Auction Detail Page' interface. On the left, a sidebar menu includes 'Marketplace Dashboard', 'Seller Profile', 'New Products', 'My Products List', 'My Transaction List', 'Manage Print PDF Header Info', 'Auction' (highlighted with a red box), and 'My Order History'. Below this, another section contains 'Account Dashboard', 'Account Information', 'Address Book', 'My Downloadable Products', 'My Orders', 'Newsletter Subscriptions', and 'My Credit Cards'. The main content area is titled 'Auction Detail Page' and 'My Product List For Auction'. It features a search bar with the placeholder 'Search by product name' and a 'Submit' button. A callout bubble points to the search bar with the text 'Search the Product By Name To Add Auction To It.'. Below the search bar is a table with two columns: 'Product' and 'Action'. The table lists three items: 'White running shoes' (\$28.00), 'Prada Running Sole' (\$1,999.99), and 'Nikon camera' (\$199.99). Each item has an 'Add Auction' button next to it. A callout bubble points to the 'Add Auction' button for the 'Prada Running Sole' with the text 'Click Here To Add Auction To Product.'. At the bottom of the table, it says '3 Item(s)' and a '< Back' link.

Product	Action
 White running shoes \$28.00	Add Auction
 Prada Running Sole \$1,999.99	Add Auction
 Nikon camera \$199.99	Add Auction

After clicking on the **Add Auction** button above below page will open up.
