

# Installation Marketplace Correios Shipping

Customers will get a **zip folder** and they have to **extract the contents** of this zip folder on their system.

The extracted folder has an **src** folder, inside the **src** folder you have the **app** folder. You need to **transfer this app folder** into the **Magento 2 root directory** on the server as shown below.

After the successful installation, you have to run these commands in the Magento2 root directory.

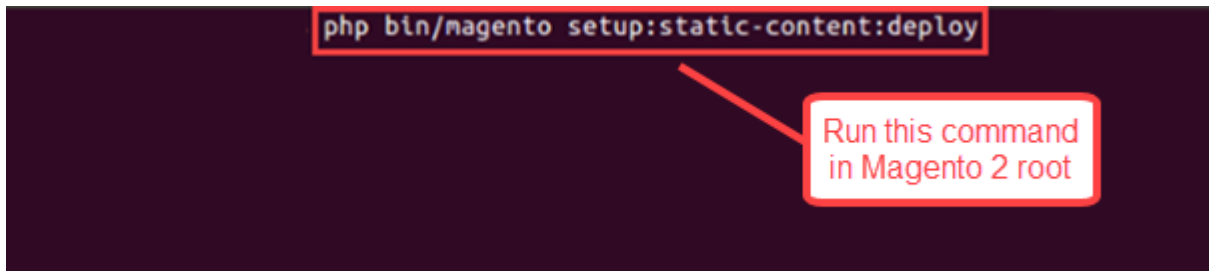

## First command- `php bin/magento setup:upgrade`

## Second Command – `php bin/magento setup:di:compile`

## Third Command – `php bin/magento setup:static-content:deploy`

Subsequently, after running the commands, you have to **flush** the cache from the **Magento admin panel** by navigating through ->**System->Cache management** as shown below in the snapshot.

The screenshot shows the 'Cache Management' page in the Magento admin panel. At the top right, there is a 'System Messages' section with a warning icon and the number '1'. Below this, the page title 'Cache Management' is displayed. On the right side, there are search, notification, and user profile icons. Two buttons are visible: 'Flush Cache Storage' (highlighted with a red box) and 'Flush Magento Cache'. A callout bubble points to the 'Flush Cache Storage' button with the text 'Click here to flush the Cache Storage.'. Below the buttons, a yellow message box contains a green checkmark and the text 'You flushed the cache storage.'. At the bottom, there is a 'Refresh' dropdown, a 'Submit' button, and the text '12 records found'. A table with the following columns is shown: Cache Type, Description, Tags, and Status. The table contains five rows of cache types, all with a status of 'ENABLED'.

Cache Type	Description	Tags	Status
<input type="checkbox"/> Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> Reflection Data	API interfaces reflection data.	REFLECTION	ENABLED
