

Daily Deal Marketplace Add-On V5.0.0

Installation

Customers will get a zip folder and they have to extract the contents of this zip folder on their system. The extracted folder has an **src** folder, inside the src folder you have the **app** folder. You need to transfer this **app** folder into the Magento2 root directory on the server as shown below.

After the successful installation, you have to **run these commands** in the **Magento2 root** directory:

First command – `php bin/magento setup:upgrade`

Second Command – `php bin/magento setup:di:compile`

Third Command – php bin/magento setup:static-content:deploy

After running the commands, you have to flush the cache from Magento admin panel by navigating through->**System->Cache management** as shown below.

Cache Management

Flush Cache Storage Flush Magento Cache

✓ You flushed the cache storage.

Refresh Submit 12 records found

Cache Type	Description	Tags	Status
<input type="checkbox"/> Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> Reflection Data	API interfaces reflection data.	REFLECTION	ENABLED

Multi-Lingual Support Configuration

For the **multilingual** support, the admin will navigate through **Store->Configuration->General ->Locale Options** and select the **locale** as German (the language into which

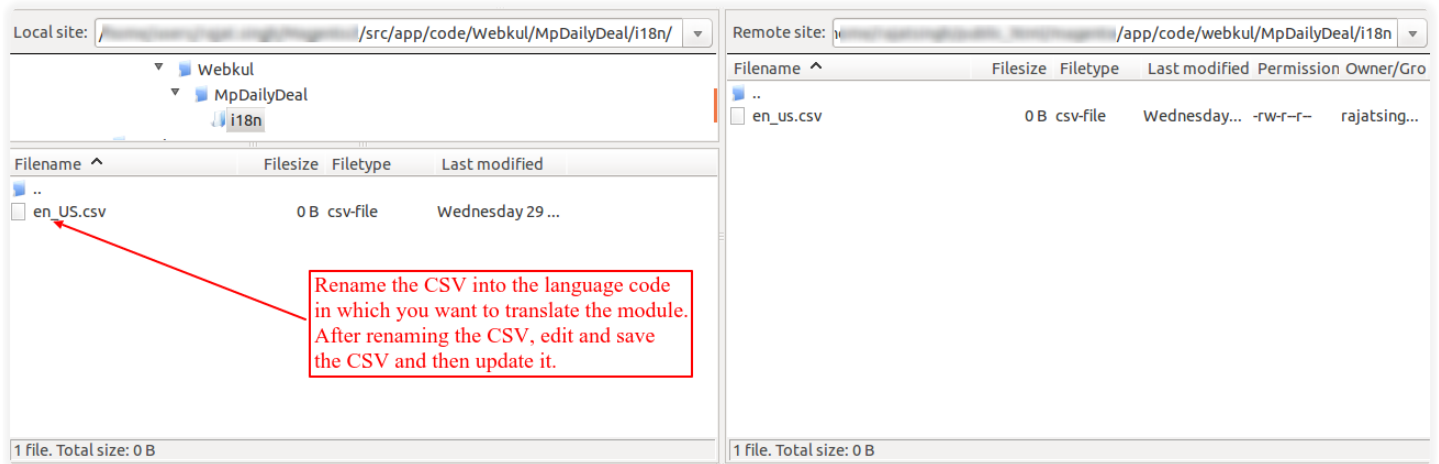

admin want to translate his store content).

The screenshot shows the Magento 2 Configuration interface. The left sidebar is on the 'GENERAL' section, with 'General' highlighted. The main content area shows 'Locale Options' with the 'Locale' dropdown set to 'German (Germany)'. A red box highlights the 'Locale' dropdown, and a red speech bubble points to it with the text: 'Here store selected locale option is German, move CSV file inside magento>app>locale>de_DE'. Other options like 'Timezone', 'Weight Unit', and 'First Day of Week' are also visible.

Language Translation

If the user wants to translate their module from English to German then they need to follow the path **app/code/Webkul/MpDailyDeal/i18n** in their unzipped Magento Marketplace folder and will get a CSV file with name “en_US.csv”. Now they will rename that CSV as “de_DE.csv” and translate all right side content after the comma in the German language. After editing the CSV, save it and then upload it to the path **app/code/Webkul/MpDailyDeal/i18n** where they have installed Magento2 on their server. The module will get translated in the German Language. It supports both

the **LTR** and **RTL** languages.

How To Enable The Module Via Terminal?

For enabling the module via terminal, the admin needs to run the following commands:

First Command –

```
php bin/magento module:enable Webkul_MpDailyDeal
```

Second Command –

```
php bin/magento setup:upgrade
```

Third Command –

```
php bin/magento setup:di:compile
```

Forth Command –

```
php bin/magento setup:static-content:deploy
```

How To Disable The Module?

If the admin wants to disable the module completely, then they need to run the following command through terminal:

First Command –

```
php bin/magento mpdailydeal:disable
```

Second Command –

```
php bin/magento setup:di:compile
```

Third Command –

```
php bin/magento setup:static-content:deploy
```
