

EasyPost Shipping Marketplace Add-On v3.0.1

EasyPost allows businesses to integrate tracking statuses, address verification, rating, and more from DHL Global Mail, FedEx, UPS, USPS, and other regional carriers into their site or application and now we have integrated it and created the EasyPost Marketplace Shipping.

EasyPost works as a mediator wherein you can save your various carrier-specific credentials with them and you get a key that you can set up in the admin back-end. Now, whenever you ship your products the shipping cost is automatically calculated according to the selected shipping method by the customers.

Please Note:

- This is a marketplace add-on, so must purchase and install **Webkul Multi Vendor Marketplace** first.
- You need to have an EasyPost account to use this extension, please **click here to signup on EasyPost**

Features

- The admin can enable or disable the Marketplace EasyPost Shipping method.
- Admin can set the Marketplace EasyPost shipping title name that will be shown from front-end.
- The admin can allow sellers to save his/her EasyPost Credentials.
- EasyPost shipping rate will be calculated from seller's address.

Admin's Configuration

After the successful installation of the extension, the admin will navigate to **Stores > Configuration > Sales > Shipping Methods > Webkul Marketplace EasyPost Shipping**.

Webkul Marketplace EasyPost Shipping

Enabled for Checkout <small>[website]</small>	Yes
Title <small>[store view]</small>	Webkul EasyPost Shipping
API Key <small>[website]</small> Get your easypost credentials
Weight Unit <small>[store view]</small>	LBS
Allow Sellers to Save EasyPost Details <small>[website]</small>	Yes
Show Method if Not Applicable <small>[website]</small>	Yes
Display custom error message <small>[website]</small>	Yes
Displayed Error Message <small>[store view]</small>	This shipping method is currently unavailable. If you would like to ship using this shipping method, please contact us.
Length <small>[website]</small>	20.2 use for domestic shipping (in inches)
Width <small>[website]</small>	10.9 use for domestic shipping (in inches)
Height <small>[website]</small>	5 use for domestic shipping (in inches)

To **configure** the extension, the **admin** will –

- Select “**Yes**” to enable the extension for use else selects “**No**” to disable the extension.
- Then select “**Yes**” to select the Sandbox mode(Test mode) else select “**No**” to use the Production mode.
- Enter the **Shipping Title** that is visible to the customers at the front-end.
- After that, enter the **API key** for the Admin’s EasyPost account. You can also get the API Key directly by clicking on the [Get your Easypost credential](#) link from configuration itself.
- Select the weight unit as “**Lbs**” or “**Kilograms**” as per the requirement.
- Under “**Allow Sellers to Save EasyPost Details**” set “**Yes**” to allow the sellers to save their EasyPost Shipping credentials under their account panel else select “**No**”.
- Enter the **Error Message** that will be displayed if “**Show Method If Not Applicable**” is selected as “**Yes**”.

- Select “**Yes**” for “**Show Method If Not Applicable**” to show the error message if the method is not available.
- Choose “**Yes**” to generate the debug log in the system backend else select “**No**” to not generate a debug log.
- Set the **length**, **width**, and **height** of the package.

Seller’s Configuration

Moreover, in order to use this shipping method, the seller need to enter his origin address under the **Marketplace Dashboard > Shipping Setting** where he enter the details and then save it.

The screenshot displays the 'Origin Address' configuration page. On the left is a sidebar menu with the following items: Marketplace Dashboard, Seller Profile, Create Attribute, New Products, My Products List, My Transaction List, Earnings, Manage Print PDF Header Info, **Shipping Setting** (highlighted), Manage EasyPost Shipping, My Order History, Customers, Review, My Account, My Orders, My Downloadable Products, My Wish List, Address Book, Account Information, Stored Payment Methods, My Product Reviews, and Newsletter Subscriptions. The main content area is titled 'Origin Address' and contains a 'Shipping Origin Address' form. The form includes the following fields: Company (text input with 'Incc.'), Phone Number (text input with '123456789'), Street Address (text input with '1st street'), City (text input with 'Los Angeles'), State/Province (dropdown menu with 'California'), Zip/Postal Code (text input with '90017'), and Country (dropdown menu with 'United States'). A blue 'Save' button is located in the top right corner of the form area.

If the admin has set “**Allow Sellers to Save EasyPost Details**” as “**Yes**” in the extension configuration settings, then the sellers will find a new menu option under their marketplace block – “**Manage EasyPost Shipping**”.

Here, the seller needs to enter his **EasyPost** account related **API Key**. After entering the **key** tap the **save** button to save the configuration.

If admin sets the “**Allow Seller to Manage Order**” option “**yes**” then the seller can manage the orders from front-end. Now the seller can generate invoices for their ordered products, generate the tracking number and shipment for the orders of their products.

Even the seller can notify the customers by sending them emails, cancel/refund the order and even print the order.
