

## Free Shipping Marketplace Add-On

---

### Installation Of Marketplace Free Shipping

Customers will get a zip folder then they have to extract the contents of the zip folders on their system.

The extracted folder has an **src** folder inside it. Inside the src folder, you will find the **app** folder. You need to transfer this **app** folder into the **Magento2 root directory** on the server as shown below.

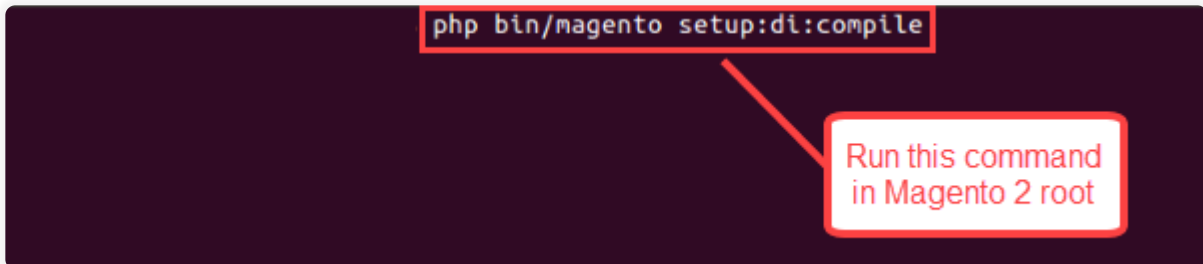

After the successful installation, you have to **run these commands** in the **Magento2 root directory**:

**First command** – php bin/magento setup:upgrade

**Second Command** – php bin/magento setup:di:compile

**Third Command** – php bin/magento setup:static-content:deploy

After running the commands, you have to flush the cache from Magento admin panel by navigating through->**System**->**Cache management** as shown below.

## Cache Management

Search, Notifications, User: admin

Flush Cache Storage

Flush Magento Cache

Refresh

Submit

12 records found (12 selected)

Select all.

Flush cache.

<input checked="" type="checkbox"/>	Cache Type	Description	Tags	Status
<input checked="" type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	DISABLED
<input checked="" type="checkbox"/>	Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	DISABLED

Country Options

State Options

Locale Options

Timezone: GMT (UTC) [WEBSITE]

Locale: German (Germany) [STORE VIEW]

Weight Unit: lbs [STORE VIEW]

First Day of Week: Sunday [STORE VIEW]

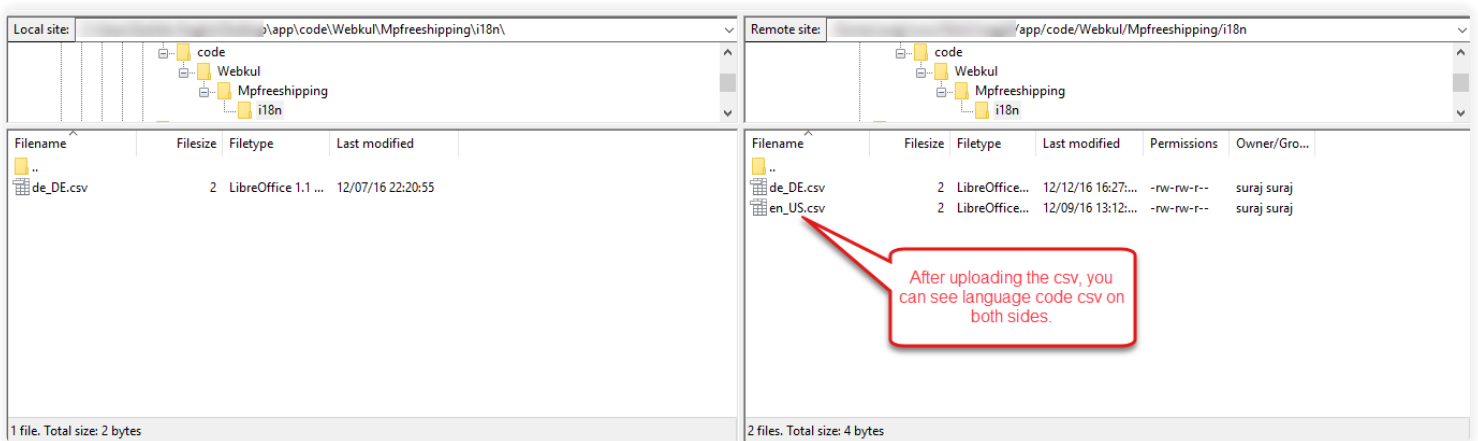

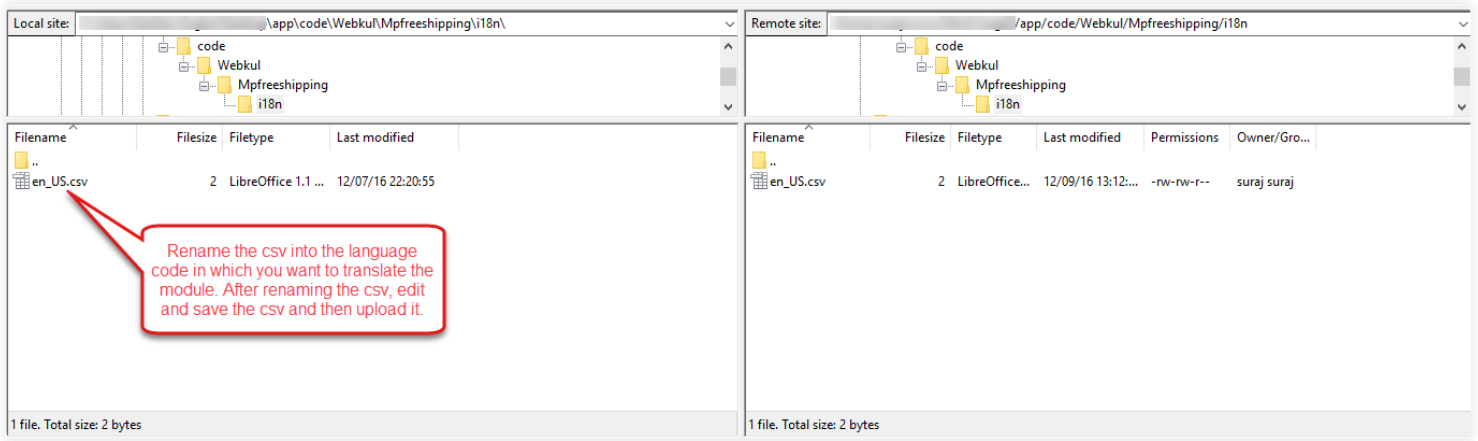

Weekend Days: Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday [STORE VIEW]

Here store selected locale option is German, move CSV file inside magento>app>locale>de\_DE

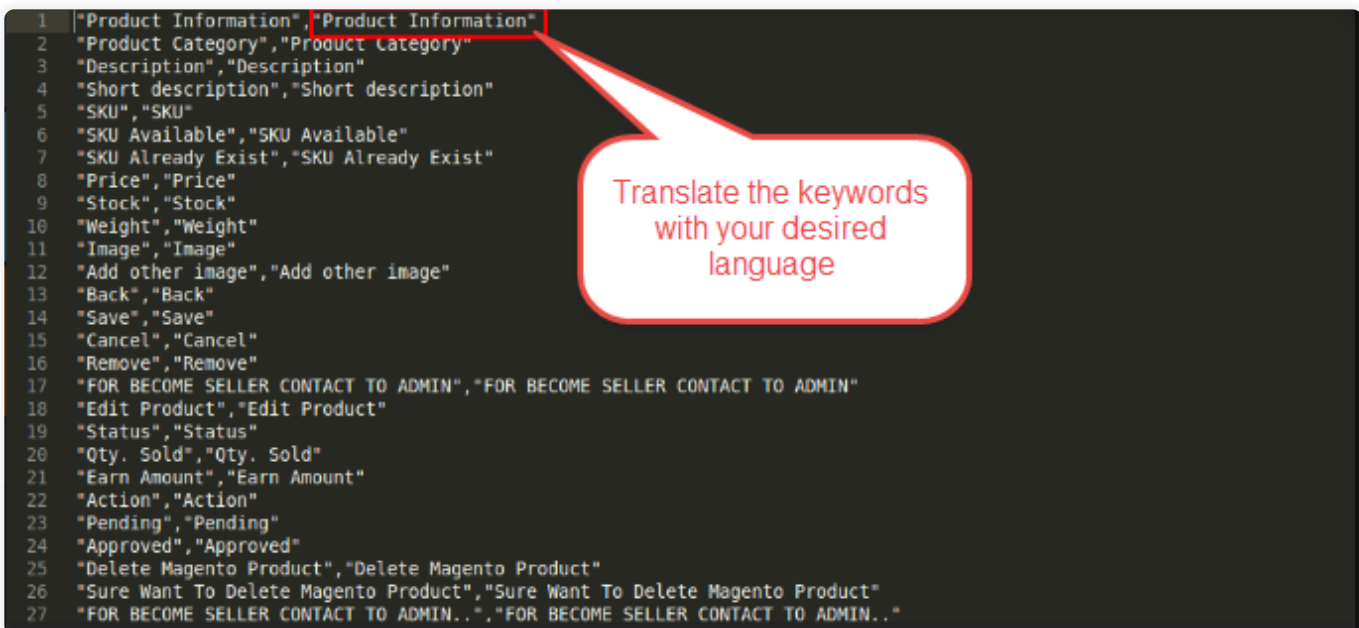

## Marketplace Free Shipping Translation

If a user wants to translate their module from English to German then they need to follow the path **app/code/Webkul/Mpfreeshipping/i18n** in their unzipped folder and will get a CSV file with name “en\_US.csv”. Now they will rename that CSV as “de\_DE.csv” and translate all right side content after the comma in the German language.

After editing the CSV, save it and then upload it to the path **app/code/Webkul/Mpfreeshipping/i18n** where they have installed Magento2 on the server. The module will get translated into the German Language. It supports both **RTL** and **LTR** languages.

The user can edit the CSV like the image below.

That's all for still, have any issue feel free to add a ticket and let us know your views to make the module better <https://webkul.uvdesk.com/>
