Seller Slider Marketplace Add-On

March 18, 2016

Seller Slider Marketplace Add-On module is used to create and manage slider in the Marketplace store. The sellers can easily set image slider on their profile page. The seller will first upload images along with their URLs(optional) to the slider and can also set the slider properties.This module helps the sellers to advertise the highlighted features of their store to the buyers.

All uploaded images will look as a slider on the seller's profile page. If any of the images have been uploaded along with the URL by the seller, the buyer will be redirected to the respective image URL by clicking on the image.

This module is an add-on to **Webkul's Marketplace** Module. To use this module you must have installed first **Multi Vendor Marketplace**.

Features

- The seller can upload multiple images for the slider.
- The seller can upload images and save slider settings store view wise.
- The seller can change the slider background color.
- The admin can enable/disable the extension via back-end configuration settings.
- The seller can upload the respective image URL for the slider.
- The seller can edit or update URL of an image from the slider.
- The seller can delete any of the images from the slider.
- The seller can set height and width of the image for the slider.
- The seller can set slider animation speed and slider animation duration for that slider.
- The seller can manage images and slider very easily.
- The seller can upload images and change properties for slider very easily and very fast.
- Buyer can open the image URL from the slider by clicking on the image.

Module Configuration

After the successful installation of the extension, the admin will navigate to **Stores**->**Configuration**->**Webkul**->**Marketplace**->**General Settings**->**Enable Marketplace Seller Slider**. Here, the admin will enable the module for use and click the **save** button to save the configuration setting.

General Settings

Save Config

Seller Dashboard Layout Settings ⌃

Allow seller separate dashboard
[store view]   Yes ▾
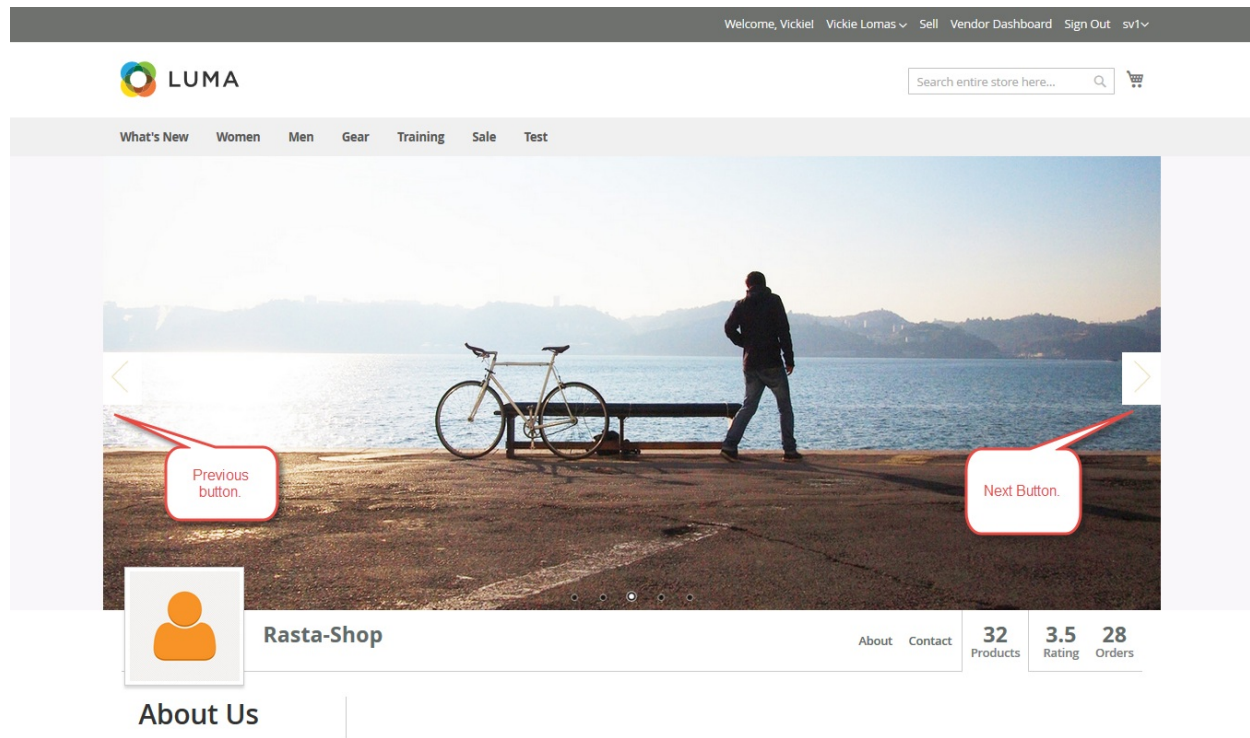

- After this, the seller can have their separate dashboard. To learn more about the Seller Separate Dashboard you can click here.

- The Seller can click on **Manage Slider Images** tab to navigate to the slider settings.

The seller slider can be seen in the seller profile, the display of the slider on seller profile will be according to the setting done in **Manage Seller Slider** by the seller.

By moving the pointer over slider we can see **next and previous buttons** provided for the next and previous image of the slider. By clicking next arrow, it will slide right to left and when you click the previous arrow, it will slide left to right.

If any of the images of the slider is clicked then it**redirects the buyer to the image URL of the respective image**.

That's all for the Seller Slider Marketplace Add-On still have any issue feel free to add a ticket and let us know your views to make the module better at http://webkul.uvdesk.com/.
