

Seller Checkout Marketplace Add-On

webkul.com/blog/marketplace-single-seller-checkout-magento2/

Published On - June 10, 2016

Seller Checkout Marketplace Add-On will help the sellers to restrict the customers from adding more than one seller products at the checkout time. Buyer can add only one seller's product to the cart if the condition is enabled by the admin.

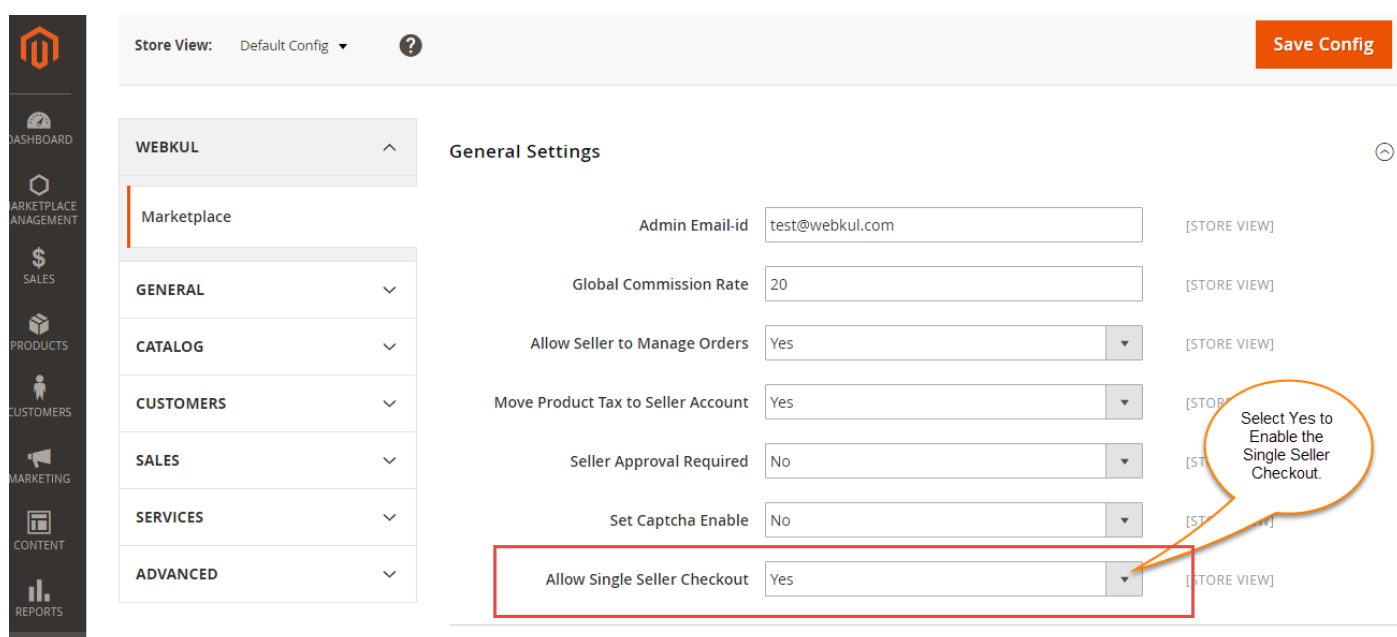

Please Note : – to use this module you must have installed the **Multi-Vendor Marketplace** Module in the first place.

Features

- Allow admin enable/disable single seller checkout option.
- Allow adding only single seller's product in the cart.
- Easy to manage from admin.
- During checkout, only single seller checkout will be validated.

Configuration

After the successful installation of the module, you will need to enable “**Allow Single Seller Checkout**” from admin panel **Store-> Configuration-> Marketplace -> General Settings**.

The screenshot shows the Magento 2 Admin Panel configuration page for the Marketplace module. The 'General Settings' section is visible, showing various configuration options. The 'Allow Single Seller Checkout' option is highlighted with a red box and a callout bubble indicating it should be set to 'Yes'.

Configuration Option	Value	Scope
Admin Email-id	test@webkul.com	[STORE VIEW]
Global Commission Rate	20	[STORE VIEW]
Allow Seller to Manage Orders	Yes	[STORE VIEW]
Move Product Tax to Seller Account	Yes	[STORE VIEW]
Seller Approval Required	No	[STORE VIEW]
Set Captcha Enable	No	[STORE VIEW]
Allow Single Seller Checkout	Yes	[STORE VIEW]

When a buyer adds the products of the same seller to the cart, then the products that are already in the cart will remain there along with the new products from the same seller and if the buyer adds products of a new seller then those products will not be added to the cart and a notification will appear that says “At a time you can add only single seller's product in the cart” as shown below in the screenshot.
