

Custom Registration Fields

Custom Registration Fields extension will allow the admin to create custom fields for customers. Using this module you can extend your customer sign up form. As default custom registration form is not extendable, Custom registration fields extension is the perfect choice for the store owners to extend custom fields for sign up form.

Features

- Admin can easily extend the sign up form.
- Easy to use from Magento back-end and supported by all html input types.
- Admin can create any type of the input field and insert into the registration form.
- All kind of attribute supported.
- Easy to capture more customer information like Date Of Birth, Hobby etc.
- Custom Field validation for registration form.
- Support all input types including dropdown, dependable field, multi-select and image upload during sign up form.
- Admin can set validation type for all custom registration field. For example valid number, use the number only, avoid spaces, use the valid date, etc.
- Visible on Sales Email.
- Visible on Sale's order and invoice.
- Admin can enter terms & conditions and privacy and cookie policy with customizable view on customer registration page.
- The code is fully open & you can customize it according to your need.
- Fully dynamic module that means you don't need any technical knowledge to extend sign-up form fields.
- Multi Lingual support / All language working including RTL
- Compatible with Multistore.

Configuration

After successful installation of the module, you will see a menu in the admin panel for the custom registration field as per the screenshot.

Admin can make this field mandatory

As per the above screenshot, you can see many parameters for the custom registration field, Let's discuss one by one.

Default Label

In the Label you need to give the name of the custom field which will be shown on the Sign Up Page.

Attribute Code

Here, the admin will enter the attribute code.

Input Type For The Store Owner

Input types for the owner are as under –

Text field – to enable the user to type the small amount of text.

Text Area– If Admin needs to obtain more than one line of input from the user, then use a text area.

Dropdown– Using the dropdown at the footer new options will come where the admin can add value for admin and default store view.
