

# Installation Guide - Facebook Shop

---

## Module Installation

Customers will get a **zip folder**. Then they have to extract the contents of this zip folder on their system. The extracted folder has an **src** folder, inside the src folder you have the **app** folder.

You need to transfer this **app** folder into the Magento2 root directory on the server as shown below:

After that, you have to run these commands in the Magento2 root directory.

### First Command –

```
1 php bin/magento setup:upgrade
```

### Second Command –

```
1 php bin/magento setup:di:compile
```

### Third Command –

```
1 php bin/magento setup:static-content:deploy
```

After running the commands, you have to flush the cache from the Magento admin panel by navigating through **System > Cache management** as shown below:

---

Cache Management

System Messages: 1

Flush Cache Storage Flush Magento Cache

✓ You flushed the cache storage.

Refresh Submit 12 records found

Cache Type	Description	Tags	Status
<input type="checkbox"/> Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> Reflection Data	API interfaces reflection data.	REFLECTION	ENABLED

Thus, this is all about the procedure of the installation of the module.

## Language Translation

For translating the module language, navigate through `src/app/code/Webkul/FacebookShop/i18n` and edit the `en_US.csv` file.

Thereafter, rename the CSV as “`en_SA.csv`” and translate all right side content after the comma in the Arabic language. After editing the CSV, save it.

Then upload it to the path `src/app/code/Webkul/FacebookShop/i18n` where the Magento2 is installed on the server.

The module gets translated into the Arabic Language. It supports both **RTL** and **LTR** languages.
