

Image Gallery

Image Gallery module allows the admin to add/manage images into various gallery and galleries into various groups according to requirement. Admin can easily manage photo gallery and gallery groups on their site. In this module everything is configured by admin. Image Gallery is the best Gallery module for the platform.

Features

- Ability to add/manage images into various gallery.
- Assign galleries into various groups.
- Add various effects for display images.
- Awesome controls you can zoom images, change images using mouse enter etc.
- The code is fully open & you can customize it according to your need.
- Multi Lingual support / All language working including RTL.
- Compatible with Multistore.

Configuration

After the successful installation of the Image Gallery module admin will be able to see the Image Gallery configuration setting under “Webkul Image Gallery”. Let’s explain each menu one by one.

The screenshot displays the Magento2 admin interface for the Image Gallery module. On the left, a dark sidebar contains the 'Image Gallery' menu with sub-items: Manage Images, Manage Gallery, Manage Groups, and Gallery Settings. A red callout box points to the 'Image Gallery' menu item with the text 'Magento2 Image Gallery Menu'. The main content area shows a dashboard with a chart area (disabled), a table with columns Revenue, Tax, and Shipping, and a section for 'Bestsellers' with a message 'We couldn't find any records.'

Revenue	Tax	Shipping	Qty
\$0.00	\$0.00	\$0.00	0

Bestsellers	Most Viewed Products	New Customers	Customers
We couldn't find any records.			

How To Add/Manage Images

Admin can add/manage the images for gallery under **Webkul Image Gallery > Add/ Manage Images**. Admin can also delete or change the status of the image.

Gallery Setting

Under Gallery Setting, you can add the setting for your image gallery.

The screenshot shows the Magento Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Image Gallery, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Configuration' and shows 'Store View: Default Config'. A red callout bubble points to a 'Save Config' button with the text 'Click to save the configuration.' Below this, the 'WEBKUL' configuration is expanded to show 'Gallery Settings'. A red callout bubble points to the 'Image Gallery' section with the text 'Here admin can use these settings to display the gallery according to the need.' The settings are as follows:

Setting	Value	Scope
Opening Effect	Elastic	[GLOBAL]
Closing Effect	Elastic	[GLOBAL]
Caption	Yes	[GLOBAL]
Caption Type	Over	[GLOBAL]
Caption Position	Bottom	[GLOBAL]
Background	Dark	[GLOBAL]
Thumbs	No	[GLOBAL]
Cyclic	No	[GLOBAL]
Autoplay	No	[GLOBAL]
Interval	10000	[GLOBAL]
Mousewheel	Yes	[GLOBAL]
Border	No	[GLOBAL]
Slidecount	Yes	[GLOBAL]
Controls	No	[GLOBAL]

At the bottom of the page, it says 'Copyright© 2015 Magento Commerce Inc. All rights reserved.' and 'Magento ver. 2.0.0' with a 'Report Bugs' link.

Under Gallery Setting, you can add effects, caption, thumbs, autoplay, border and many more features to make your gallery more graceful.

Use Block call on CMS page

You need to call block code at your cms pages with group_code, and gallery_code attribute which Gallery and Group gallery you want to show at frontend.

```
{{block class="Webkul\ImageGallery\Block\Gallery\Gallery" group_code="group1" template="Webkul_ImageGallery::group.phtml"}}
```

Note

In the case of block call at CMS page, You will have to write (“”) in HTML otherwise, if you simply copy these codes on WYSIWYG editor then it will convert the double quote into some ASCII code and you will be unable to call block on CMS page.

It will look like this in CMS page.

```

{{block class=&rdquo;WebkulImageGallery\Block\Gallery\Gallery&rdquo; group_code=&rdquo;group1&rdquo; template=&rdquo;Webkul_ImageGallery::group.phtml&rdquo;}}

```

Front-End

After inserting all required details and block code your gallery looks like this screenshot.

On clicking particular gallery you can see all the images in your gallery.
