

Multi Vendor Marketplace - Installation Guide

Now, customers will get a **zip folder** and they have to extract the contents of this zip folder on their system. The extracted folder is having an **src** folder, inside the src folder you have the **app** folder.

subsequently, you need to transfer this **app** folder into the Magento2 root directory on the server as shown below.

Therefore, after the successful installation, you have to run the command on Magento2 root directory

First Command –

- 1 php bin/magento setup:upgrade

Second Command –

- 1 php bin/magento setup:di:compile

Third Command –

- 1 php bin/magento setup:static-content:deploy

Cache Management

Additionally, after running the commands, you have to flush the cache from the Magento admin panel. Navigating through->**System->Cache management** as shown below.

System Messages: 1

Cache Management

Click here to flush the Cache Storage.

Flush Cache Storage Flush Magento Cache

✓ You flushed the cache storage.

Configuration for Multi-lingual Support

In addition, for the **multilingual** support, the admin will navigate through **Store > Configuration > General > Locale Options**. Furthermore, select the **locale** as German (the language into which admin wants to translate his store content).

Configuration

Store View: Default Config Save Config

First Day of Week Sunday [STORE VIEW]

Weekend Days Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday [STORE VIEW]

Here store selected locale option is German, move CSV file inside magento>app>locale>de_DE

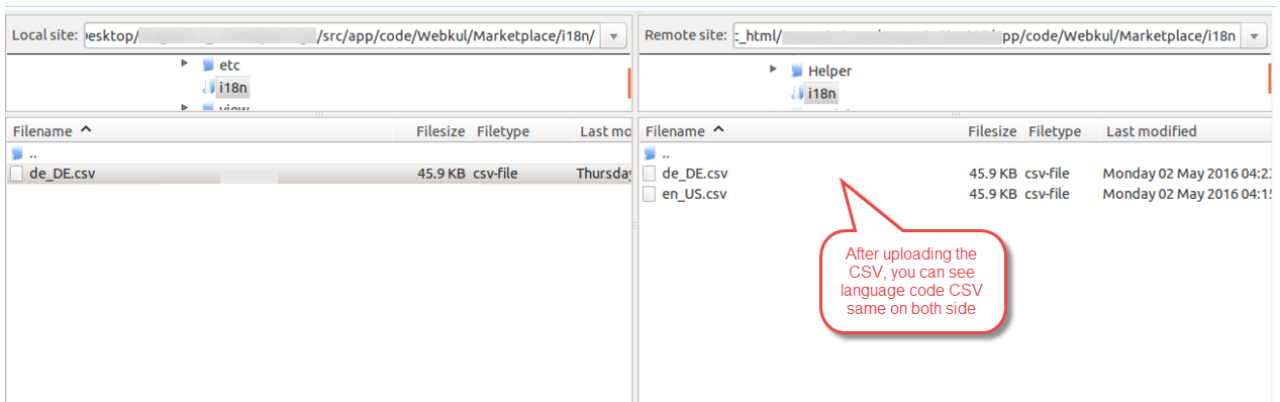

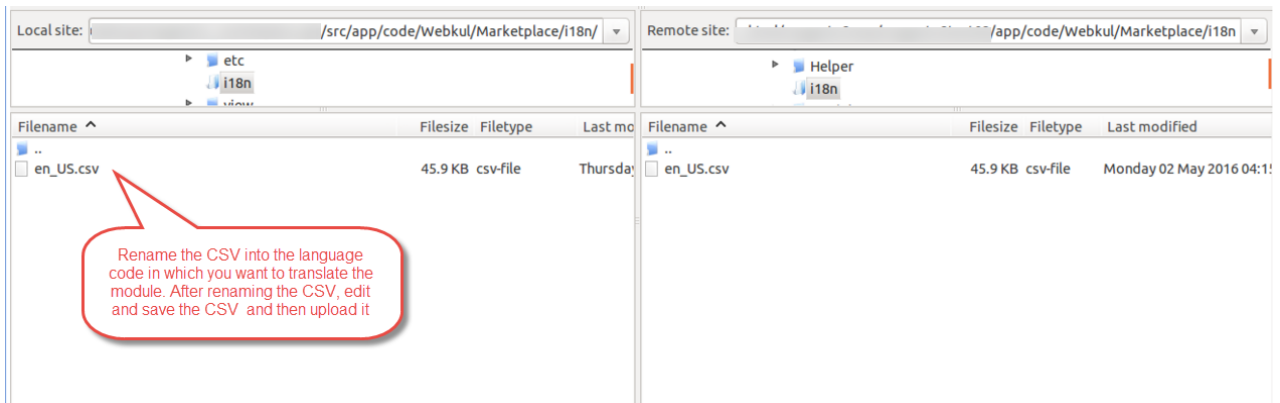

Multi Vendor Marketplace translation

Moreover, if a user wants to translate their module from English to German. Then they need to follow the path **app/code/Webkul/Marketplace/i18n** in their unzipped Magento Marketplace folder and will get a csv file with name "en_US.csv".

Now they will rename that csv as “de_DE.csv” and translate all right side content after the comma in the German language.

Thus, after editing the CSV, save it and then upload it to the path **app/code/Webkul/Marketplace/i18n** where they have installed Magento2 on the server.

Forthwith, the module gets translated in the German Language. It supports both the **LTR** and **RTL** languages.

Even, the user can edit the CSV like the image below.

```

1 "Product Information","Product Information"
2 "Product Category","Product Category"
3 "Description","Description"
4 "Short description","Short description"
5 "SKU","SKU"
6 "SKU Available","SKU Available"
7 "SKU Already Exist","SKU Already Exist"
8 "Price","Price"
9 "Stock","Stock"
10 "Weight","Weight"
11 "Image","Image"
12 "Add other image","Add other image"
13 "Back","Back"
14 "Save","Save"
15 "Cancel","Cancel"
16 "Remove","Remove"
17 "FOR BECOME SELLER CONTACT TO ADMIN","FOR BECOME SELLER CONTACT TO ADMIN"
18 "Edit Product","Edit Product"
19 "Status","Status"
20 "Qty. Sold","Qty. Sold"
21 "Earn Amount","Earn Amount"
22 "Action","Action"
23 "Pending","Pending"
24 "Approved","Approved"
25 "Delete Magento Product","Delete Magento Product"
26 "Sure Want To Delete Magento Product","Sure Want To Delete Magento Product"
27 "FOR BECOME SELLER CONTACT TO ADMIN..","FOR BECOME SELLER CONTACT TO ADMIN.."

```

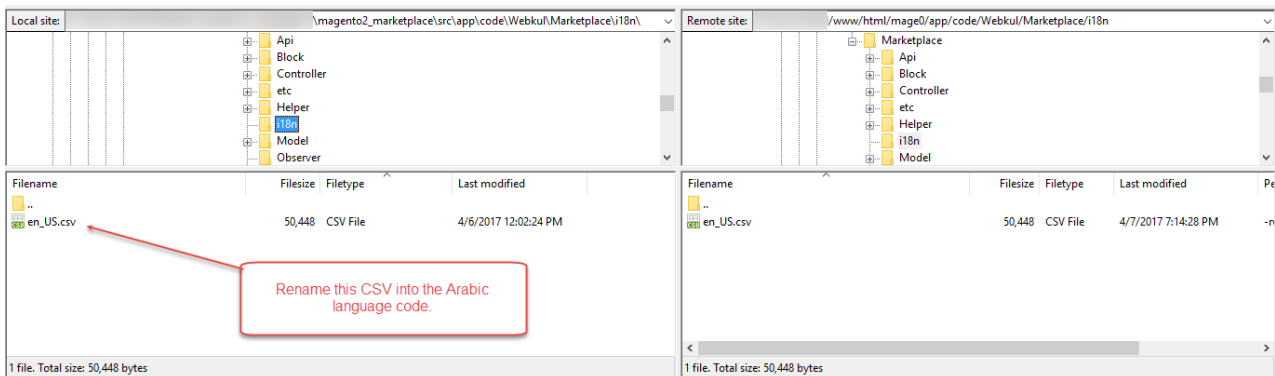

Translate the keywords with your desired language

Arabic Translation

Step 1:

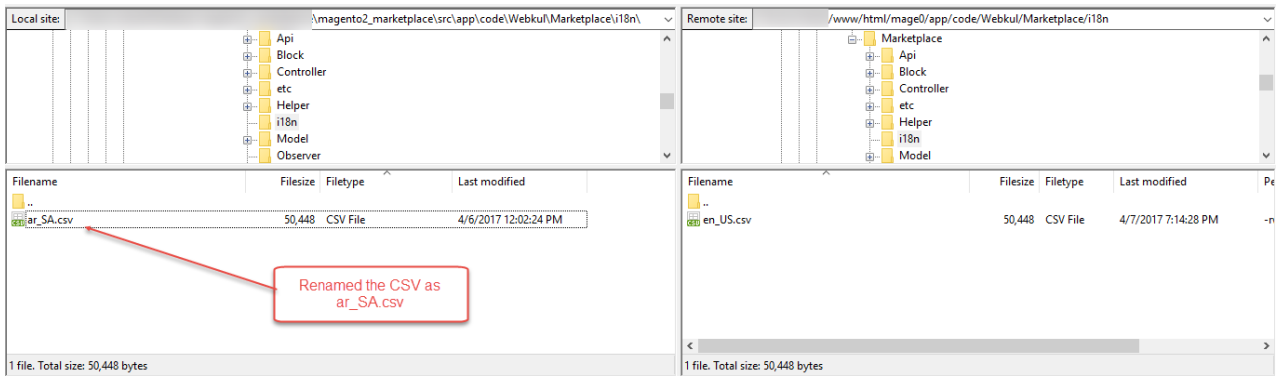

So, most importantly, If a user wants to translate their module from **English** into the **Arabic** language. Then they need to follow the path ***app/code/Webkul/Marketplace/i18n*** in their unzipped Magento Marketplace folder.

Forthwith, here the user will get a **CSV** file with name **“en_US.csv”** as shown below in the snapshot.

Step 2:

Straightaway just renames this **en_US.csv** to **“ar_SA.csv”** as shown below in the snapshot.

Step 3:

Moreover, right-click on this **renamed CSV file** and click the **edit** button to **translate all right side content** of this **CSV** after the comma **into the Arabic language**.

Now, see the actual **CSV file** after opening it up:

| | A | B |
|----|---------------------------|-------------------------------------|
| 1 | Product Information | Product Information |
| 2 | Product Category | Product Category |
| 3 | Description | Description |
| 4 | Short description | Short description |
| 5 | SKU | SKU |
| 6 | SKU Available | SKU Available |
| 7 | SKU Already Exist | SKU Already Exist |
| 8 | Price | Price |
| 9 | Stock | Stock |
| 10 | Weight | Weight |
| 11 | Image | Image |
| 12 | Add other image | Add other image |
| 13 | Back | Back |
| 14 | Save | Save |
| 15 | Cancel | Cancel |
| 16 | Remove | Remove |
| 17 | FOR BECOME SELLER CONTACT | FOR BECOME SELLER CONTACT TO ADMIN |
| 18 | Edit Product | Edit Product |
| 19 | Status | Status |
| 20 | Qty. Sold | Qty. Sold |
| 21 | Earn Amount | Earn Amount |
| 22 | Action | Action |
| 23 | Pending | Pending |
| 24 | Approved | Approved |
| 25 | Delete Magento Product | Delete Magento Product |
| 26 | Sure Want To Delete Magen | Sure Want To Delete Magento Product |

A red callout box points to the right column (B) with the text 'Actual CSV without translation.'

Even the users can **edit the CSV** as per the below screenshot:

| | A | B |
|----|---------------------------|--|
| 1 | Product Information | جتنم ل تامول عم |
| 2 | Product Category | جتنم ل ةئف |
| 3 | Description | فصو |
| 4 | Short description | ريصق فصو |
| 5 | SKU | وكس |
| 6 | SKU Available | حاتم وكس |
| 7 | SKU Already Exist | ل عف ل اب دو جوم وكس |
| 8 | Price | رعس ل ا |
| 9 | Stock | نوزخم |
| 10 | Weight | نزو |
| 11 | Image | ةروص |
| 12 | Add other image | يرخ ةروص ةفاض |
| 13 | Back | فلخ ل ا |
| 14 | Save | ظفح |
| 15 | Cancel | ءاغل |
| 16 | Remove | ةلاز |
| 17 | FOR BECOME SELLER CONTACT | نيم د ا ل ل ل اص ت ال ا ع ئ اب ل ا ح ب ص ت ل |
| 18 | Edit Product | جتنم ل ري رح ت |
| 19 | Status | ة ل ا ح ل ا |
| 20 | Qty. Sold | ع ي ب ل ا م ت ة ي م ك ل ا |
| 21 | Earn Amount | ع ل ب ل ا م ل ا ب س ك |

Translated the Right side keywords with the Arabic language.

Step 4:

Now after translating the content of the CSV **save it** and then **upload it** to the path **app/code/Webkul/Marketplace/i18n**. Where you have installed the **Magento2** on the server.

Then, the module gets **translated into the Arabic Language**.

The screenshot displays a file manager interface with two panes: 'Local site' and 'Remote site'. Both panes show a directory structure for 'i18n' with sub-directories like 'Api', 'Block', 'Controller', 'etc', 'Helper', 'i18n', 'Model', and 'Observer'. The 'Local site' pane shows a file 'ar_SA.csv' with a size of 46,346 bytes. The 'Remote site' pane shows two files: 'ar_SA.csv' (46,346 bytes) and 'en_US.csv' (50,448 bytes). A red callout box points to the files in the remote site, stating: 'After uploading the CSV you can see the same language code on the both side.'
