

# Per Product Shipping Marketplace Add-On v5.0.0

---

**Marketplace Shipping On Per Product for Magento 2** module allows the seller to add shipping price for each of their products. Marketplace Shipping On Per Product for Magento 2 is an essential feature for the sellers.

That's why we have created an add-on for the seller to add the shipping price for each product from the seller panel.

The admin can select whether the per product shipping calculation will depend on the main product shipping price or on their associated product's shipping price.

## **Note:**

Marketplace Shipping On Per Product is an add-on to the Webkul Marketplace Module. To use this module you must have installed marketplace module first **Webkul Marketplace Module**

## **Features**

---

- The vendor can add different shipping prices for each product.
- Admin can also update the shipping prices of products.
- The admin selects whether the per product shipping calculation will depend on the main product shipping price or on their associated product's shipping price.
- If in the shopping cart, there are different products from different sellers then the shipping cost of each product will be multiplied by the product quantity added by the customer and then the total will be displayed on the checkout page.
- In case, shipping per product rate is not set by the seller, then the admin's default per product shipping rate will be applied. Admin can set the default per product shipping while configuring the module.
- The seller can add Invoice & Packing slip address, VAT, Tax information.
- The seller can enter the tracking number and save it.
- Ability to download Invoice and Shipping Slip easily.
- The codes are open source so it can be customized as per your requirement.

## **Management Of Marketplace Shipping On Per Product for Magento 2**

---

After the module installation, the admin can set Marketplace Shipping On Per Product for Magento2 under **Store > Configuration > Sales > Shipping Methods > Webkul Marketplace Per Product Shipping** as per the below image.

Here, the admin will:

- **Enabled:** Enable/disable the module by selecting either “Yes” or “No”.
- **Title:** Set the title which will be displayed on the frontend.
- **Name:** Define the shipping method name.
- **Default shipping Price:** If the **seller** has not **set/forgot** to **set** the “**Shipping Price**” for any of his products, then the default shipping price set by the admin will apply to those seller products
- **Handling Fee:** enter the handling fee that will be applicable to the product.
- **Shipping Based On** The admin can select the main or associated (child) product for the shipping calculation i.e, whose shipping price will be used for rate calculation.
- **Ship to Applicable Countries:** The admin can allow all the countries else to allow specific countries where the admin wants to allow the shipping.
- **Ship to Specific Countries:** Select the specific countries where the admin wants to allow the shipment.

### Admin setting shipping rate per product

After the module configuration, the admin will find a text field under the price option under **Product > Catalog > Edit Product**. Here, the admin can enter the shipping charge for any particular product.
