

# B2B Wholesale Private Shop V5.0.0

---

## Installation

Customers will get a **zip folder** and they have to extract the contents of this zip folder on their system. The extracted folder has an **src** folder, inside the src folder you have the **app** folder.

You need to transfer this **app** folder into the root directory on the server as shown below.

After the successful installation, you have to run these commands in the root directory.

### First Command-

```
1 php bin/magento setup:upgrade
```

### Second Command –

1 php bin/magento setup:di:compile

---

## Third Command –

1 php bin/magento setup:static-content:deploy

---

After running the commands, you have to flush the cache from the admin panel by navigating through->**System->Cache management** as shown below.

Cache Management

System Messages: 1

Flush Cache Storage Flush Magento Cache

✓ You flushed the cache storage.

Refresh Submit 12 records found

Cache Type	Description	Tags	Status
<input type="checkbox"/> Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> Reflection Data	API interfaces reflection data.	REFLECTION	ENABLED

## Multilingual Support

For the **multilingual** support, the admin will navigate through **Store->Configuration->General ->Locale Options** and select the locale as German (the language into which admin want to translate his store content).

The screenshot shows the Magento 2 Configuration interface. On the left is a sidebar with navigation options: DASHBOARD, MARKETPLACE MANAGEMENT, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main area is titled 'Configuration' and shows 'Store View: Default Config'. A 'Save Config' button is in the top right. The 'GENERAL' section is expanded, and 'General' is selected. Under 'Locale Options', the 'Locale' dropdown is set to 'German (Germany)'. A red box highlights this dropdown, and a red speech bubble points to it with the text: 'Here store selected locale option is German, move CSV file inside magento>app>locale>de\_DE'. Other settings include Timezone (GMT (UTC)), Weight Unit (lbs), First Day of Week (Sunday), and Weekend Days (Sunday, Saturday).

## Module Translation

If a user wants to translate their module from English to German. Then they need to follow the path **app/code/Webkul/PrivateShop/i18n** in their unzipped B2B\_wholesale\_private\_shop folder and will get a CSV file with name “en\_US.csv”.

Now they will rename that CSV as “de\_DE.csv” and translate all right side content after the comma in the German language. After editing the CSV, save it.

And then upload it to the path **app/code/Webkul/PrivateShop/i18n** where they have installed this on the server. The module will get translated into the German Language. It supports both **RTL** and **LTR** languages.
