

# Recurring Payments and Subscriptions v3.0.1

---

## Introduction

---

Recurring Payment Subscription: This module provides the functionality to manage subscription & recurring payment for the products of the admin.

Apart from that, it allows the customers to make a subscription for the allowed products on a daily, weekly, Monthly & Yearly basis.

## Features

---

- The merchant can enable/disable the Recurring Payment.
- The admin can manage PayPal Recurring payment.
- Also, the owner can view/unsubscribe customer subscriptions.
- Moreover, customers can view/unsubscribe to their subscriptions.
- Additionally, it supports online recurring payments with PayPal.
- Additionally, this module supports online Stripe recurring payments.
- Even it supports offline recurring payments too
- Further merchants can add more than one subscription product.
- As well as the owner can select the subscription price scope as global or website wise.
- Furthermore, the admin sets the subscription amount & subscription initial fee product-wise.
- This extension supports simple, configurable, virtual, and downloadable product types.
- Then, the merchant can manage the duration type.

## How to Get PayPal & Stripe Credentials?

---

### PayPal Credentials

Now, Log in to PayPal business account and navigate through **"Payment Setup"**->

**On your website"**-> **"continue"** button.

Account setup

Payment setup

### How do you want to start getting paid?

Choose one, or choose them all. We'll help you get set up.  
Don't worry, you can always add more ways to get paid later.

#### On your website

Accept credit cards and PayPal on your site.  
[Learn more](#)

#### In person

Take credit cards with our card reader.  
[Learn more](#)

#### With online invoicing

Create and email invoices in minutes.  
[Learn more](#)

#### On eBay

Sell on eBay with PayPal built right in.  
[Learn more](#)

Continue

Then, tap on **“Option A”** to select a third party e-commerce solution where the PayPal payment process is built-in.

after that, in Option A tap on **“Get your API Credentials”** link.

[Summary](#)[Money](#)[Activities](#)[Reports](#)[Tools](#) ▼[More](#) ▼[Help](#)

## Welcome to your PayPal Business Account

[Account setup](#)[Payment setup](#)

### On your website

**Payment processing:** Add PayPal checkout as another way to get paid.

### How do you want to set up PayPal on your website?

**Option A** I want a pre-built payment solution

Select a third-party e-commerce solution, like Magento or Shopify, for shopping carts and online stores where the PayPal payment processor is built-in.

Already have an e-commerce solution?

[Follow their integration guide](#)

Looking for an e-commerce solution?

[Find one](#)

[Get your API Credentials](#)

Post this, click on the **“Manage API Credentials”** button to see API Credentials.

## Your payment API credentials

To accept PayPal payments on your website, you or your developer will need API credentials. The API (Application Programming Interface) allows PayPal to communicate with your online store or shopping cart.

[Learn more](#) about PayPal APIs

How is PayPal set up on your website?

### PayPal API

Through a shopping cart provider

#### Pre-built payment solution

If you're using or plan to use a 3rd-party platform, like Magento or Shopify, for shopping carts and online stores where the PayPal payment processor is built in.

[Grant API permission](#)

Custom checkout experience

#### Braintree SDK integration

The Braintree SDK is powered by Braintree, a PayPal service. These easy to integrate SDKs allow you to accept payments via PayPal on your website and native mobile apps.

[Manage SDK Credentials](#)

#### NVP/SOAP API integration (Classic)

You or your developer integrated NVP/SOAP (or "Classic") APIs that allow you to accept payments via PayPal.

[Manage API credentials](#)

Now here, you can see your API Username, API Password, and Signature.

## View or Remove API Signature

**Developers:** Do not share your credential information with anyone. Store in a secure location with limited access.

**For preconfigured shopping carts:** Copy and paste the API username, password, and signature into your shopping cart configuration or administration screen.

**For building custom shopping carts:** Store the following credential information in a secure location with limited access.

Credential	Signature
API Username	john  <a href="#">Hide</a>
API Password	6KN7  <a href="#">Hide</a>
Signature	AUH  <a href="#">Hide</a>
Request Date	July 11, 2019 at 3:54:54 AM PDT

[Remove](#) [Done](#)

## Stripe Credentials

To get the **API Keys** you can use the link- <https://dashboard.stripe.com/login>.

You have to **Log in/Sign up** your account and you will get your **API Keys**.

As you can see in the following screenshot the keys are there for the **Test** and **live environments** – **Publishable Key** and the **Secret Key**.

The screenshot shows the Stripe dashboard interface. On the left is a navigation sidebar with 'API keys' selected. The main content area shows the 'API keys' section with a search bar and a toggle for 'Viewing live API keys'. Below this, there are two sections: 'Standard API keys' and 'Restricted API keys'. Under 'Standard API keys', there are two rows: 'Publishable key' and 'Secret key'. A red box highlights both rows with the text 'Publishable and secret key are visible as per selection'. To the right of the 'Secret key' row is a 'Reveal live key token' button. Above the 'Viewing live API keys' toggle, there is a red box with the text 'Select the API key that you want to use - live or test' pointing to the 'View test data' toggle.

## Setting Up IPN Notifications on PayPal

### [Setting Up IPN Notifications on PayPal](#)

The following method defines how to specify and activate the URL for your IPN listener in your PayPal profile.

Your listener must be located at the URL that you specify in the profile.

Before you activate your listener on PayPal, you should test the listener using the IPN simulator in the sandbox.

The steps to set up your listener for Sandbox testing and to set up your listener for live operation on PayPal are the same.

The only difference is that you log into the sandbox to set up your listener for Sandbox testing and you log into PayPal to set up your listener for live operation.

### Note:

---

Sandbox testing goes beyond simply using the IPN simulator. The IPN simulator only sends IPN messages to a listener; it does not perform the complete operation; for example, it does not complete a transaction.

Sandbox testing involves performing the same actions in the sandbox as you expect to be performed when the listener goes live.

### Post that you log in, follow these instructions to set up your listener:

1. Log in to your PayPal business account at [www.paypal.com](http://www.paypal.com).
2. Click the settings icon at the top of your PayPal account page and then click **Account Settings**.
3. On the **Notifications** page, click the **Update** link for the **Instant payment notifications** item.
4. Click **Choose IPN Settings** to specify your listener's URL and activate the listener. The following page opens:
5. Specify the URL for your listener in the Notification URL field.
6. Click **Receive IPN messages (Enabled)** to enable your listener.
7. Click **Save**. The following page opens:

You can return to the **Instant Payment Notification** page to modify your notification URL, disable your listener, or turn off IPN.

### Note:

---

IPN Url to be set: **[magento-url]/recurring/paypal/notify**

The IPN message is always sent to your notification URL unless you have disabled the preference to receive IPN messages.

## Set Webhook in Stripe for Webkul Recurring Payments

---

In web development, a webhook is a method of altering the behavior of a web page, or web application, with custom callbacks.

Webhooks are basically user-defined HTTP callbacks that are triggered by specific events.

Now for setting up the Webhook in Stripe, follow the steps listed below-

**Step1:** Login to Stripe Account

**Step 2 –**

- 'View Test Data'(as per your need), and
- Tick on 'Developers' thence
- Go on 'Webhook'.

WEBKUL

#### General Settings

Subscription Configuration

Enable [website] Yes

Subscription Price Scope [website] Global

Enable Discount on Subscriptions [website] No

If set as 'Yes', the discount will be applied on the subscription order

Allow Multiple Subscriptions in Cart [website] Yes

If set as 'Yes', multiple subscription products can be added to cart at a time, if their 'Start dates' and 'Duration types' are same.

Allowed payment methods to buy subscription [website]

Check / Money order  
Webkul Recurring PayPal Express Checkout Payment Meth  
Webkul Recurring Stripe Payment Method

## Recurring Payment and Subscription

After the successful installation of the extension, the admin will configure the module settings. To do so, the admin will navigate through **Stores->Configuration->Webkul->Subscription Configuration**.

Here, the admin will be able to –

- **Enable** the functionality by selecting a **Yes** option else to select a **NO** for **Disabling** the functionality.
- Select the **Subscription Price Scope** – Select the scope for using the extension as **Global** or **Website wise**.
- **Enable Discount on Subscriptions:** Select a **Yes** to apply discounts on subscriptions, it is valid only on the first order else select a **No**.
- **Allow Multiple Subscriptions in Cart:** Select a **Yes** multiple subscription products can be added to the cart at a time. If their **“Start Date and Duration types”** are the same.
- **Allowed Payment Methods to Buy Subscription:** Here, choose the payment methods that will be available to customers for buying the subscription product.

## Configuration – Recurring PayPal Payment Method

---

Thereafter, the admin needs to navigate through **Stores->Configuration->Sales->Payment Methods->Webkul Recurring PayPal Express Checkout Payment Method**.

Here, the admin will **configure** the settings for the **payment method** as shown below in the snapshot.

## ⏪ Webkul Recurring PayPal Express Checkout Payment Method

<b>Enable this Solution</b> <small>[website]</small>	Yes
<b>Sandbox Mode</b> <small>[website]</small>	Yes
<b>Title</b> <small>[store view]</small>	Webkul Recurring PayPal Express Checkout Payment Method
<b>Merchant PayPal ID</b> <small>[store view]</small>	john@example.com
<b>PayPal API User Name</b> <small>[store view]</small>	•••••
<b>PayPal API Password</b> <small>[store view]</small>	•••••
<b>PayPal API Signature</b> <small>[store view]</small>	•••••
<b>Payment from Applicable Countries</b> <small>[website]</small>	All Allowed Countries
<b>Payment from Specific Countries</b> <small>[website]</small>	<div style="border: 1px solid #ccc; padding: 5px;"><p>Afghanistan</p><p>Åland Islands</p><p>Albania</p><p>Algeria</p><p>American Samoa</p><p>Andorra</p><p>Angola</p><p>Anguilla</p><p>Antarctica</p><p>Antigua &amp; Barbuda</p></div>
<b>Sort Order</b> <small>[website]</small>	

Here, the admin will –

- **Enable** this solution for making it available for use at the frontend.
- **Sandbox Mode**  
Select **Yes** to **enable** the testing mode else select **No** to make use of the Live mode.
- **Title**  
Set the **Title** for the Payment method which is visible to the customers at the checkout page.
- **Merchant PayPal ID**  
Enter your Merchant PayPal Id within the space provided.
- **PayPal API User Name**  
Enter your PayPal User Name.

- **PayPal API Password**  
Enter your PayPal password.
- **PayPal API Signature**  
Enter your PayPal Signature
- **Payment Form Applicable Countries**  
Select All to allow payment from all the countries else selects **Specific Countries**.
- **Payment From Specific Countries**  
Select the specific countries from where you want to receive the payments.
- **Sort Order**  
Set the sort order for this payment method at the checkout time.

## Configuration – Recurring Stripe Payment Method

The admin will be able to configure recurring stripe payment method by navigating through **Stores->Configuration->Sales->Payment Methods->Webkul Recurring Stripe Payment Method** likewise shown in the image below:

### Webkul Recurring Stripe Payment Method

<b>Enable this Solution</b> <small>[website]</small>	Yes
<b>Title</b> <small>[website]</small>	Webkul Recurring Stripe Payment Method
<b>Sandbox Mode</b> <small>[website]</small>	Yes
<b>API Publishable Key</b> <small>[website]</small>	••••••
<b>API Secret Key</b> <small>[website]</small>	••••••
<b>Set Name Display on Form</b> <small>[website]</small>	Stripe Pay
<b>Payment from Applicable Countries</b> <small>[website]</small>	All Allowed Countries
<b>Minimum Order Total</b> <small>[website]</small>	0.50 <small>\$0.50 is the minimum amount allowed by Stripe</small>
<b>Maximum Order Total</b> <small>[website]</small>	
<b>Sort Order</b> <small>[website]</small>	1

Here, the admin will-

**Enable this Solution:** Select Yes to enable this payment method else to select No to disable this payment method.

**Title:** Set the Title for the Payment method which is visible to the customers at the checkout page.

**Sandbox Mode:** Select Yes to enable the testing mode else select No to make use of the Live mode.

**API Publishable Key:** Enter your Stripe API publishable key.

**API Secret Key:** Enter your Stripe API secret key.

**Set Name Display on Form:** Set the Name for the Payment method which is visible to the customers at the form while entering the card details.

**Payment from Applicable Countries:** Select the specific countries from where you want to receive the payments

**Minimum Order Total:** Here, the admin needs to enter the minimum amount allowed by stripe.

**Sort Order:** Set the sort order for this payment method at the checkout time.

## Recurring Payments – Admin

---

The admin will have the **Recurring** section in the admin backend panel thenceforward the successful installation of the Recurring Payment Subscription extension.

Here the admin has two **sub-sections** to manage:

- Manage Duration Type Under here, the admin will be able to create the **subscription duration**.

To **create a new duration** type, tap the **Add Duration Type** button. You can create the duration type as – **daily, weekly, Monthly & Yearly basis**.

Also, after you have created a subscription duration, no other same duration type can again be created. If you try creating one, you will get an error message as shown below in the snapshot.

- Manage Subscriptions

Under this section, the admin will find all the recurring subscriptions listed.

## How To Create a Subscription Product?

**Note – This extension supports simple, configurable, virtual, and downloadable product types.**

To create a **subscription product** you need to navigate to the **Catalog** section and open any already created or new product. After that, go to the **Subscription Configuration** section for the product.

Here, set the **Subscription** option to **Yes**. After that, you will have to **click** the **Edit Configuration** button to add the subscription duration to this product.

This brings up the below section to choose the duration type for the product. Here, you need to check the **subscription duration types** to set for this product, enter the **Subscription Title, Description**(for a visible understanding), set an **Initial Fee**, and the **subscription Charges** applicable for the different chosen duration types.

Choose types	Duration Title	Duration	Subscription Title	Subscription Description	Initial Fee	Subscription Charge
<input checked="" type="checkbox"/>	Weekly	7	<input type="text" value="Weekly"/>	<input type="text" value="Weekly"/>	<input type="text" value="\$ 1"/>	<input type="text" value="\$ 12"/>
<input checked="" type="checkbox"/>	Monthly	30	<input type="text" value="Monthly"/>	<input type="text" value="Monthly"/>	<input type="text" value="\$ 2"/>	<input type="text" value="\$ 15"/>
<input checked="" type="checkbox"/>	Yearly	365	<input type="text" value="Yearly"/>	<input type="text" value="Yearly"/>	<input type="text" value="\$ 3"/>	<input type="text" value="\$ 30"/>

Lastly, click the **Save** button at the top to save the configuration settings.

Here, the customers can see the **overview** of the **subscriptions** they have subscribed to and can **view/Unsubscribe** the subscription as well.

The screenshot shows a user interface for 'My Subscriptions'. On the left is a navigation menu with items like 'My Account', 'My Orders', 'My Downloadable Products', 'My Wish List', 'Address Book', and 'Account Information'. The main content area is titled 'My Subscriptions' and contains a table with the following data:

ID	Order Id	Reference Profile Id	Product Name	Subscription Type	Status	Action
10	000000009	I-NAVDUGLONU8M	Dairy Products	123	Subscribed	<a href="#">View</a>   <a href="#">UnSubscribe</a>
9	000000008	I-89G98TP56PJM	Dairy Products	123	Subscribed	<a href="#">View</a>   <a href="#">UnSubscribe</a>
8	000000007	I-Y5XEVDGFJX6G	Dairy Products	123	Subscribed	<a href="#">View</a>   <a href="#">UnSubscribe</a>

To view the subscription, tap the **view** button and you can see the details of the particular subscription.

The screenshot shows the 'View Subscription' page. It features a navigation menu on the left and a main content area with a 'Back' and 'UnSubscribe' button at the top right. The subscription details are as follows:

Subscription Type :	Weekly
Start Date :	Thursday, February 20, 2020
Initial Order Id :	#000000004
Product Name :	<a href="#">Dairy Products</a>
Customer Name :	John Doe
Created At :	Thursday, February 20, 2020
Status :	Subscribed
Reference Profile Id :	sub_Glei2zybZTo1MP

Below the table, there is a 'Compare Products' section with the text 'You have no items to compare.'

Now, The customers also have an option to **unsubscribe** to the **opted** subscriptions.

Afterward to do so, the customer will **tap** on the **Unsubscribe** button and that brings up a **pop-up** confirmation for the same.

Thereupon tap the **OK** button to confirm the unsubscribe.

The screenshot shows the 'Subscriptions' page with a confirmation pop-up dialog box in the center. The dialog box contains the text 'Do you want to Unsubscribe?' and two buttons: 'OK' and 'Cancel'. The background shows a table of subscriptions with the following data:

ID	Order Id	Reference Profile Id	Product Name	Subscription Type	Status	Action
1	000000013	I-NSPT89U3GW0A	Weekly Employment News Paper	Weekly	Subscribed	<a href="#">View</a>   <a href="#">UnSubscribe</a>
2	000000014	I-5PDFGM7UXU1S	Dairy Products	Daily	Subscribed	<a href="#">View</a>   <a href="#">UnSubscribe</a>

Next tapping the **OK** button you can see that the subscription is unsubscribed.

The screenshot displays the 'View Subscription' page. On the left is a navigation menu with options: My Account, My Orders, My Downloadable Products, My Wish List, Address Book, Account Information, My Product Reviews, Newsletter Subscriptions, and My Subscription. Below the menu is a 'Compare Products' section stating 'You have no items to compare.' The main content area shows the following details:

Subscription Type :	Weekly
Start Date :	Thursday, February 20, 2020
Initial Order Id :	#000000004
Product Name :	Dairy Products
Customer Name :	John Doe
Created At :	Thursday, February 20, 2020
Status :	UnSubscribed
Reference Profile Id :	sub_Glel2zybZTo1MP

A blue 'Back' button is located in the top right corner of the main content area.
