

# Spin To Win Plugin V.4.0.0.

---

## Installation

Customers will get a **zip folder**. Then they have to extract the contents of this zip folder on their system. The extracted folder has an **src** folder, inside the src folder you have the **app** folder.

You need to transfer this **app** folder into the root directory on the server as shown below.

After the successful installation, you have to run these commands in the root directory.

### First command –

```
1 php bin/magento setup:upgrade
```

### Second Command –

## Third Command –

After running the commands, you have to flush the cache from the Magento admin panel by navigating through->**System->Cache management** as shown below.

## Language Translation

For translating the module language, navigate through **src/app/code/Webkul/SpinToWin/i18n** and edit the **en\_US.csv** file.

Thereafter, rename the CSV as “en\_SA.csv” and translate all right side content after the comma in the Arabic language. After editing the CSV, save it.

Then upload it to the path **src/app/code/Webkul/SpinToWin/i18n** where the is installed on the server. The module gets translated into the Arabic Language. It supports both **RTL** and **LTR** languages.
