

Mass Product Edit Marketplace Add-On v3.0.0

Mass Product Edit Marketplace Add-On: This module allows the admin to enable the mass product edit feature at the seller panel. By using the Mass product edit feature the seller can update the value of the product attributes of the multiple products in one go. This module also allows the seller to update the status of all the selected products at once.

Also, the seller can update the price of the product in bulk. Sellers can select the type of product price for the update from Fixed, Increase by Percentage, Decrease by Percentage, Increase and Decrease.

****Note** – This is a marketplace add-on, so you need to install **Multi Vendor Marketplace** first.

Feature List

- Sellers can edit their products in bulk.
- The seller can update the value of the product attributes.
- Mass update the status of the products as enable or disable.
- Bulk edit the price of the products.
- Select the type of product price for the update from Fixed, Increase by Percentage, Decrease by Percentage, Increase and Decrease.

How to enable the module?

To allow the seller to update mass product edit, the admin needs to enable the module. For that, the admin needs to navigate through **Store > Configuration > Mp Mass Product Edit**.

For the reference, please check the below snapshot:

Store View: Default Config ▾ ? Save Config

Enable
[global]

Yes ▾

Under **General Settings**, the admin can enable or disable the module.

Bulk Product Edit

Once the admin enables the **Mass Product Edit Marketplace Add-On**, the seller can start editing the product in bulk.

For that, they need to navigate through **My Account > My Products List**. Then select the products and click on the **Update Products** button as per below image:

Bulk Product Price Update

Once the admin enables the **Mass Product Edit Marketplace Add-On**, they can bulk update the price of their product.

For that, the seller needs to navigate through **My Account > My Products List**.

Then after selecting the products, the seller needs to **select the Price type from the drop-down** as per below image:

Product Name		Date		Product Status					
Search by product name		From:		To:		All		Submit	
Delete Products	Update Products	Select		Update Status	Select Price Type		Update Price		
<input type="checkbox"/>	Product	Type	Status	Qty. Confirmed	Qty. Pending	Qty. Sold	Earned Amount	Action	
<input type="checkbox"/>	 Quest LumaFlex™ Band \$19.00	simple	Disabled	0	0	0	\$0.00		
<input type="checkbox"/>	 Go-Get'r Pushup Grips \$19.00	simple	Disabled	0	0	0	\$0.00		
<input type="checkbox"/>	 Pursuit LumaFlex™ Tone Band \$16.00	simple	Enabled	0	0	0	\$0.00		
<input type="checkbox"/>	 Zing Jump Rope \$12.00	simple	Enabled	0	0	0	\$0.00		
<input type="checkbox"/>	 Dual Handle Cardio Ball \$12.00	simple	Enabled	0	0	0	\$0.00		

There are four types of **Price Type** which the seller can select:

- **Fixed** – Enter the fixed amount and it will replace the existing price of the product. For eg, if the product price is 100 and the seller has updated it as a fixed price 90, then the final product price becomes 90.

- **Increase** – Enter the amount which you want to add to the existing product price.
- **Decrease** – Enter the amount which you want to reduce from the existing product price.
- **Increase by Percentage** – Enter the percentage amount. It gets added to the product price. For eg, if the product price is 100 and the seller has updated it as a percentage Increase price 10, then the final product price becomes 110.
- **Decrease by Percentage** – Enter the percentage amount. It gets deducted from the product price. For eg, if the product price is 100 and the seller has updated it as a percentage Decrease price 10, then the final product price becomes 90.

Once the seller selects the **Price Type**, they need to click on the **Update Price** button as per below image:
