[Price List Information](#)

[Support](#)

The pricelist module is used to create custom price rules according to various entities like the product, product category, Product Minimum Quantity, and Product Minimum Price. By this admin can create various price rules very easily for various entities and then use the created price rules by creating a price list.

The price list can create by simply adding price rules from the created price rule list. Admin can very easily set a price list targeting the customers/ customer groups. It is very beneficial for those who want to keep their different customers at different than attractive prices.

## Note

- Product quantity and total product price rules are not applicable for bundle products.
- The Price Rules will apply to the Base Price and not to the Special/Group/Tier Pricing.

## Features

- By this Module, the admin can create rules for the pricelist.
- By this Module, the admin can assign multiple rules for the pricelist.
- The Admin can assign multiple pricelists to customer or customer group.
- Admin can set rules according to the product.
- The Admin can set rules according to category.
- Admin can set rules according to quantity.
- Admin can set the rule according to the total product price.
- The Admin can create a rule to increase the price.
- The Admin can create a rule to decrease price.
- Admin can set the priority of rules.
- The Admin can set the priority of pricelists.
- The Admin can set a start and end date for by the price.
- Pricelist will be applied automatically according to the priority.

## Module Configuration

After the installation of the **Price list for the Magento 2** extension, the admin will find the configuration settings panel by navigating through **Stores->Configuration->Price List** as per the snapshot below.

**Enable/Disable:** Admin can enable or disable the price list for products under the module configuration page.

## Manage Price Rule

The admin can see the **Price List** tab in his backend admin panel.

The admin can **add/ view/ edit/ delete** price rules to manage Price List Rules by navigating through **Price List ->View Price List Rules**.

## Add Price Rule

Admin can add price rules by navigating through **Price List -> View Price List Rules -> Create Rule**.

By clicking the **"Create Rule"** icon, the admin will be redirected to the New Rule page. In this case, the admin will make the settings for two sections, essentially if the price rule is for products or categories. The second section will contain the product or categories to be chosen for the price rule.

If the price rule is set for Product Quantity and Total Product Price, then only one section must be set for the admin. A certain common section for all will be the information on the price rule.

## Price Rule Information

The **Price Rule Information** is for setting major basic information required for creating a price rule. It can be navigated through **Price List -> View Price List Rules -> Create Rule -> Price Rule Information**.

This section has the following fields to be set for creating a price rule, the fields to be set are:

- **The price Rule Name:** Here the admin will enter the name of the price rule.
- **Price Calculation Type:** The admin can choose "Increase Price" from the dropdown to add the calculated amount to the product's price or "Decrease Price" to subtract the calculated amount to the product's price.
- **Price Type:** The price calculation can be done by "Percent Price" or "Fixed Price".
- **Amount:** Here the admin will set the amount for the "Price Type".
- **Priority:** The admin will set the priority for the price rule
- **Applicable On:** The Price rule can be applied by Products / Categories / Product Quantity / Total Product Price.

**Please Note:** If the price rule is applying on Product Quantity/ Total Product Price, the admin will set the minimum quantity/amount respectively.

Applicable On \*  ▼

Quantity

Applicable On \*  ▼

Total

Status \*  ▼

- **Status:** The price rule can be made "Active" or "Deactivate" by the admin.

The **Product** section is for selecting the product on which the price rule will be applied. It can navigate through **Price List -> View Price List Rules -> Create Rule -> Products**.

## Products

It has the following fields to set or select for creating a price rule, the fields to be set are:

\$34.00

## Front End View of Products with Price List Rules.

Now if the price list rule has to apply then the price rule and price list have to create.

Admin can add price rules by navigating through **Price List -> View Price List Rules -> Create Rule -> Price Rule Information**. For example, we can create a price rule by setting the following sections:

1. Name: Product price Rule
2. Price Calculation Type: Increase Price
3. Price Type: Fixed Price
4. Amount: 100
5. Priority: 1
6. Applicable On: Product
7. Status: Active

The screenshot shows the 'Product price Rule' configuration interface. The left sidebar contains navigation options: DASHBOARD, PRICE LIST, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, and SYSTEM. The main content area is titled 'Product price Rule' and features three buttons: 'Delete Rule', 'Create New Rule', and 'Save Price Rule'. Below the title, there are two tabs: 'PRICE RULE INFORMATION' (selected) and 'Products'. The 'PRICE RULE INFORMATION' tab displays the following fields:

- Price Rule Name \*: Product price Rule
- Price Calculation Type \*: Increase Price
- Price Type \*: Fixed Price
- Amount \*: 100.0000
- Priority \*: 1
- Applicable On \*: Product
- Status \*: Active

The 'Products' section is currently empty.

- As the rule applies to the product, therefore, the product section will be also set. It can be navigated through **Price List -> View Price List Rules -> Create Rule -> Products**. In this, the above two products Strive Shoulder Pack then Joust Duffle Bag selected for the price rule.
