

Product Search Suggestion

webkul.com/blog/magento2-search-suggestion/

September 27, 2016

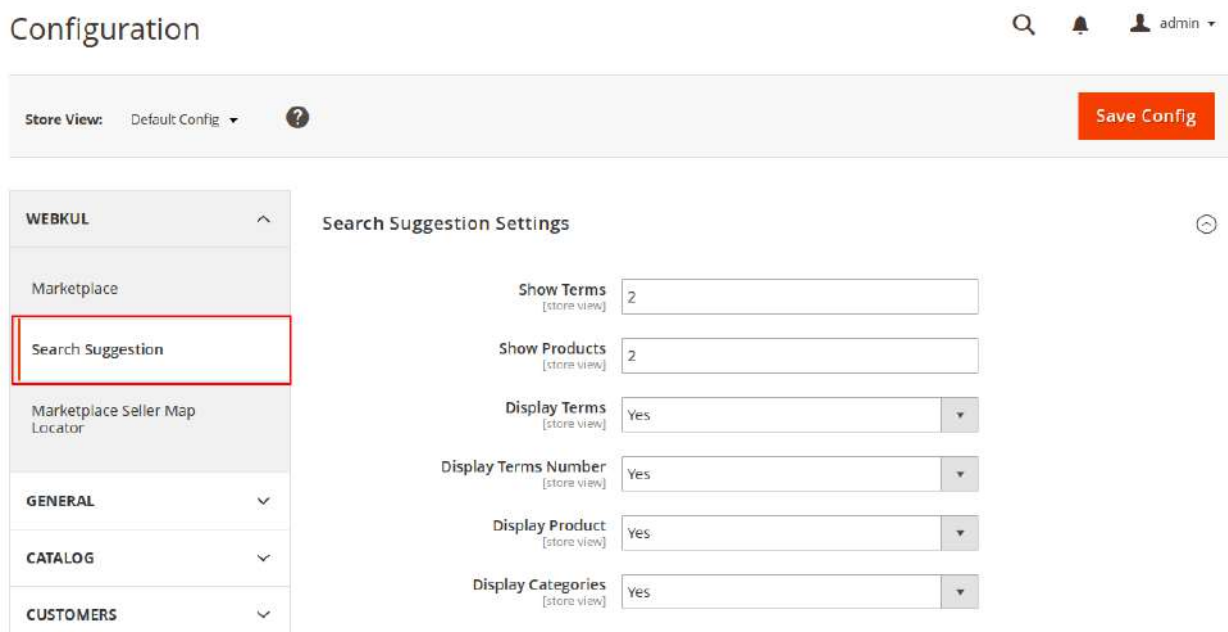

Product Search Suggestion module provides immediate search results. It shows results while you are still typing and gives suggestions for store products. Products are shown with image, product name and price.

Features Of Product Search Suggestion

- Results display immediately while still typing.
- Open source code and fully customizable.
- It can search by Tags, Product name and category.
- Shows popular products based on Ratings.
- Highlighting of the keyword in the search result.
- It is very easy to configure and handy to use.

Module Configuration

After successful installation of the module you need to go **Stores -> Configuration** and select **Search Suggestion** option under **Webkul** Tab. The admin can set various options for search suggestions like show terms, show products, display products, display categories, the number of products etc.

The screenshot shows the Magento 2 Configuration interface. At the top, there is a search bar, a notification bell, and a user profile dropdown for 'admin'. Below this, the 'Store View' is set to 'Default: Config'. A 'Save Config' button is visible in the top right corner. On the left side, there is a sidebar menu with the following items: 'WEBKUL' (expanded), 'Marketplace', 'Search Suggestion' (highlighted with a red box), 'Marketplace Seller Map Locator', 'GENERAL', 'CATALOG', and 'CUSTOMERS'. The main content area is titled 'Search Suggestion Settings' and contains the following configuration options:

Field Name	Value
Show Terms [store view]	2
Show Products [store view]	2
Display Terms [store view]	Yes
Display Terms Number [store view]	Yes
Display Product [store view]	Yes
Display Categories [store view]	Yes

Show Terms: Admin can set any number of Terms to show terms in search suggestions.

Show Products: Admin can set any number of Products to show products in search suggestions.

Display Terms: Admin can set Display Terms as Yes or No.

Display Terms Number: Admin can set Display Terms Number as Yes or No.

Display Product: Admin can set Display Products as Yes or No.

Display Categories: Admin can set Display Products as Yes or No.

Front End of Product Search Suggestion

After inserting all required details Search Suggestion is ready to display.

The image shows a search bar with the text 'shirt' and a magnifying glass icon. Below the search bar, a dropdown menu displays search suggestions: 'Blue T-shirt in Men', 'Black T-shirt-n in Men', 'Purple T-shirt-T1 in Woman', and 'Gray T-shirt-NS in Woman'. Below the suggestions is a search bar containing the text 'shirt' and a red '4' indicating the number of results. Below the search bar is a section titled 'Popular Products' which lists four items with their respective images and prices: 'Blue T-shirt ₹50.00', 'Black T-shirt-n ₹105.00', 'Purple T-shirt-T1 ₹400.00', and 'Gray T-shirt-NS ₹250.00'. Five callout boxes with red borders and arrows point to specific elements: 'The user can input keywords in search bar and suggestions appear below' points to the search bar; 'Showing Product's name with their respective category, click on this redirect to category page' points to the suggestion list; 'Showing Terms, which is already searched' points to the search bar containing 'shirt'; 'Showing Suggested Products' points to the 'Popular Products' list; and 'Showing no of products in searched terms' points to the red '4' next to the search bar.

That's all for Product Search Suggestion module. If you still have any issue feel free to add a ticket and let us know your views to make the module better <https://webkul.uvdesk.com>
