

# Product Search Suggestion v5.0.0

---

Search Suggestion module provides immediate search results. It shows results while you are still typing and gives suggestions for Magento2 store products. Products are shown with image, product name, and price.

Thus, enhancing customer engagement in the store as they are not having tough time searching for a product. It helps in reducing the bounce rate of the store.

## Features

---

- The results display immediately while still typing.
- Open source code and fully customizable.
- It can search by Tags, Product Name, and category.
- Shows popular products based on Ratings.
- Highlighting of the keyword in the search result.
- It is very easy to configure and handy to use.

## Module Configuration

---

After the successful installation of the module you need to go **Stores -> Configuration** and select **Search Suggestion** option under **Webkul** Tab.

So, the admin can set various options for search suggestions like –

- show terms,
- show products,
- display products,
- display categories,
- the number of products, etc.
