

How to Install WIGZO Magento Extensions

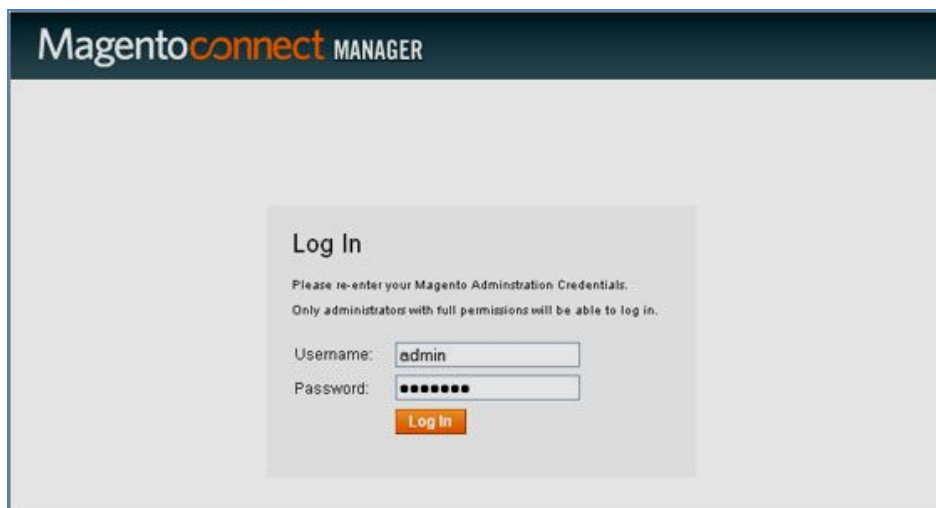

Learn how to add WIGZO extensions in Magento:

Magento has the built-in functionality to automatically install additional modules for your online store. Basically all you need is the extension's key and the script will install it for you in just a few clicks. In this tutorial we will explain in details how to install Wigzo extensions for Magento via Magento Connect.

1. You need to log in to the Magento administrator area. Then go to System -> Magento Connect -> Magento Connect Manager.

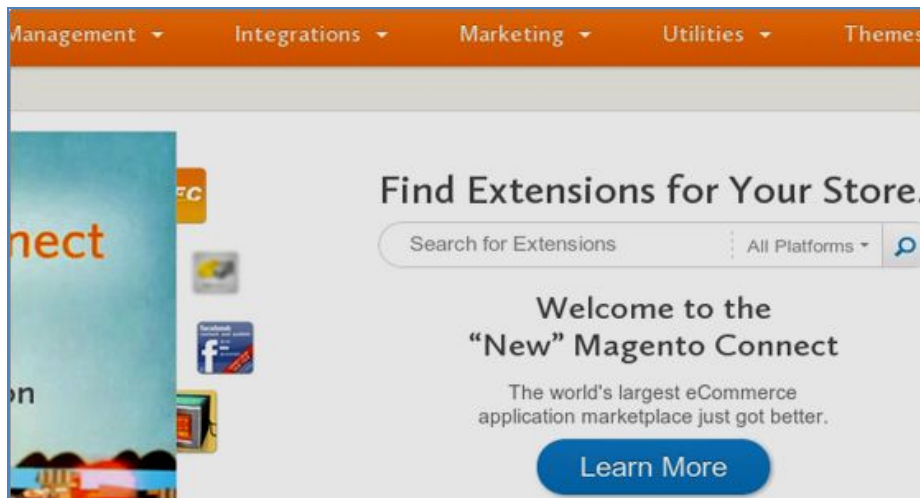

2. A new page will open for the Magento Connect Manager and you will be asked to provide your administrative credentials again.

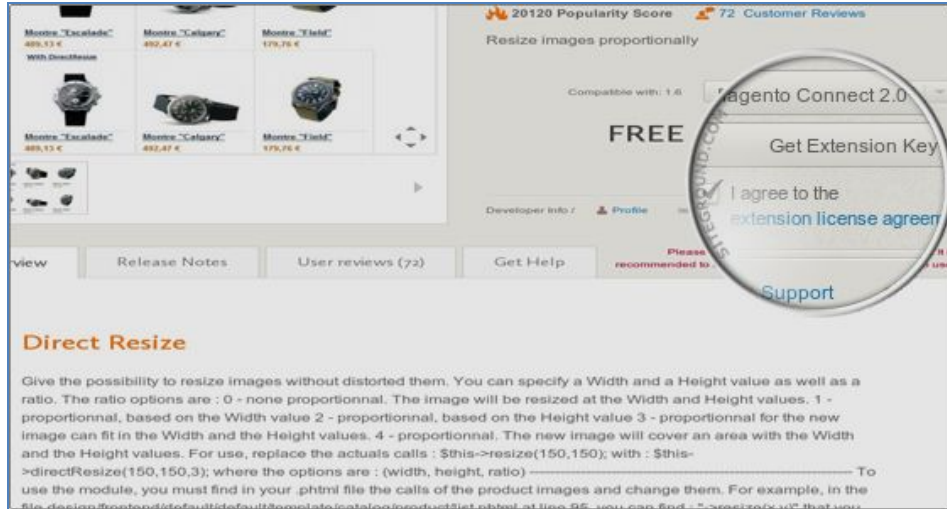

- Once logged in you will see 2 sections: **Extensions** and **Settings**. Go to extensions tab.

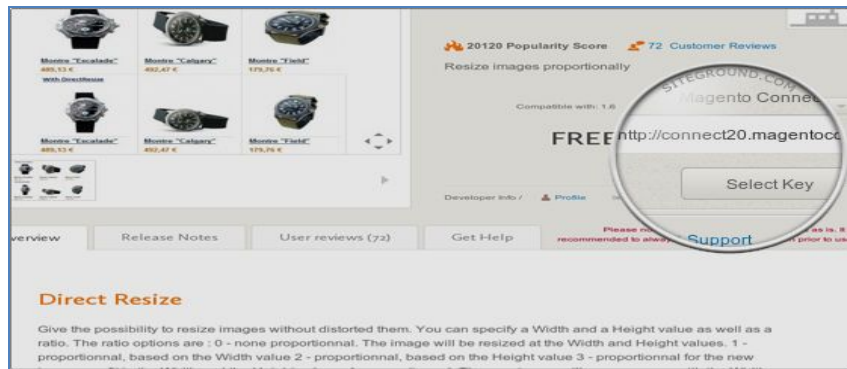

- Go to magentoCommerce Extension manager
<https://www.magentoocommerce.com/magento-connect/wigzo-browser-notifications.html>

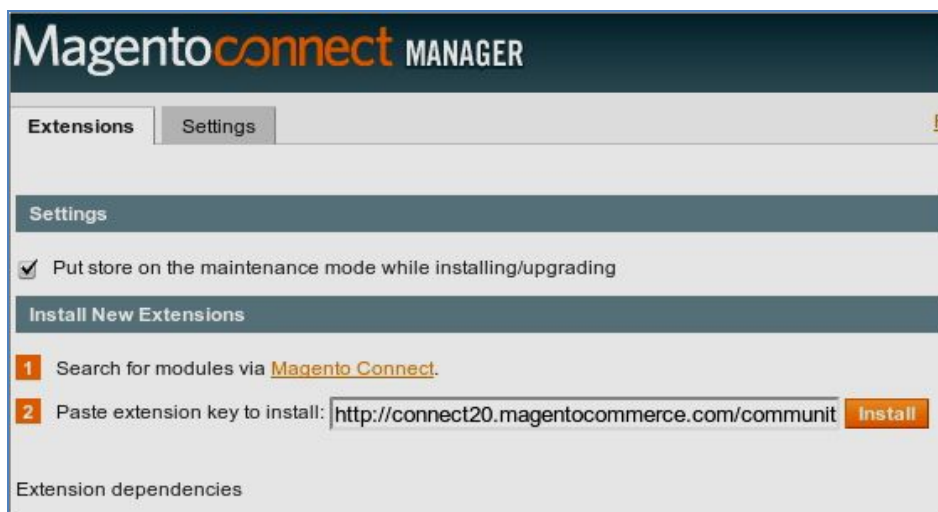

- Once you have chosen Wigzo extension click the **Install Now** button and choose the Magento Connect version matching your current Magento version. If you are using Magento 1.5 or newer, you need to select version 2.0. Check the box for "I agree to the extension license agreement". Finally, click the **Get Extension Key** button.

You will be provided with the Extension key:

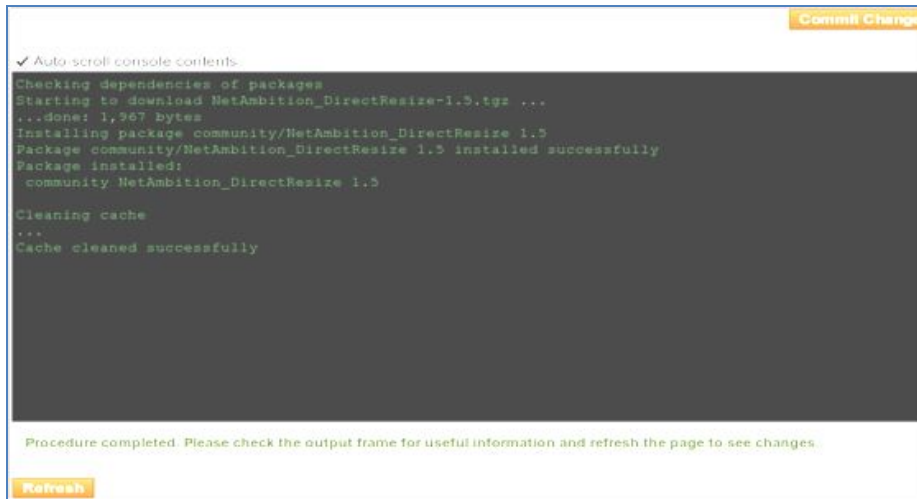

- This is the key that you need to copy and paste in your Magento Connect area. Then click **Install** and then **Proceed**.

- The Wigzo extension will be automatically downloaded and installed. After the

extension is properly installed a screen for a successful installation will appear:

```
✓ Auto-scroll console contents
Checking dependencies of packages
Starting to download NetAmbition_DirectResize-1.5.tgz ...
...done: 1,967 bytes
Installing package community/NetAmbition_DirectResize 1.5
Package community/NetAmbition_DirectResize 1.5 installed successfully
Package installed:
 community NetAmbition_DirectResize 1.5

Cleaning cache
...
Cache cleaned successfully

Procedure completed. Please check the output frame for useful information and refresh the page to see changes.
```

Once the extension is installed, go back to Magento admin and adjust its options according to your needs.
