
Plugin Installation

1) Extract the contents of the plugin file in a directory which the Magento user has access.

2) Edit composer.json under "repositories"

a) Add to the json object in the file:

```
{  
  "type": "vcs",  
  "url": "<replace this with the path to the extracted contents>"  
}
```

b) Under "require" add:

```
"windsorcircle/module-integration": "dev-master"
```

3) Run the following commands in the magento directory:

```
composer update
```

```
php bin/magento cache:flush
```

```
php bin/magento setup:upgrade
```

4) Restart web services. This will vary from server to server, but an example is:

```
service nginx stop
```

```
service php-fpm-5.6 stop
```

```
service php-fpm-5.6 start
```

```
service nginx start
```

5) Create the integration and send keys to Windsor Circle

a) Goto Stores > (Settings) Configuration

b) Expand "Services" and click "Windsor Circle"

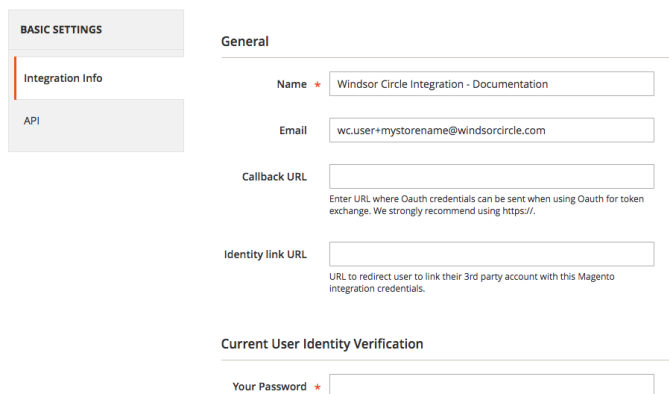

c) Click the "Sign Up" button. This should create a new integration called "WindsorCircle Integration".

d) There should be four keys displayed on this page that will needed to complete the integration

e) Please securely send these to your Windsor Circle contact (using <http://www.privnote.com> if possible so as to avoid sending these in plaintext)

API Credentials

- 1) In your Magento2 Admin Panel, navigate to System ► Integrations
- 2) Click "Add New Integration" button
- 3) Under "Integration Info"
 - Set the Name to "Windsor Circle"
 - Set email to "wc.user+yourstorename@windsorcircle.com" where yourstorename is a brief name of your store or business (it helps us recognize what store is sending us an alert)
 - Enter "Your Password" to confirm the changes and hit "Save"

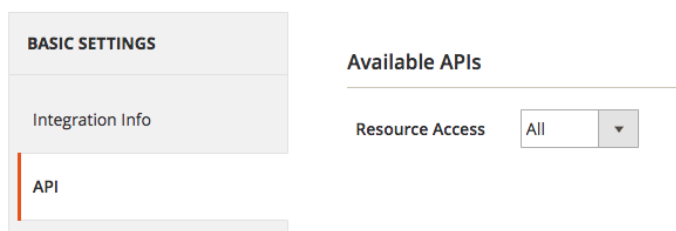

The screenshot shows the 'General' settings for a new integration. On the left, a sidebar contains 'BASIC SETTINGS' with sub-items 'Integration Info' and 'API'. The main content area is titled 'General' and contains the following fields:

- Name ***: Windsor Circle Integration - Documentation
- Email**: wc.user+mystorename@windsorcircle.com
- Callback URL**: (empty)
- Identity link URL**: (empty)

Below the 'Identity link URL' field, there is a note: "URL to redirect user to link their 3rd party account with this Magento Integration credentials."

Under the 'Current User Identity Verification' section, there is a field for **Your Password ***.

- 4) Under "API" set the Resource Access to "All" and hit "Save"

The screenshot shows the 'API' settings page. On the left, a sidebar contains 'BASIC SETTINGS' with sub-items 'Integration Info' and 'API'. The main content area is titled 'Available APIs' and contains a **Resource Access** dropdown menu set to 'All'.
