## 1. Introduction

This extension that comes out of Woom labs makes it possible for merchants to use [HT PayWay Gateway](#). Using this extension the merchant's store doesn't process any card information from the customer, but only gets confirmation from the gateway, if the payment went through or not.

## 2. Installation

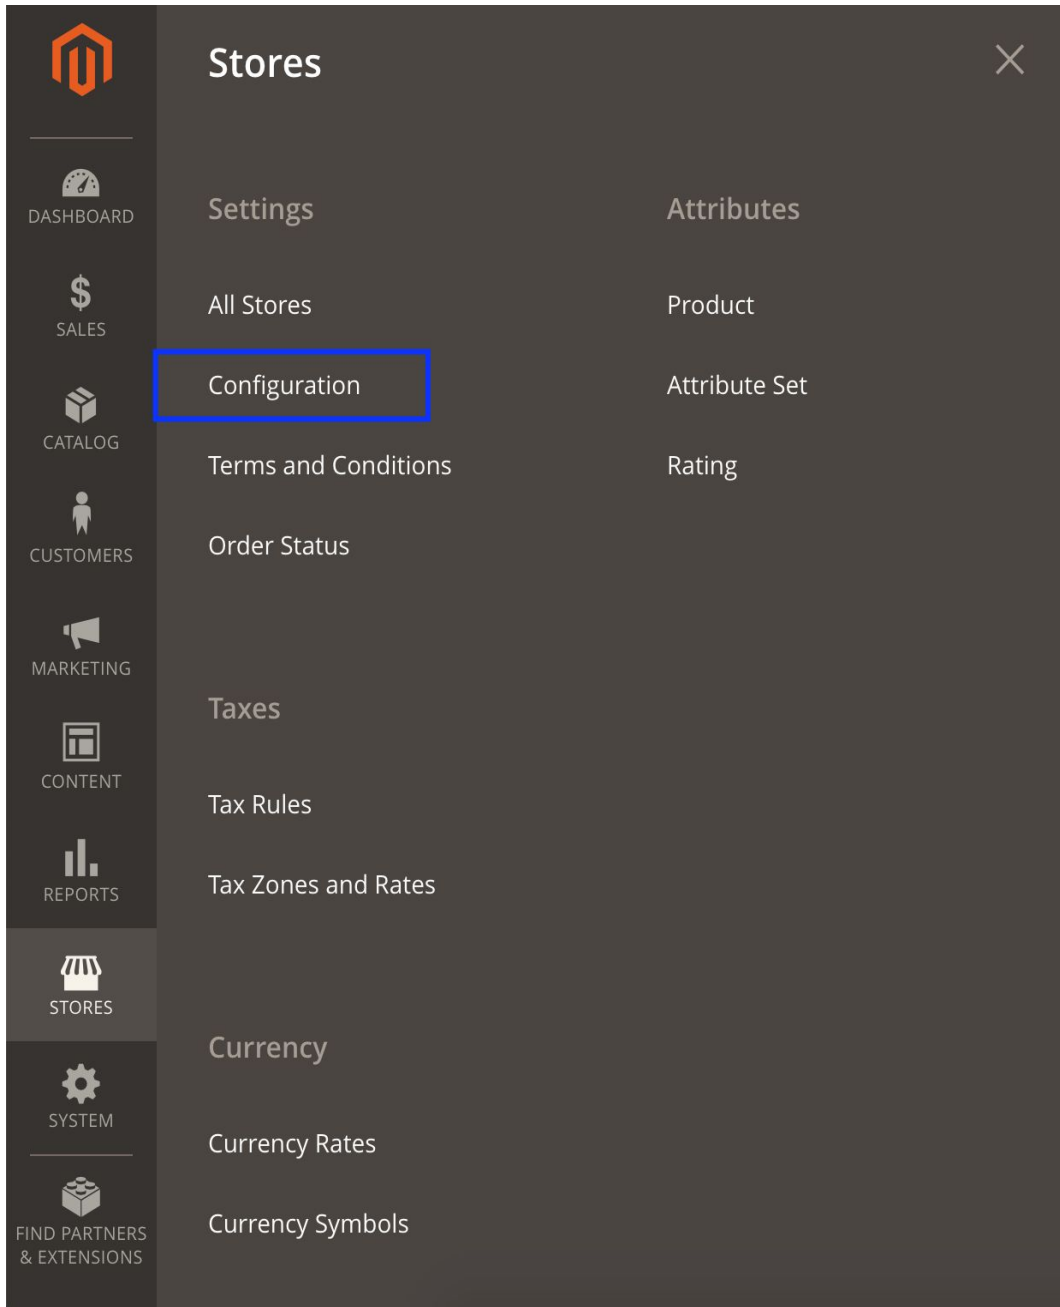

This extension can be installed via:

1. Copying extension contents into app/code folder of your Magento 2 installation
2. Component manager  
<http://devdocs.magento.com/guides/v2.1/comp-mgr/module-man/compman-start.html>

### 3. PayWay Configuration

To enable the PayWay module, follow these steps:

1. Open your Magento 2 administration and navigate to “Stores->Configuration” section

2. Expand the “Sales” section and select “Payment Methods”

**Configuration**

- GENERAL
- CATALOG
- CUSTOMERS
- SALES**
  - Sales
  - Sales Emails
  - PDF Print-outs
  - Tax
  - Checkout
  - Shipping Settings
  - Multishipping Settings
  - Shipping Methods
  - Google API
  - Payment Methods**
  - Fraud Protection
- SERVICES

3. Expand the “PayWay” section. Here you configure the payment method. The configuration options will be explained in the next chapter. In order to enable the module, select “Yes” under Enabled and save you changes on pressing the “Save Config” button.

The screenshot shows the Magento configuration interface for the PayWay payment method. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main header is labeled 'Configuration' and includes a 'Save Config' button in the top right corner. Below the header, the 'PayWay' configuration section is expanded. The 'Enabled' dropdown menu is highlighted with a blue border and is set to 'Yes'. Other configuration options include: Title (Credit Card (PayWay)), Shop ID (ShopID), Secret Key (masked with dots), Accepted Currency (US Dollar), Language (English), Payment Action (Authorize), Send Invoice (No), Debug (No), and Test Mode (No).

Enabled [website]	Yes
Title [store view]	Credit Card (PayWay)
Shop ID [website]	ShopID
Secret Key [website]	.....
Accepted Currency [website]	US Dollar
Language [store view]	English
Payment Action [website]	Authorize
Send Invoice [website]	No
Debug [website]	No
Test Mode [website]	No

## 4. PayWay configuration options

There are multiple options you can configure.

1. Title
  - Sets the title that will be displayed on the checkout
2. Shop ID / Secret Key
  - Enter the provided data from PayWay (see [Chapter 5 - PayWay interface](#)).
3. Accepted Currency
  - Select the currency in which the payment will be made
4. Language
  - Sets the language for the payment gateway page
  - Available options are: English and Croatian
5. Payment Action
  - Authorize
    - Only authorize the payment
  - Authorize and capture
    - Authorize and capture the payment at the same time
6. Send Invoice
  - If selected, the customer will receive an invoice, after the payment has been made
7. Debug / Test Mode
  - Used only for debugging and testing, otherwise should be set on “No”
8. Payment from Applicable Countries / Payment from specific countries
  - If selected, restricts payments to specific countries (billing address)
9. Instructions
  - Sets a custom text, that will be displayed to the customer under the billing address

Payment Method:

Credit Card (PayWay)

- My billing and shipping address are the same

Ime Prezime

Adresa

Grad, Grad Zagreb 10000

Croatia

123456789

- I understand and accept the terms and conditions

Continue to credit card details

## 10. Sort Order

- If multiple payment methods are enabled, sorts the order in which they are displayed

## 5. PayWay interface

Get the “Shop ID” and generate the “Secret Key” from the PayWay interface, which have to be entered in the configuration.

The screenshot displays the PayWay interface for configuring store settings. The header includes the PayWay logo and navigation links. The main content area is divided into two sections: 'Kontakt podaci' (Contact Data) and 'Postavke' (Settings).

**Kontakt podaci:**

- Naziv: woom digital
- Naziv tvrtke: TEST
- OIB: 90765490865
- Kontakt osoba: [Redacted]
- Adresa: [Redacted]
- Mjesto: [Redacted]
- Poštanski broj: [Redacted]
- Država: [Redacted]
- Telefon: [Redacted]
- Fax: [Redacted]
- Mobitel: [Redacted]
- Email: info@woom.digital
- Web: [Redacted]

**Postavke:**

- Digitalni MD5 ključ:  Omogućiti
- Tajni ključ: z3F2(JE12MST)~Ob414DK (Odlučno 100/100)
- Preporuka: tajni ključ je poželjno što češće mijenjati. Pritom je, naravno, važno da se isti novi ključ istovremeno unese i putem administrativnog sučelja, kao i na stranici same trgovine.
- Automatsko preusmjerenje na ReturnURL:  Uključiti
- Potvrda kupcu e-mailom:  Uključiti
- DebugMode client IP: [Redacted]
- Onemogućiti unos kontakt podataka:  Uključiti
- Omogućiti popuste:  Uključiti
- Upozorenje: prije uključivanja opcije popusta provjerite da li ste prilagodili Vašu web aplikaciju. Za detalje integracije proučite dokumentaciju.
- Važnosti prodajnih mjesta: \$ 1. PBZ (Uključiti BIN prioritet: )
