

Click & Collect

Installation instructions

Manual Installation

To install Click & Collect, copy the content of the unzipped folder and paste all files and directories in your Magento 2 root directory.

Composer Installation

Add the repository to your composer configuration with the below command:

```
composer config repositories.wyomind composer https://repo.wyomind.com
```

Run the composer installer:

```
composer require wyomind/clickandcollect
```

Extension activation

In your Command Line Interface, execute:

```
bin/magento setup:upgrade --keep-generated
```

If you are using a production mode, also execute:

```
bin/magento setup:static-content:deploy
```

```
bin/magento setup:di:compile
```
