# Show **Cart Discounts**

*Convert users that are sale conscious*

Magento 2 Extension Manual

by Xumulus.com  
support@xumulus.com

---

## Overview

Convert more browsers to customers by showing them how much they are saving.

The default magento configuration shows discounts as saving on the product grid and product pages. But once they are added to the cart, the users no longer can see the cart discounts.

This extension fixes that; now the product discounts are shown on the cart as well as in the checkout. Additionally, the subtotal of the cart now shows the total “Savings” to the users.

Convert more browsers to customers by showing them how much they are saving.

## Features

- Works with both Magento’s “Special Price” price feature as well as “Catalog Price Rules”
- Once those are configured, it will show the savings on:
  - a. In the mini cart
  - b. On the main cart
  - c. On the checkout summary
- Additional savings called out as “Retail Price” and “Savings” on the cart summary.
- Customizable language for all cart phrases. So “Retail Price” can be changed to “List Price”
- Applied to all product types.
- Discount coupon Block is shown in cart page.
- Price calculation based on “Including Tax” and “Excluding Tax”

## Installation

### Magento Marketplace Installations

---

---

Please refer to Magento's online [instructions](#).

---

---

## Configuration and Use

### Setting up the products

Create either a:

1. Catalog Price Rule

Please refer to Magento's documentation.

[http://docs.magento.com/m2/ce/user\\_guide/marketing/price-rules-catalog.html](http://docs.magento.com/m2/ce/user_guide/marketing/price-rules-catalog.html)

2. Special Price

Please refer to Magento's advanced pricing.

[http://docs.magento.com/m2/ce/user\\_guide/catalog/settings-advanced-advanced-pricing.html](http://docs.magento.com/m2/ce/user_guide/catalog/settings-advanced-advanced-pricing.html)

3. Setting Discount Coupon

Now the discount will be show in "Saved Amount" in cart and checkout page.

4. Set the tier price

If the tier price is set, then it is also shown in the cart page with details.

5. Including and Excluding Tax

The discount and saved price will be calculated based on the "Including and Excluding" Tax

Once either of the above results in a product showing a regular price and a sale price in the front end. The extension will then take over the rest. Now, adding those products to the cart will show the discounts in the cart and on the checkout pages.

---

You are given the option to customize the text shown in these two locations. In order to customize this text, select the **STORES**  tab on the sidebar menu.

Then select **Configuration**, located in the **Settings** section.

You will then arrive at the **Configuration** Page

---

---

A menu will be on the left portion of the Configuration page.

Select the **Xumulus** drop down.

GENERAL	▼
CATALOG	▼
CUSTOMERS	▼
SALES	▼
<b>XUMULUS</b>	▼
SERVICES	▼
ADVANCED	▼

Then, select **Cart Discount**

<b>XUMULUS</b>	▲
<b>Cart Discount</b>	

The General Settings page will appear where the version (1.1.0) is stated, along with the options to enter custom text for the **List Price Title** and **Savings Title** and coupon block setting

<b>General Settings</b>	
<b>Version</b> <small>[store view]</small>	1.1.0
<b>Regular Price Text On Cart/Checkout</b> <small>[store view]</small>	<input type="text" value="Original Price"/> Enter the Regular Price Title.
<b>Savings Text On Cart/Checkout</b> <small>[store view]</small>	<input type="text" value="Saved"/> Enter the Savings Title
<b>Cart line item title</b> <small>[store view]</small>	<input type="text" value="Applicable Offer"/> Enter cart line item title i.e 'Applicable Offer'

---

Once the General Settings are set, the coupon block in cart page can be set up from the cart coupon setting.

## Cart Coupon Settings

<b>Applicable Coupons on cart</b> <small>[store view]</small>	Yes
	Show list of cart rule block on checkout cart page
<b>Applicable Coupon Heading</b> <small>[store view]</small>	<input type="button" value="Show / Hide Editor"/> <input type="button" value="Insert Widget..."/>
	<input type="button" value="Insert Image..."/> <input type="button" value="Insert Variable..."/>
	<pre>&lt;p&gt;Coupon Block List.&lt;/p&gt;</pre>
<b>Applicable Coupon Footer</b> <small>[store view]</small>	<input type="button" value="Show / Hide Editor"/> <input type="button" value="Insert Widget..."/>
	<input type="button" value="Insert Image..."/> <input type="button" value="Insert Variable..."/>
	<pre>&lt;p&gt;Coupon with "Green" Color are applicable in cart.&lt;/p&gt;</pre>
<b>Active Coupon color</b> <small>[store view]</small>	09450D 
<b>Number of coupon show</b> <small>[store view]</small>	3

Once desired changes have been made, save the changes by selecting the "Save Config" button located near the top-right of the page.

Flush the magento cache.

The custom text will now appear in the specified areas.
