

## User Guide for Advanced Sorting

---

# Advanced Sorting for Magento 2

Advanced Sorting extension allows customers to sort the products on product listings by the following ways

- Best Seller - Products will be sorted by quantity of sales
- New Products - Products will be sorted by the date of creation
- Biggest Saving - Products will be sorted either by Discount Percent or Actual Discount Difference - Depending on "Use Percentage for Biggest Saving" value
- Top Rated - Products will be sorting by average rating
- Reviews Count - Products will be sorted by approved reviews count
- Most Viewed - Products will be sorted by the number of visits

This will help them find the desired products more easily.

The screenshot displays a product listing page with the following elements:

- Top left: A grid view icon and the text "Items 1-9 of 50".
- Top right: A "Sort By" dropdown menu with "Position" selected. The menu options are: Product Name, Price, Best Sellers, New, Biggest Saving, Top Rated, Reviews Count, and Most Viewed.
- Product grid: Four tank tops are shown in a row, each with its name, rating, review count, and price.

Product Name	Rating	Reviews	Price
Breathe-Easy Tank	★★★★☆	2 reviews	\$34.00
Antonia Racer Tank	★★★★☆	3 reviews	\$34.00
Maya Tunic	★★★★☆	1 review	\$29.00
Chloe Compete Tank	★★★★☆	3 reviews	\$39.00

## Configuration

Advanced Sorting extension provides easy to use configuration section, which allows to the the following

- 1 . Enabled - Enable/Disable the extension
- 2 . Disable sorting option 'position' - Exclude the “Position” as a sorting option, which is provided on magento by default
- 3 . Add/delete/edit sorting options. Allows to change the default label for each sorting option. (For each Store View)

#### General

Enabled [global] Yes  Use system value

Disable sorting option 'position' [store view] No  Use system value

Select Sorting Option [store view]

Sorting Option	Label	Action
Best Sellers	<input type="text"/>	
New	<input type="text"/>	
Biggest Saving	<input type="text"/>	
Top Rated	<input type="text"/>	
Reviews Count	<input type="text"/>	
Most Viewed	<input type="text"/>	
<input type="button" value="Add Sorting Option"/>		

Use Percentage for Biggest Saving [store view] Yes  Use system value

- 4 . Best Sellers Data Source - Select the source of the bestsellers data
  - Magento Reports - This will use the best sellers data from magento reports, which is filled by cron.
  - Real Time - This will calculate the sales on the fly. This usually takes more time and is not recommended for big stores.
- 5 . Bestsellers Period - Choose the period for bestsellers data. Can be chosen to show data for current year, month or day
- 6 . Most Viewed Period (days) - The period for which the product views will be counted when sorting by view count.

7 . Use Percentage for Biggest Saving - If selected "Yes", the discount percentage will be considered for calculating the saving, otherwise, the actual price difference will be used.

<b>Best Sellers Data Source</b> <small>[store view]</small>	Magento Reports	<input checked="" type="checkbox"/> Use system value
	Real Time method requires more performance and is not recommended for stores that have a lot of products and sales.	
<b>Bestsellers Period</b> <small>[store view]</small>	Yearly	<input checked="" type="checkbox"/> Use system value
<b>Most Viewed Period (days)</b> <small>[store view]</small>	20	
	Leave empty for life-time statistics.	
<b>Use Percentage for Biggest Saving</b> <small>[store view]</small>	Yes	<input checked="" type="checkbox"/> Use system value
