## MANUAL

### Media cleaner

v1.0.0

## Description

After installing this module will remove the images from the hosting once the product are being deleted from the catalog.

## Installation

The installation is the same as for any other modules in Magento.

1. Decompress the module right in the root of your Magento installation.
2. Clear Magento cache.
3. If you have the compiler enabled, you will have to run the compilation process.
4. You might need to logout and login again in the backend.

The module will add a new section in System > Configuration -> YoungDogs -> Media Cleaner where you can disable or enable the functionality.
