Introduction

The ZERO-1 Advanced Success Page module for Magento 2 allows you to create a much more interactive success page for your customers.

You will have the ability to personally thank customers (including guests) for their order, show more detailed order information, display promotional banners with the use of static blocks, give customers the ability to sign up for your newsletter, include related products and also include social media assets.

Giving extra attention to the success page with the use of this module means you can be sure that it will return increased customer loyalty and experience with a boost of sales.

Installation

1. Download the package file from your purchase on Magento Marketplace
2. From your Magento root make the directory `app/code/Zero1/AutoFreeGift`
3. Extract the package into the above directory
4. Update your `composer.json` file. If this is your first time installing a ZERO-1 module you will need to locate your `composer.json` find 'psr-4' and amend as below

```
"psr-4": {  
    "Magento\\Framework\\": "lib/internal/Magento/Framework/",  
    "Magento\\Setup\\": "setup/src/Magento/Setup/",  
    "Magento\\": "app/code/Magento/"  
},
```

would become

```
"psr-4": {  
    "Magento\\Framework\\": "lib/internal/Magento/Framework/",  
    "Magento\\Setup\\": "setup/src/Magento/Setup/",  
    "Magento\\": "app/code/Magento/",  
    "Zero1\\": "app/code/Zero1/"  
},
```

1. You will then need to enable the module:

```
php bin/magento module:enable Zero1_AutoFreeGift
```

2. You will then need to tell magento to add the new module/theme:

```
php bin/magento setup:upgrade
```

3. it would then be best to clear cache and regenerate all files

```
php bin/magento deploy:mode:set production; php bin/magento setup:static-  
content:deploy; php bin/magento setup:static-content:deploy en_GB en_US; php bin/  
magento cache:enable; php bin/magento cache:flush;
```

4. Your module should now be installed

Setup

Once you have installed the module, go to your admin panel and navigate to... Stores > Settings > Configuration > Sales > Advanced Success Page. You will see the following configuration options.

General

Enable
(store view)

Yes

☐ Use system value

Page Title
(store view)

Thanks %customer_name%

☐ Use system value

The following variable(s) will be replaced dynamically
%customer_name%

Use Checkout Name For Guest Customers
(store view)

Yes

☒ Use system value

Guest customers are addresses as 'Guest'. This will use the name that the user submitted at the checkout

Guest Name
(store view)

☒ Use system value

Intro Text
(store view)

☒ Use system value

The following variable(s) will be replaced dynamically
%customer_name%, %customer_email%
If no content is added, nothing will be shown

Order Information Row

General

Page Title

You have the option of giving the customer a more personalised thank you message by adding %customer_name% into the page title which will be replaced with their name.

Use Checkout Name For Guest Customers

If the customer checks out as a guest and you set this to Yes, the name the customer entered at the checkout stage will be used in the page title and intro text (if required).

Guest Name

Considering you have set 'Use Checkout Name For Guest Users' = 'No', this is the name that would then be displayed when using %customer_name% in the page title. Please note this would be the same name for all guest users.

Intro Text

Here you have the option of adding some intro text to interact with your customer and further personalise their shopping experience.

Here you have the option of adding both %customer_name% and %customer_email% into the intro text.

Order Information Row

The order information row gives you the option of displaying order information, shipping information and billing information. With the Advanced Success Page module being fully responsive, you don't need to worry about display issues should you only enable one of these options.

CMS Static Block Row

Here you have the option of injecting a static block you created giving you flexibility to add in some important promotional material. Simply select your block from the dropdown and it will display on the frontend.

Related Products Row

Enabling the related products row will show related products for the items the customer has ordered. You have the option of setting the limit of how many products displayed along with which type of image you would like to use for the related products.

Social Media Row

The social media row uses [AddThis](#) to inject social media buttons onto the success page.

If you don't already have an AddThis account, you can register for free here...

<https://www.addthis.com/register>

Once you're logged in you can create a tool for displaying the social media buttons. Select 'Get the code' on the tool you have created and you should be presented with a page similar to the following example...

One last step!

Follow the instructions below to install tools on your site

HTML WEBSITE

WORDPRESS

TUMBLR

SHOPIFY

MAGENTO

1

First copy the following code.

```
<!-- Go to www.addthis.com/dashboard to customize your tools --> <script type="text/javascript" src="//s7.addthis.com/js/300/addthis_widget.js#pubid=ra-58ac6b9d7ccf42ab"></script>
```

COPY

2

Secondly, paste the above code right above the closing `</body>` of the HTML in your website on every page you want AddThis to work.

```
<html>
<head>
  <title>AddThis Code</title>
</head>
<body>
  <h1>Where to install code</h1>
  <p>It should be right before the closing body tag.</p>
  <div>
    <!-- Go to www.addthis.com/dashboard to customize your tools --> <script type="text/javascript" src="//s7.addthis.com/js/300/addthis_widget.js#pubid=ra-58ac6b9d7ccf42ab"></script>
  </div>
</body>
</html>
```

Paste Here

Copy this code, and add it into the 'AddThis Footer JS' field

Code for Activated Tools

You'll need to add this additional code within the body of your page to fully activate your inline tools. Simply copy and paste the code below to the places on your page where you want the tools to appear.

Inline Share Buttons

```
<!-- Go to www.addthis.com/dashboard to customize your tools --> <div class="addthis_inline_share_toolbox"></div>
```

COPY

Copy this code, and add it into the 'AddThis Content HTML' field

ZERO-1 have been actively working with Magento since 2009. Being an early adopter, we have been gifted with incredible outlook over the Eco-System from Systems Integration through to Commercial Marketplaces. We actively work in both 'camps' and this unity is where our passion lies.

*Creating value-added enhancements to the Magento platform
using the highest possible standards*
