

## How to Use

---

You can go to Catalog > Attributes > **Manage Attributes**

- Click on Create new or edit the already created attribute
- If you select the **use in layered navigation** option to be yes, you will see another option **Use for specific categories**
- If you wish to use your attribute for all the categories, you can select “No” and the attribute will be visible for all the categories
- If an Attribute is required for only a specific category, you can select “Yes” and you will see a box with multiple selections with a list of categories created.
- You can select all the categories in which you want your attribute to be displayed and the attribute will be visible only for those specific categories.
