

Zonos Hello App for Magento 2 User Guide

LAST UPDATED: 29 JANUARY 2019

Zonos Hello App for Magento 2 User Guide

Note: For the most updated information on our Zonos Magento 2 apps, please visit:
<https://docs.zonos.com/plugins/magento2>.

Installation Guide

Important

- For **Magento 2.0, 2.1, and 2.2** – you will need **PHP 7.0.6 or greater** or **PHP 7.1.x** (whichever is compatible with your version of Magento).
- For **Magento 2.3**, you will need **PHP 7.1.x**.

There are three options to install the Zonos Hello module.

Option 1 - Web setup wizard (preferred)

To install: Follow the instructions from the Magento User Guide:

https://docs.magento.com/marketplace/user_guide/buyers/install-extension.html

Option 2 - Install via Composer (preferred)

Important – Installation with this option must be performed by an experienced Magento developer.

To install: From your terminal, go to your `<root magento dir>`, then follow the steps below:

- `composer require zonos/hello`
- `php bin/magento module:enable Zonos_Hello`
- `php bin/magento setup:upgrade`
- `php bin/magento setup:di:compile`

To uninstall:

- `php bin/magento module:uninstall Zonos_Hello`
- `php bin/magento setup:di:compile`

Note: For additional questions on using Composer with Magento, go to:
<https://devdocs.magento.com/guides/v2.3/comp-mgr/install-extensions.html>.

Option 3 – Download the extension

Important – You will not be able to run: `php bin/magento module:uninstall Zonos Hello`, because it was not installed through Composer.

To install:

1. Download the extension from the Magento Marketplace.

Zonos Hello App for Magento 2 User Guide

2. Extract the extension into the `<root magento dir>/app/code/Zonos` folder (create any folder that does not exist).
3. From the command line, change the directory to your root Magento 2 directory.
4. Run the following commands:
 - `php bin/magento module:enable Zonos_Hello`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:di:compile`

To uninstall:

- `php bin/magento module:disable Zonos_Hello`
- `php bin/magento setup:di:compile`

Configuration Guide

1. Obtain your Site Key credentials at <https://app.zonos.com/#/hello>.
2. Go to your **Magento Admin > Stores > Configuration > Zonos > Zonos Hello**.
3. Configure the following options as instructed below:
 - a. **Enable** – This allows the Zonos Hello widget to display duty & tax quotes while customers visit your product pages.
 - b. **Site Key** - Enter your Zonos provided site key obtained from *Step 1*.
 - c. **Currency Conversion Selectors** – If you want Zonos Hello to convert currency, paste your CSS selectors here. Multiple selectors are separated with a comma, e.g. `.price,.__current-price,.__subtotal,.__original-price`.
 - d. **Hide domestic elements (OPTIONAL)** - If you need or want to hide domestic elements from your international customers, input CSS selectors for elements you want to hide e.g. `.nav-6; .action.add`.
