Introduction

This manual describes how you can integrate Zotapay with your Magento 2 shop. Before you can configure the Zotapay Magento 2 extension you need to have API credentials, provided by Zotapay.

Zotapay is a global payment service provider that facilitates online payment processing solutions worldwide, supplying innovative and secure technology. Our services include but are not limited to, credit and debit cards, alternative methods, and local solutions, and more.

Installing the Zotapay Magento 2 extension

The Zotapay Magento 2 extension can be installed in two ways, but both require access to the server's command line interface (CLI).

Manual installation using FTP

1. Download the latest version of the module from GitHub or the Magento Marketplace.
2. Extract the module files and upload them to:
[Magento root]/app/code/Zotapay/Payment

3. Install the Zotapay PHP SDK (using CLI):

```
composer requires zotapay/php-sdk
```

4. Execute the following commands in your Magento root directory (using CLI):

```
php bin/magento module:enable Zotapay_Payment
```

```
php bin/magento setup:upgrade
```

If your Magento is running in production mode then run the following:

```
php bin/magento setup:di:compile
```

```
php bin/magento setup:static-content:deploy
```

5. Finally, you need to clear Magento caches by executing the following commands:

```
php bin/magento cache:clean
```

```
php bin/magento cache:flush
```

Manual update using FTP

If you have installed a previous version with zip extraction and are uploading via FTP, please remove the files found in [Magento root]/app/code/Zotapay/Payment and proceed with the installation steps above. You need to extract and upload new files to the same directory and repeat the installation steps to complete the update of the extension.

Installation using Composer

Installing the extension using Composer will make installation and maintenance easier, so installation using Composer is the preferred method for installing the extension.

To install the extension using composer you need to run the following commands using the command line interface:

1. `composer require zotapay/magento2-module-payment`
2. `php bin/magento setup:upgrade`
3. `php bin/magento setup:di:compile`
4. `php bin/magento setup:static-content:deploy`
5. `php bin/magento cache:clean`
6. `php bin/magento cache:flush`

After running these commands, the latest stable version is downloaded and installed within your Magento 2 website.

Update using Composer

If you have installed a previous version with composer, just run the following commands to update the extension

```
composer update zotapay/magento2-module-payment
php bin/magento setup:upgrade
php bin/magento setup:di:compile (only for production mode)
```

General Configuration

Login to your admin panel and navigate to:

Stores → Configuration → Sales → Payment Methods

You should see the Zotapay Payment section like the screenshot below.

The screenshot shows the 'Configuration' page in the admin panel. On the left is a sidebar with navigation options: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Under the 'Payment Methods' section, there are several payment providers listed with 'Configure' buttons: Amazon Pay, ZOTAPAY, Zero Subtotal Checkout, Check / Money Order, Bank Transfer Payment, Cash On Delivery Payment, and Purchase Order. Each provider has a brief description of its service.

Click on Configure to expand Zotapay configuration sections.

The screenshot shows the expanded 'ZOTAPAY' configuration section. It includes a 'Close' button in the top right. Below the provider name and description, there is a section for 'API Credentials' with the following fields:

- Enabled** (store view): A dropdown menu set to 'Yes'.
- Payment Mode** (store view): A dropdown menu set to 'Sandbox'.
- Merchant ID** (store view): A text input field containing 'SDKEXPLORER'. Below it, a note states: 'Merchant ID is given when you create your account at Zotapay.'
- Merchant Secret Key** (store view): A text input field containing '7801a7a3-0e81-481e-8f59-ee0bfef009bb'. Below it, a note states: 'Merchant Secret Key is given when you create your account at Zotapay.'
- Order Description** (store view): A text input field containing 'Test Magento 2 order'. Below it, a note states: 'The description that the customer sees during checkout.'

First you will need to configure and set your “API Credentials”

—
ZOTAPAY
ØNE APPLICATION ØNE INTEGRATION
—

Enabled - Enable Zotapay Payment extension from here

Payment mode - Set to Sandbox for test transactions and Live for real transactions

Merchant ID - This is given when you create your Zotapay account.

Merchant Secret Key - This is given when you create your Zotapay account.

Order Description - Description message for your Zotapay transactions.

Payment Methods Configuration

Zotapay Payment extension can enable up to 5 payment methods on the checkout page. Each payment method can be customized with following settings:

⊖ Zotapay Payment Method

Enabled <small>[store view]</small>	<input type="text" value="Yes"/>	<input type="checkbox"/>
Title <small>[store view]</small>	<input type="text" value="Zotapay Online Payment"/>	
Endpoint <small>[store view]</small>	<input type="text" value="503366"/>	
	<small>Endpoint is given (optional) when you create your account at Zotapay.</small>	
New Order Status <small>[website]</small>	<input type="text" value="Processing"/>	<input type="checkbox"/> Use system value
Instructions <small>[store view]</small>	<input type="text" value="You will be redirected to Zotapay Website for online payment."/>	
Select Logo Image <small>[store view]</small>	<input type="button" value="Choose file"/> No file chosen <input type="checkbox"/> Delete Image <small>Allowed file types: jpg, jpeg, gif, png, svg</small>	
Payment from Applicable Countries <small>[website]</small>	<input type="text" value="All Allowed Countries"/>	
Payment from Applicable Region <small>[website]</small>	<input type="text" value="-- Choose --"/>	
	<small>Selecting a region will preselect countries in the multiselect below.</small>	
Payment from Specific Countries <small>[website]</small>	<div style="border: 1px solid #ccc; padding: 5px;"> Afghanistan Albania Algeria American Samoa Andorra Angola Anguilla Antarctica Antigua & Barbuda Argentina </div>	
Sort Order <small>[website]</small>	<input type="text" value="1"/>	

Enabled - Enable payment method on the checkout page

Title - Method title on the checkout page

Endpoint - Merchant specific endpoint ID for the payment method

Applicable Regions - Display payment method for specific regions when previous is field is selected as “Specific countries” and “Specific Countries” multi select is enabled

Specific Countries - manual selection of allowed countries or preselect with “Applicable Regions” field

Sort Order - position of the payment method on the checkout page

Overpayment and Partial Payment statuses

Some local solutions which Zotapay offers allow end user to deposit less or more funds, than they paid for the item.

In order to highlight and track such orders, Zotapay’s Magento application has two additional statuses:

ZotaPay Partial Payment – the End User deposited less than the item costs

ZotaPay Overpayment – the End User deposited more than the item costs

When status is Overpaid or Partial Payment, the true paid amount needs to be displayed in the Payment & Shipping Method.

Partial Payment orders can become an order with processing status or overpayment status if connected via Zotapay’s solutions. Plugin will update statuses accordingly and automatically.

Order & Account Information

Order # 000000136 (The order confirmation email is not sent)

Order Date: Apr 11, 2021, 5:13:39 AM

Order Status: **Zotapay Partial Payment**

Purchased From: Main Website
Main Website Store
Default Store View
